Assign resource location

Last Modified on 07/10/2026 11:21 pm IDT

This article is designated for all users.

About

Once you have a configured resource, it becomes available as a resource and appears in the live resource location list on the Basics tab in the session settings panel. You can then select it when creating a new webcast session to easily stream from that source.

Supported hardware encoders include Epiphan, Extron, Lumens, and Vizrt.

In single-session events, this selection is made via the **Resource locations** area of the **Overview** page.

In multi-session events, this selection is made via the **Basics tab** in the **session settings panel**.

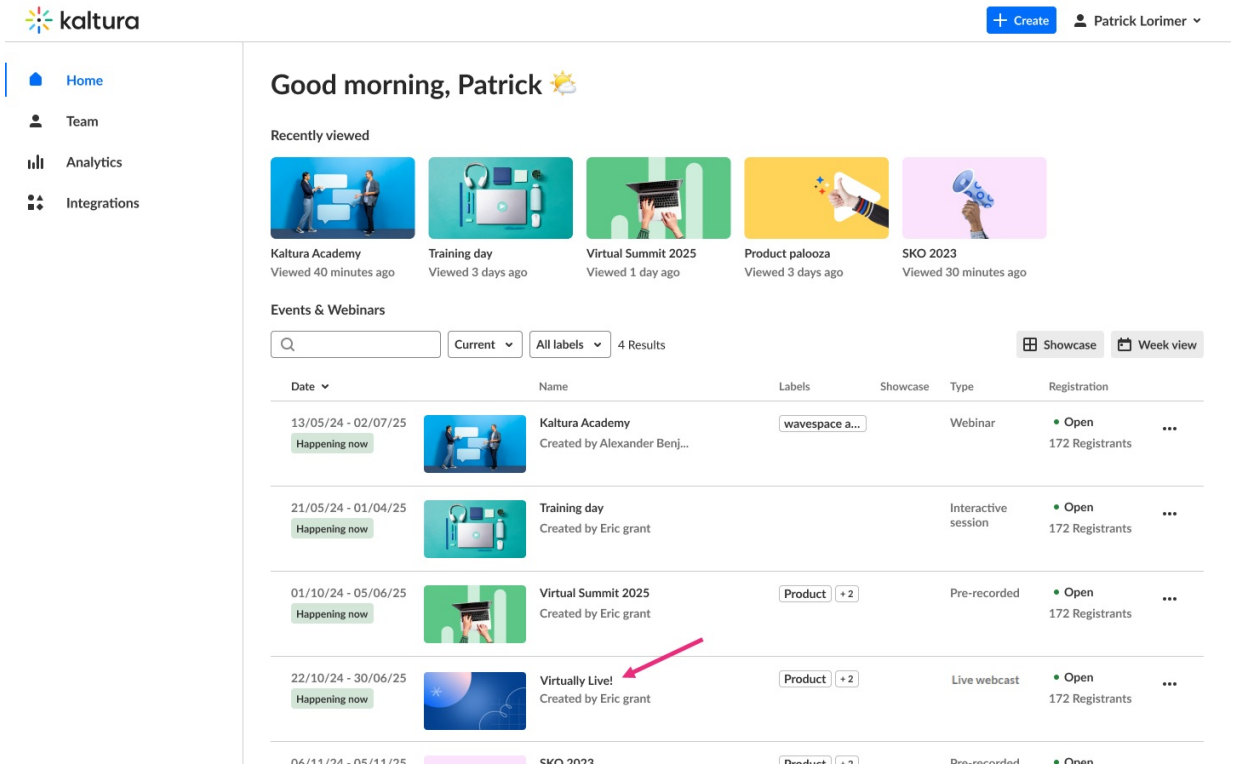

In order to configure resources, contact a Kaltura representative.

