About

You can control whether the player updates automatically to the latest version or stays on the current version.

Access the player settings

1. Log in to your KMC and click the **Studio** tab.

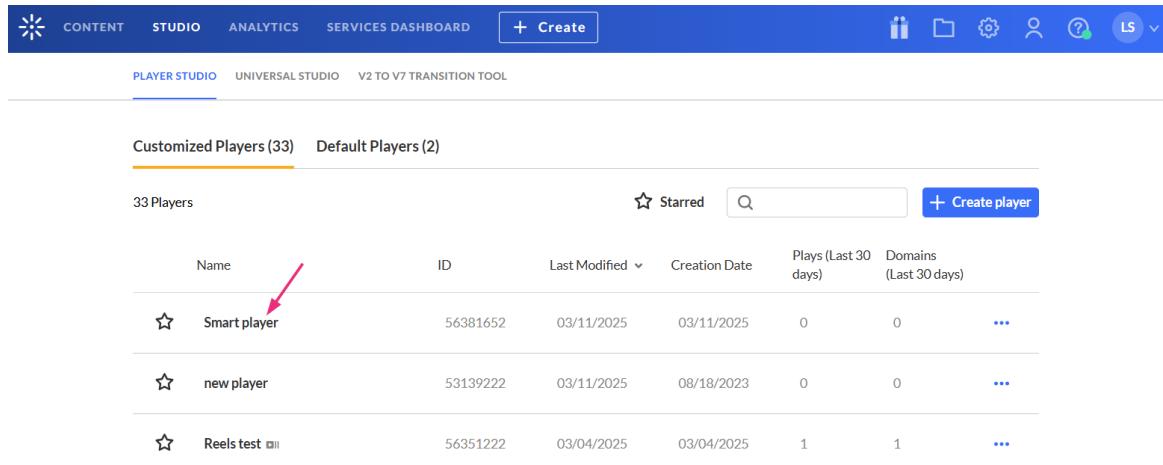

A screenshot of the Kaltura Management Center (KMC) Content page. The top navigation bar has tabs for CONTENT, STUDIO (which is highlighted with a red box and a red arrow pointing to it), ANALYTICS, and SERVICES DASHBOARD. Below the tabs is a search bar and a toolbar with icons for upload control and bulk upload. The main area shows a list of 4491 entries, with a table header for Thumbnail, Name, ID, Type, Created On, Duration, Plays, and Status. One entry is visible in the list: "Rec - Mar 11, 2025" with ID "1_2f40rnle".

The [Player Studio](#) page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

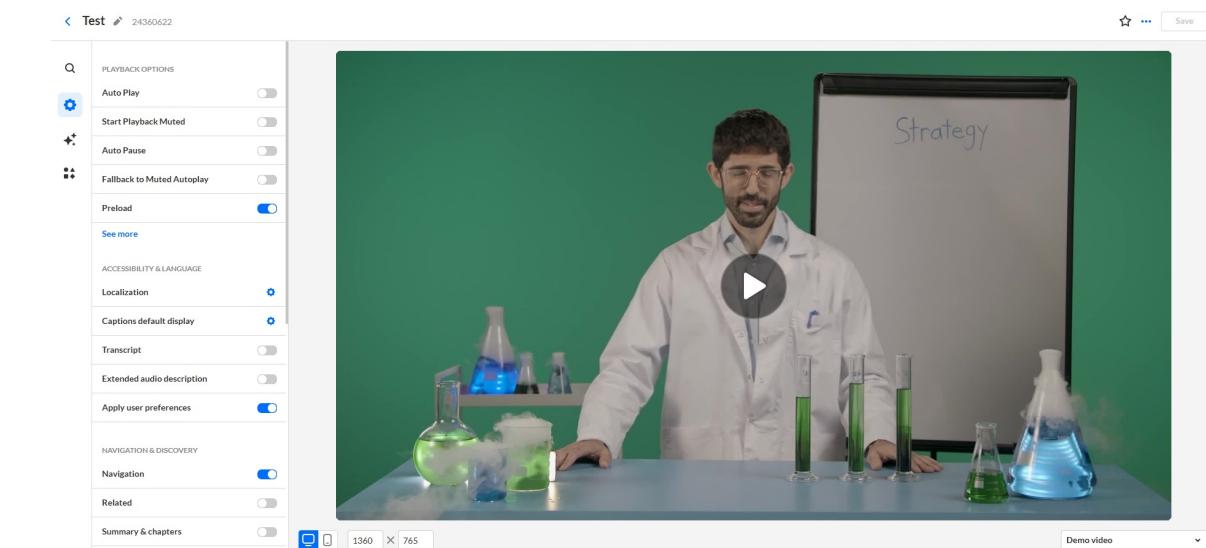

If you haven't created a player yet, check out our article [Create a player](#) for guidance.

A screenshot of the KMC Player Studio page. The top navigation bar has tabs for PLAYER STUDIO (which is highlighted with a blue underline), UNIVERSAL STUDIO, and V2 TO V7 TRANSITION TOOL. Below the tabs is a search bar and a toolbar with icons for upload control and bulk upload. The main area shows a list of players under the heading "Customized Players (33)". The list includes columns for Name, ID, Last Modified, Creation Date, Plays (Last 30 days), Domains (Last 30 days), and an ellipsis button. Three players are listed: "Smart player", "new player", and "Reels test". A red arrow points to the "Smart player" entry.

The [player settings](#) display.

A screenshot of the Kaltura player settings interface. On the left, a sidebar lists various settings sections: PLAYBACK OPTIONS (Auto Play, Start Playback Muted, Auto Pause, Fallback to Muted Autoplay, Preload), ACCESSIBILITY & LANGUAGE (Localization, Captions default display, Transcript, Extended audio description, Apply user preferences), and NAVIGATION & DISCOVERY (Navigation, Related, Summary & chapters). Each setting has a corresponding toggle switch. On the right, a video player window displays a video of a man in a lab coat standing behind a counter with various glassware containing colored liquids. The video player includes a play button, a preview image, and a "Demo video" dropdown. Below the video player, there are three buttons: VOD (black), AUDIO (green), and REELS (blue).

Set version control

1. In the **Playback options** section find **Stay on latest version** and click the toggle to enable the setting.

Stay on latest version

Updating the player to the latest version will uncheck the "Keep on Current Version [xx]" radio button in the Studio.

2. Click **Save** at the top right of the settings page.
