About

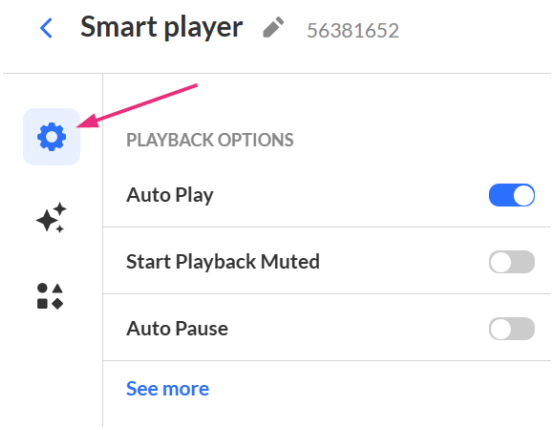

The floating player keeps the video visible when the main player scrolls out of view. As viewers scroll down the page, the player appears in a smaller floating window so they can continue watching the video.

Configure the floating player

VOD

1. In the Rich Media CMS, open your player, then go to the settings tab (look for the **gear icon**).

2. Scroll down to the **Capabilities** section and find **Floating**.

3. Click the toggle to open the settings.

4. Configure the following:

- Choose where to display the floating player: **Top Right**, **Bottom Right**, **Top Left**, or **Bottom Left**.
- Choose player behavior:
  - **Dismissible** - Select whether the viewer can dismiss the floating player so that it doesn't display while they scroll the page. Users can dismiss the floating video by clicking 'Back to video' to return to the main player, or by clicking the 'X' icon to close the floating player.
  - **Draggable** - Select whether the viewer may drag the floating player. When unchecked, the floating player has a fixed location.
- Choose dimensions and margins:
  - **Width** - type the width of the floating player in pixels.
  - **Height** - type the height of the floating player in pixels.
  - **Margin-X** - type the margin, in pixels, from the selected edge, on the X-Axis.
  - **Margin-Y** - type the margin, in pixels, from the selected edge, on the Y-Axis.

For the user guide, see Floating player.
