 This article is designated for all users.

About

This article shows you how to embed your Kaltura video player on an external website.

Access session settings

There are two ways to reach session settings:

- On the Overview page, in the **Agenda at a glance** section, click the **pencil icon** next to the session.

The screenshot shows the Kaltura Overview page. On the left is a navigation sidebar with options: Overview (selected), Event details, Branding, Event site editor, Registration, Agenda, Media, People, Interactions, Analytics, Integrations, and Settings. The main content area is titled 'Overview' and shows a banner for 'Virtually live!' with the date '2/2/22 10:00 AM - 2/2/22 4:30 PM EST (GMT-5)'. Below the banner is the 'Agenda at a glance' section, which lists two sessions: 'From ideas to impact' (Interactive session, Published, 10:00 AM - 10:30 AM Tue, February 02) and 'Opening Keynote' (Live webcast, Published, 10:00 AM - 10:30 AM Tue, February 02). A red arrow points to the pencil icon (edit icon) next to the 'Opening Keynote' session. To the right of the agenda is the 'Speakers' section, which lists Julian Lang (Director of Marketing Strategy, Kaltura, Registered) and Celine Garnier (Content marketing specialist personalizat..., Registered).

- On the **Agenda** page, click the **three dots** to the right of the session and choose **Edit**.

The session settings open in a side panel with the **Basics** tab selected by default.

The screenshot shows the 'Opening Keynote' session settings side panel. The 'Basics' tab is selected, showing options to 'Launch studio' and 'Visit session page'. Below the settings is a video player interface with a play button and a large asterisk logo.

Embed the player

1. Open the **Share & embed** tab and click **Copy** to copy the embed code.
