About

You can monitor all the runs, actions, and decisions made by an agent. This article will guide you through the process of monitoring an agent's activity.

Before you start

- Your account must have Publishing Agent enabled.
- If you want to use **REACH**-based actions (such as captions, translation, dubbing, moderation, audio description, chaptering and metadata enrichment), your account must have an active **REACH** profile and relevant catalog item(s) configured.

Access Publishing Agent

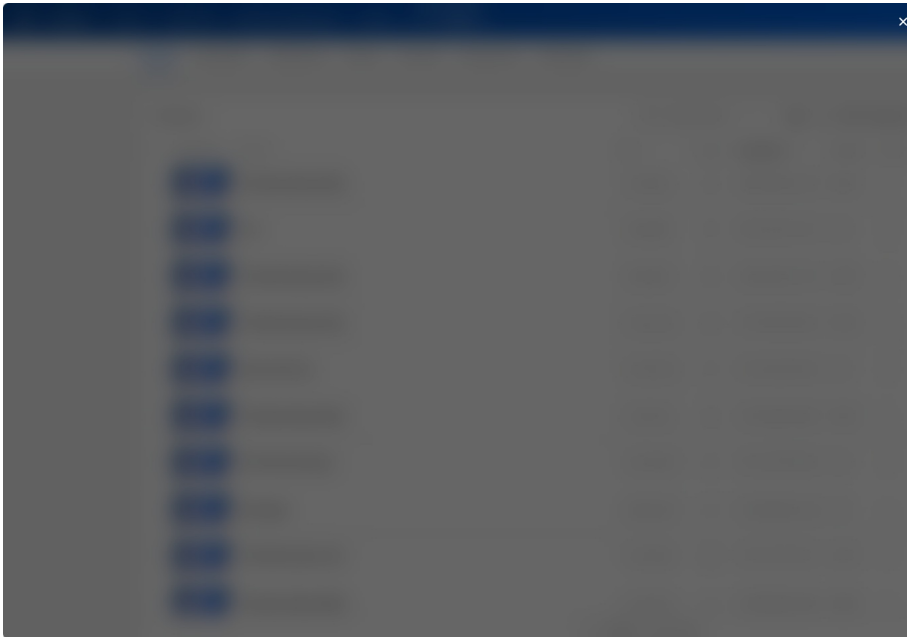

In the Rich Media CMS, Publishing Agent is accessible via the **Agents** button on the top navigation bar.

The screenshot shows the Kaltura Rich Media CMS interface. The top navigation bar includes 'CONTENT', 'STUDIO', 'ANALYTICS', 'SERVICES DASHBOARD', 'AGENTS' (highlighted with a red box), and '+ Create'. Below the navigation bar, there are tabs for 'ENTRIES', 'DOCUMENTS', 'MODERATION', 'ROOMS', 'PLAYLISTS', 'SYNDICATION', and 'CATEGORIES'. The main content area displays a list of 173 entries. The list has columns for 'Thumbnail', 'Name', 'ID', 'Type', 'Created On', 'Duration', 'Plays', and 'Status'. The first few entries are:
