About

You can enable playback of spherical 360° videos and immersive VR mode, with options for stereo view, movement, and camera settings.

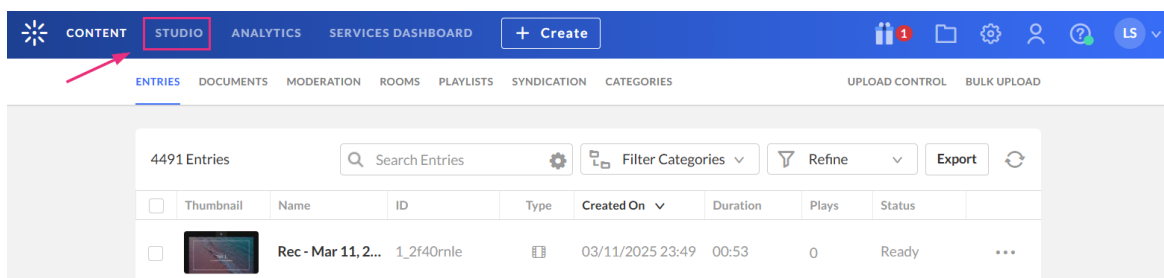

360° videos are only available for viewing in a web browser. The player supports a VR source, but not an immersive, 3D experience as with a VR headset.

VOD

Access the player settings

1. Log in to your KMC and click the **Studio** tab.

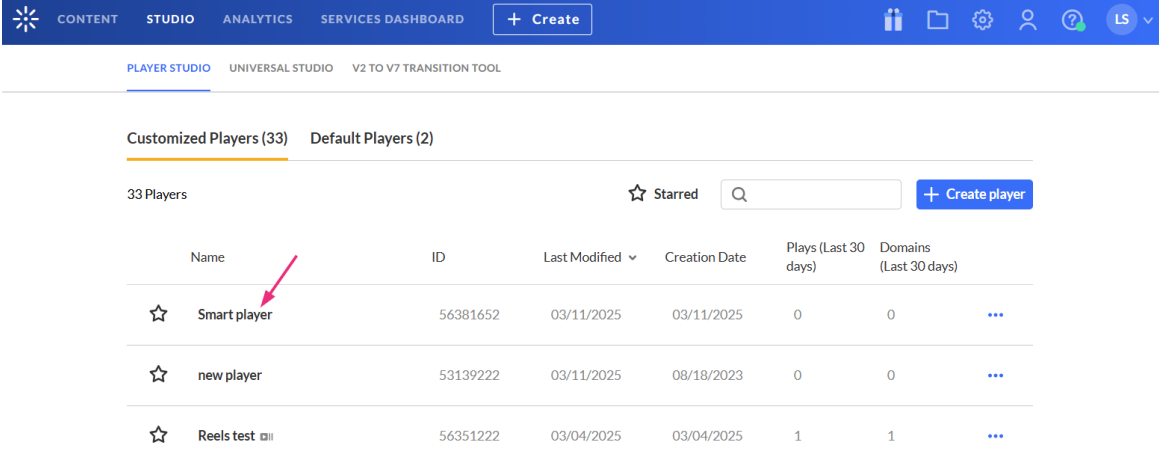

The [Player Studio](#) page displays.

- Click the player you want to edit from the list (or use the search bar in the top right).

If you haven't created a player yet, check out our article [Create a player](#) for guidance.

The screenshot shows the Kaltura Player Studio interface. At the top, there is a navigation bar with tabs for CONTENT, STUDIO, ANALYTICS, and SERVICES DASHBOARD, along with a '+ Create' button. Below the navigation bar, there are tabs for PLAYER STUDIO, UNIVERSAL STUDIO, and V2 TO V7 TRANSITION TOOL. The main content area displays 'Customized Players (33)' and 'Default Players (2)'. A search bar and a '+ Create player' button are visible. A table lists the players:

Name	ID	Last Modified	Creation Date	Plays (Last 30 days)	Domains (Last 30 days)	
☆ Smart player	56381652	03/11/2025	03/11/2025	0	0	...
☆ new player	53139222	03/11/2025	08/18/2023	0	0	...
☆ Reels test	56351222	03/04/2025	03/04/2025	1	1	...

The [player settings](#) display.

The screenshot shows the Kaltura player settings interface for a video titled 'Test'. The interface is split into two main sections: a settings sidebar on the left and a video player on the right. The settings sidebar includes sections for Playback Options, Accessibility & Language, and Navigation & Discovery. The video player shows a man in a lab coat standing behind a table with various glassware and a whiteboard that says 'Strategy'.

Set 360 & VR

- Scroll down to the **Engagement & Interactivity** section, find **360 & VR** and click the toggle to open the settings.

360 & VR

Toggle Stereo ?

Start In Stereo Mode ?

Move Multiplier ?

Device Motion Multiplier ?

Camera Options

Camera frustum field of view ?

Camera frustum near plane ?

Camera frustum far plane ?

[Hide Advanced Settings](#)

2. Configure the following:

- **Toggle Stereo** - Choose whether to show the **Stereo Toggle** button (relevant only to mobile devices).
- **Start in Stereo Mode** - Choose whether to start the video in stereo mode.
- **Move Multiplier** - Define the sensitivity of the mouse and touch movement by specifying the move multiplier.
- **Device Motion Multiplier** - Define the sensitivity of the device motion.
- **Camera Options:**
 - **Camera frustum field of view** - type camera frustum field of view.
 - **Camera frustum near plane** - type camera frustum near plane.
 - **Camera frustum far plane** - type camera frustum far plane.

3. Click **Save** at the top right of the settings page.

For the user guide, see [360 & VR](#).
