

Obtain live stream details

Last Modified on 12/10/2025 12:14 am IST

 This article is designated for all users.

About

This article walks you through how to find and copy the live-stream details for your event in Kaltura. It shows exactly where in the event dashboard to locate the Primary and Backup stream URLs (and the stream name or ID) you'll need so that your encoder or broadcast software can connect. With these details in hand, you'll be ready to start streaming confidently and share the correct configuration with your production team.

1. Click **Show** on the desired protocol.

Live stream details

Copy the details below into your broadcast app to stream to this session
