

End or leave your Kaltura Room session

Last Modified on 10/28/2025 4:13 pm IST

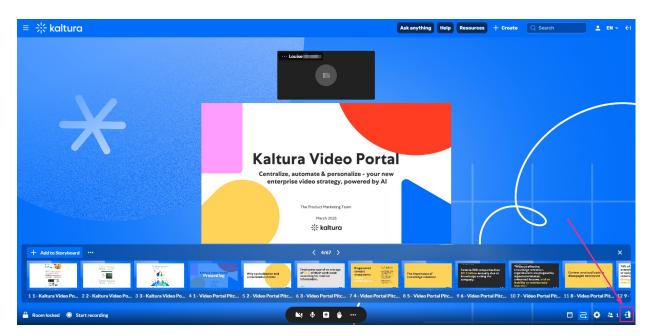

This article is designated for moderators and hosts

About

This article describes how moderators or hosts can leave or end a Kaltura Room session.

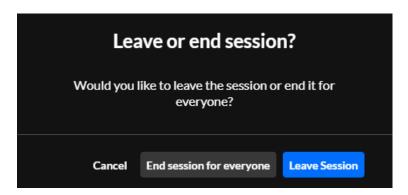

End or leave a session

At the lower right hand corner, click the **End Session** button (door icon).

A confirmation message displays with two options:

- Click **Leave session** to leave the room without ending the session.
- Click **End session for everyone** to end the session and remove everyone from the room.

Moderators and hosts can also leave the session by closing the browser tab or window.

You can restart the session at any time by re-entering the room.

By time out

If the session host leaves the room, an invisible timer starts. If the host doesn't return within 15 minutes, the session automatically ends for all participants. They're redirected to a screen informing them that the session has ended.
