kaltura

Does Kaltura offer virus scanning for uploaded files?

Last Modified on 09/19/2025 3:09 pm IDT

Yes. Virus scanning is an optional feature that can be enabled for free. It scans uploaded media files, file attachments, document entries, and video uploads for viruses, malware, and other threats before they're processed. This helps protect your account and organization.

To enable this feature, contact your Kaltura representative.
