About

You can let viewers share and embed media directly from the player. Sharing options include social networks, email, and copying a link or embed code.

VOD AUDIO

Access the player settings

1. Log in to your KMC and click the **Studio** tab.

The Player Studio page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

If you haven't created a player yet, check out our article Create a player for guidance.

The player settings display.

Set share & embed

- 1. Scroll down to the Capabilities section and find Share & embed.
- 2. Click the toggle to enable it and open the settings.

Share & Embed
Share url 10
Embed url
{embedBaseUrl}/p/{partnerId}/embedPlaykit.
✓ Share clip ②
Start at ②
Use native share ②
Social networks ②
✓ Email
✓ Embed
✓ Facebook
✓ Linkedin
✓ Twitter

3. Configure the following:

- Share url Type the share URL that will override the current page sharing. If
 desired, you can add {entryId} to the address, for example:
 https://mycompanymediaspace.com/media/{entryId}, and the link updates
 according to the entry ID of the video being played.
- **Embed url** This URL generates a link that dynamically updates based on the entry ID of the video being played. Type the embed URL in the following format: {embedBaseUrl}/p/{partnerld}/embedPlaykitJs/uiconf_id/{uiConfld}? iframeembed=true&entry_id={entryId}
- Share clip This enables the user to share a segment of a video by choosing
 Share clip and then selecting the start and end position of the segment they want to share.
- **Start at** This enables the user to share the link and initiate playback at the designated time.
- **Use native share** Choose whether the native share dialog of the device is used.
- **Social networks** You can define included networks, such as Facebook, LinkedIn, X (formerly Twitter), email, and embed.
- 4. Click **Save** at the top right of the settings page.