Single-session events

Access resource location

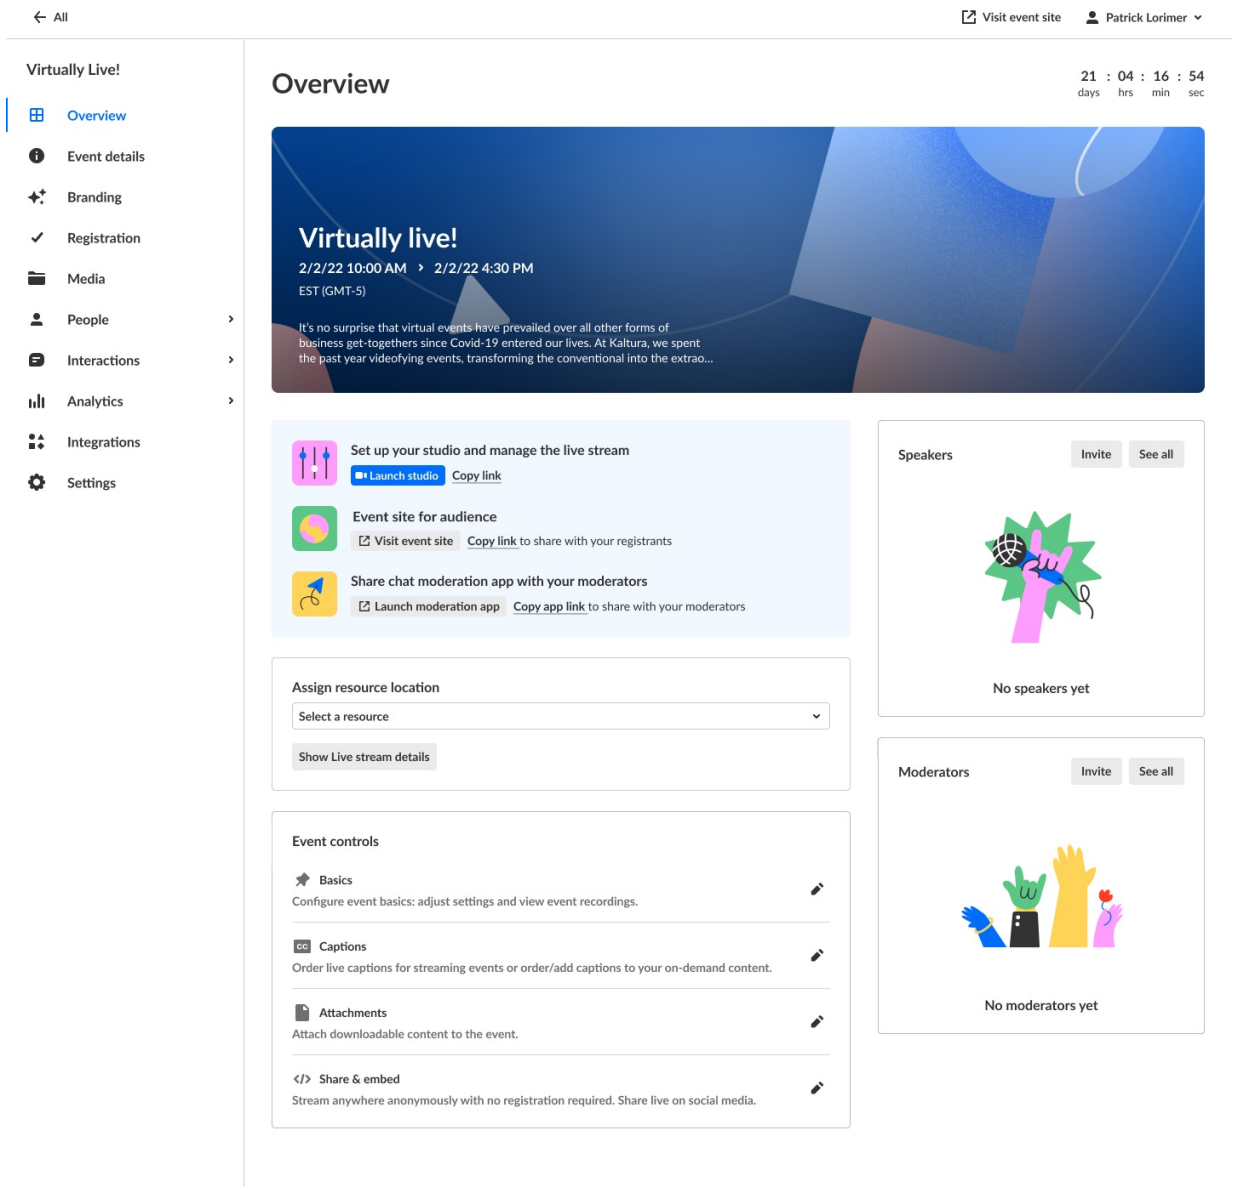

1. From the Events homepage, click the event you want to manage.

Multi-session events

Access session settings

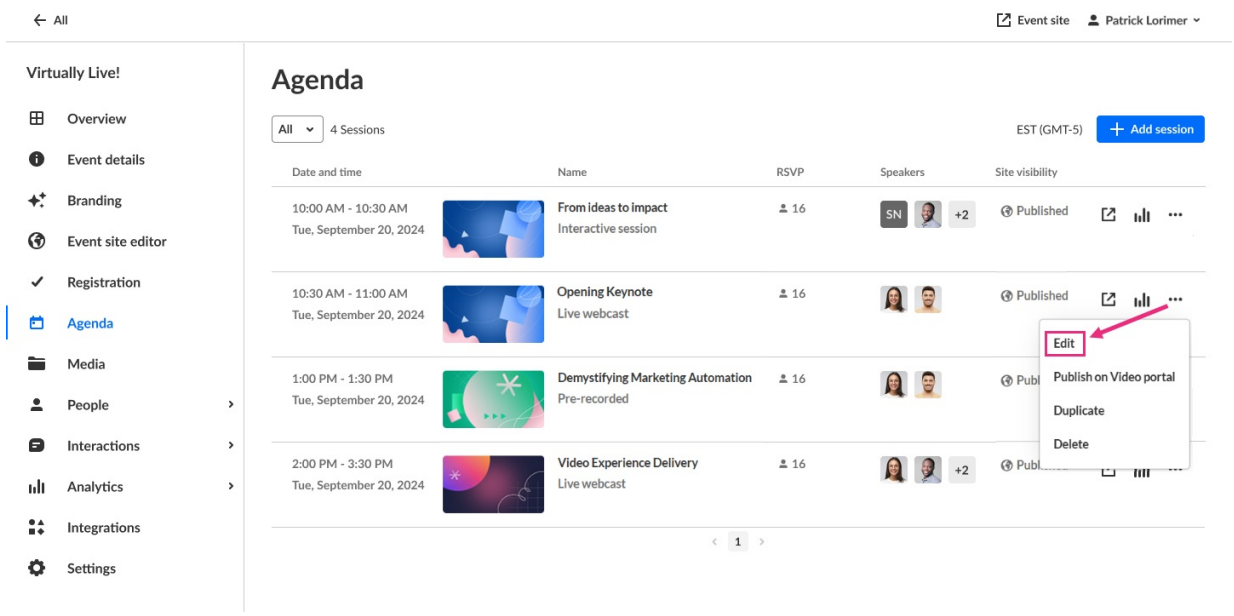

There are two ways to reach session settings:

- On the Overview page, in the **Agenda at a glance** section, click the **pencil icon** next to the session.

Assign resource location

1. Click on the Assign resource location pull-down list. A list of resources displays, along with their availability.

2. Click on the desired (available) resource. The resource displays as selected.

3. When you are finished making your edits, click **Save changes.**

To ensure a seamless webcast experience, please assign all required resources **at least 20 minutes** before your scheduled start time. This buffer helps maintain stream integrity and prevents any disruptions to your broadcast.
