

Enable linking to original video in the player

Last Modified on 01/18/2026 11:26 am IST

 This article is designated for administrators.

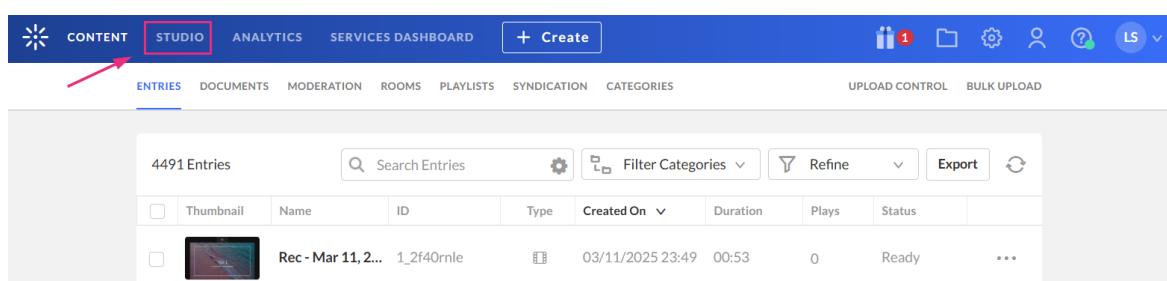

About

When enabled, this option adds a **Watch full video** button to clips, linking viewers to the original video.

Access the player settings

1. Log in to your KMC and click the **Studio** tab.

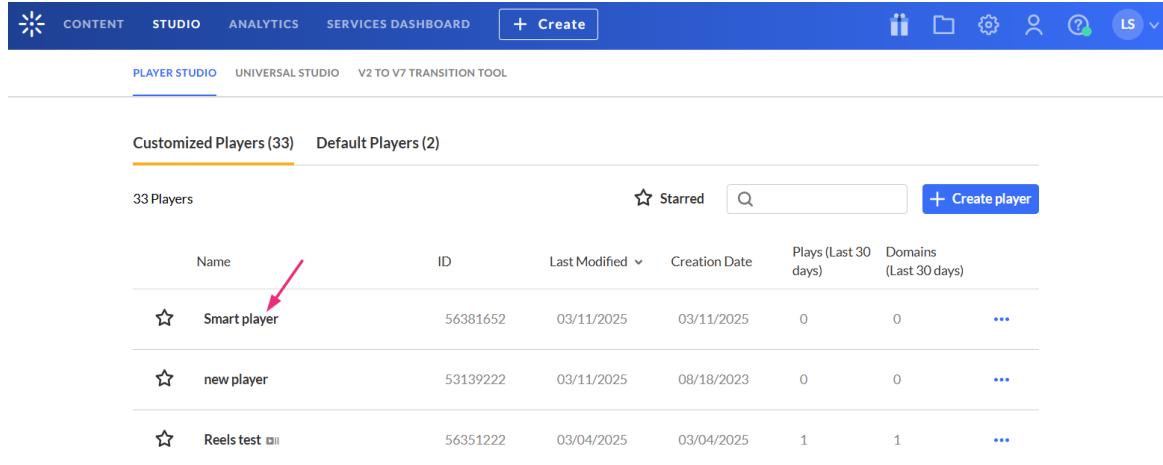

A screenshot of the Kaltura Management Center (KMC) interface. At the top, there is a navigation bar with tabs: CONTENT (highlighted with a red box and an arrow pointing to it), STUDIO (also highlighted with a red box), ANALYTICS, and SERVICES DASHBOARD. Below the tabs is a "Create" button. The main area is titled "STUDIO" and shows a list of "4491 Entries". There are various filters and search options at the top of the list. The list itself has columns for "Thumbnail", "Name", "ID", "Type", "Created On", "Duration", "Plays", and "Status". A specific entry is highlighted: "Rec - Mar 11, 2025" with ID "1_2f40rnle", created on 03/11/2025 at 23:49, duration 00:53, 0 plays, and status "Ready".

The [Player Studio](#) page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

If you haven't created a player yet, check out our article [Create a player](#) for guidance.

Set link to original video

1. Scroll down to the **Capabilities** section and find **Link to original video** and click the toggle to open the settings.

2. Configure the following:

- By default, the original entry opens in a new tab; uncheck **Open in new tab** to load it in the same player.

3. Click **Save** at the top right of the settings page.

For the user guide, see [Link to original video](#).
