

# Launch Kaltura Webcast studio and copy studio link to share

Last Modified on 06/13/2026 12:16 am IDT

 This article is designated for all users.

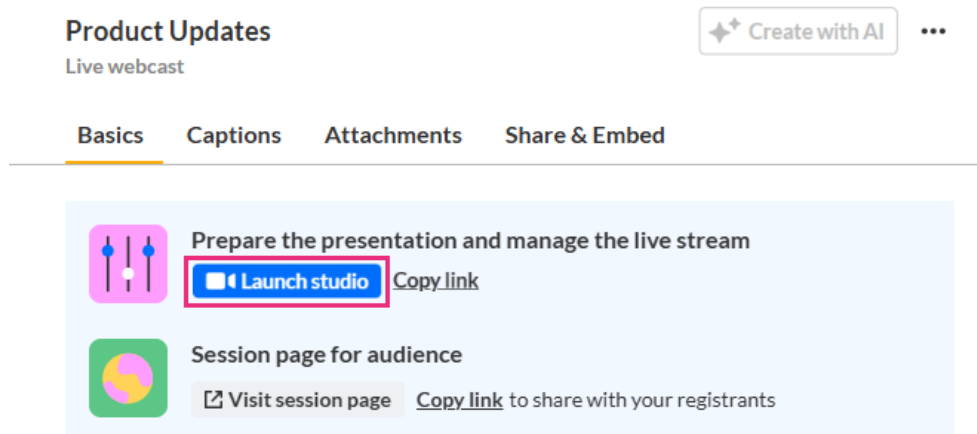

## About

This article guides you through how to launch your Kaltura Webcast Studio and share the studio link with others. You'll learn where to access the Studio from your event's settings, how to enter the room, and how to copy a private link so moderators and speakers can join you to prepare before going live.

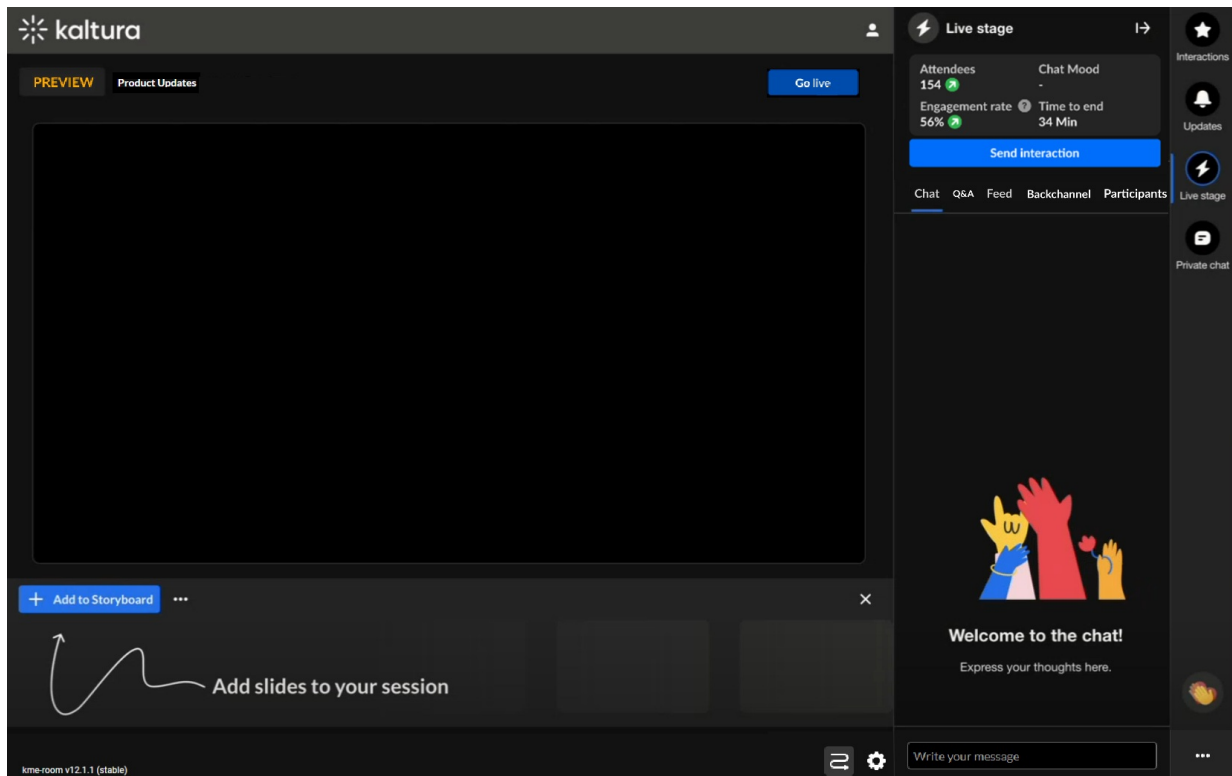

## Launch the Kaltura webcast studio

You may activate your broadcast studio, add slides and images to your live session, and start broadcasting directly from a Kaltura webcast studio (if the stream has already been initiated through the encoder tool).

1. Click on the **Basics** tab.
2. Click the **Launch studio** button.

The Kaltura webcast studio displays.

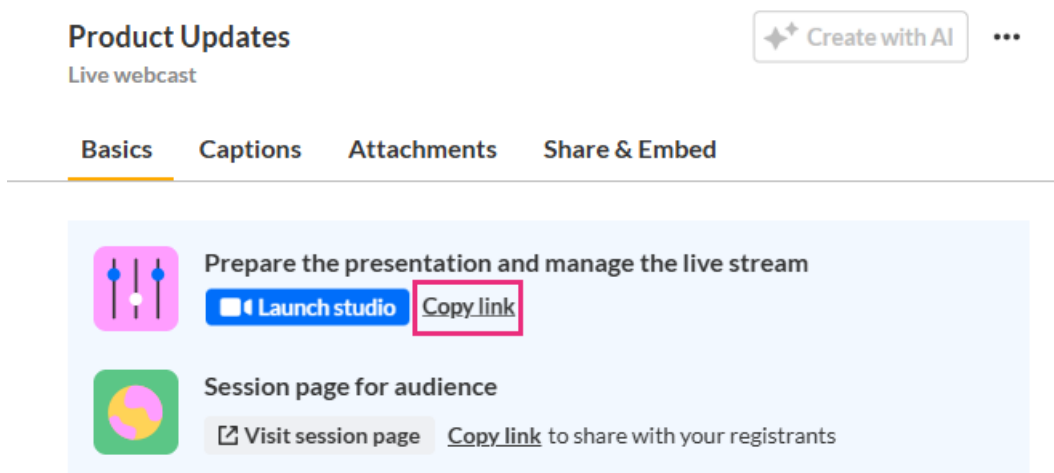

See the [Kaltura webcast studio](#) of the Kaltura Knowledge Center for complete information.

## Copy studio link to share with a moderator

Let the moderators access the webcast studio and begin preparing ahead of the broadcast.

1. Click on the **Basics** tab.
2. Click **Copy link**.

3. Share this link with the moderator.
