About

You can add skip buttons that let viewers jump past the intro or credits of a video.

Set skip intro/credits

VOD

1. In the KMC, open your player, then go to the settings tab (look for the **gear icon**).

---
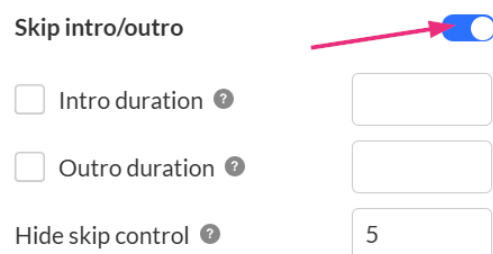

2. Scroll down to the **Capabilities** section and find **Skip intro/outro**.

3. Click the toggle to open the settings.

4. Configure the following:

- **Intro duration** - the Intro will start at the beginning of the video and last the duration you set.
- **Outro duration** - the outro will start at the time counting back from the end of the video. For example, if the video is one minute long and you set the Outro duration to 10 seconds, the outro will begin at the 50-second mark in your video.

> ⚠️
>
> These default values will be overridden if an entry has an intro and/or outro configured in its metadata.

- **Hide skip control** - type the duration of time (in seconds) before the skip control is automatically hidden from view.

For the user guide, see Skip Intro/Outro.
