About

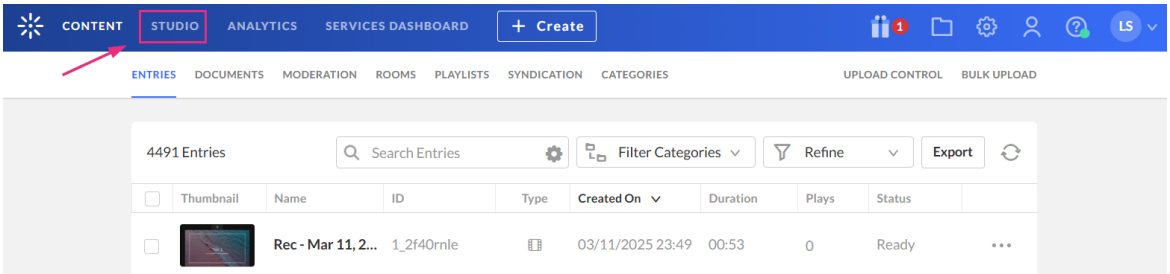

The **Related** plugin lets you add a related videos screen at the end of the video (and additionally when a video is paused) to attract users to watch additional videos. The plugin lets viewers browse and select related videos and use the **Next** button to play the next related video. This helps keep viewers engaged by guiding them to another relevant video, playlist, or curated list of entries, without requiring them to search or leave the player.

VOD

Access the player settings

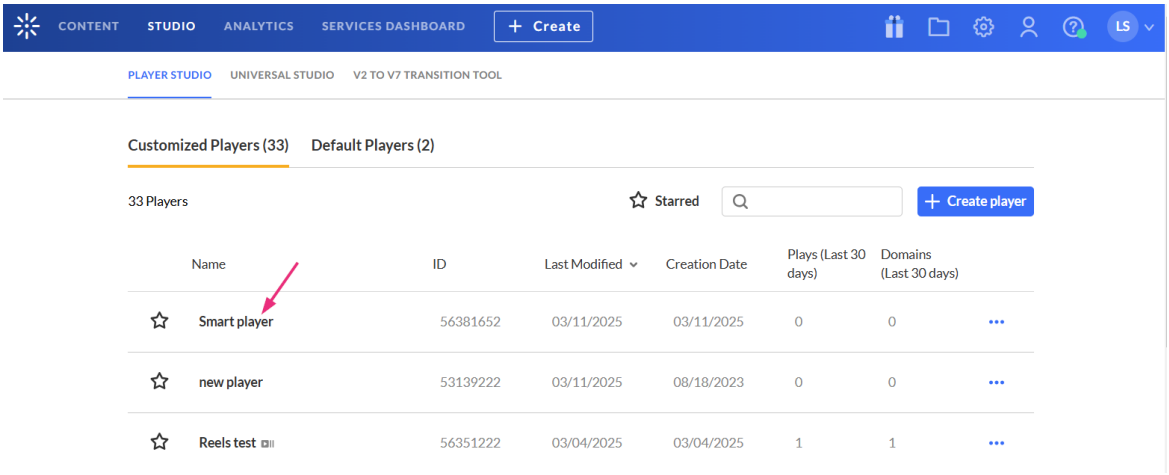

1. Log in to your Rich Media CMS and click the **Studio** tab.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

The Player Studio page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

If you haven't created a player yet, check out our article Create a player for guidance.

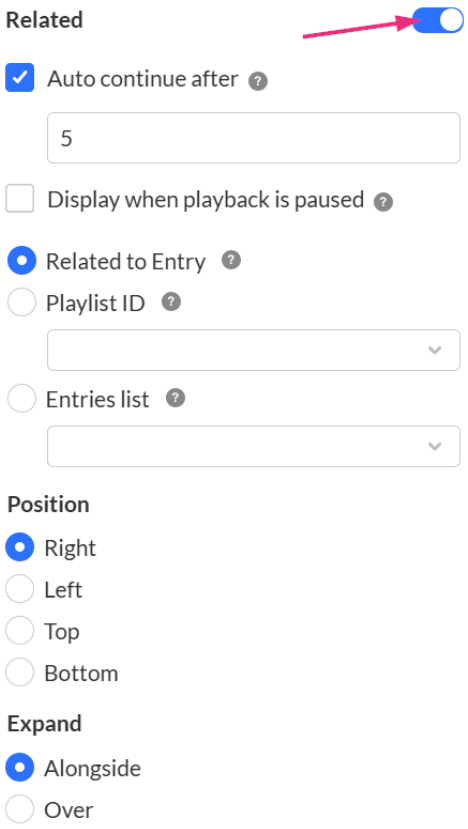

The player settings display.

Set related content to show

1. Scroll down to the **Navigation & discovery** section, find **Related** and click the toggle to open the settings.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

2. Configure the following:

- **Auto continue after** - Choose whether the next item plays automatically after the current video ends and enter the delay in seconds. This setting controls automatic playback. Viewers can also select **Next** to load and play the next related video manually.
- **Display when playback is paused** - Choose whether the related videos screen displays when playback is paused.
- **Related to Entry** - Entries related to the current entry will be displayed. If there are no related entries, the plugin is disabled.
- **Playlist ID** - Select the desired playlist.
- **Entries List** - Type a comma-delimited list of entries.

3. Click **Save** at the top right of the settings page.

For the user guide, see Related content plugin.
