This article is designated for administrators.

About

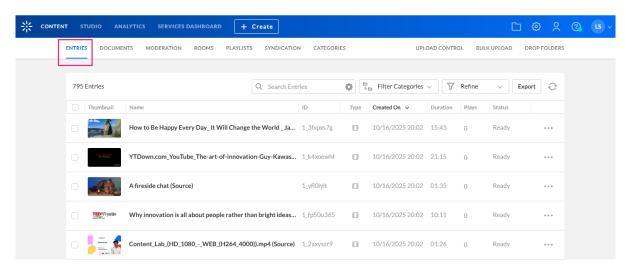

The **Access Control** tab on the entry details page lets you apply an existing access control profile to your media. Access control profiles define who can view your entry and may include restrictions such as geo-blocking, IP restrictions, authentication, or domain control.

For details about access control profiles, visit our article Create and assign an access control profile.

Assign a profile to an entry

1. Log into your Kaltura Management Console.

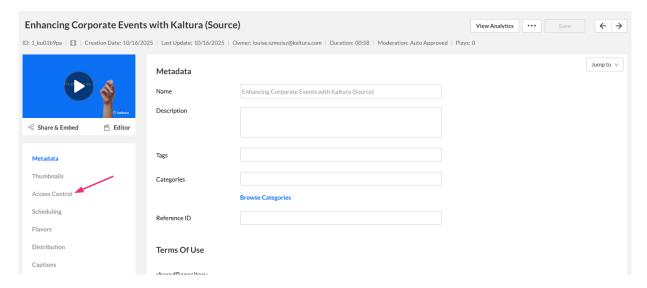

The **Entries** page displays by default.

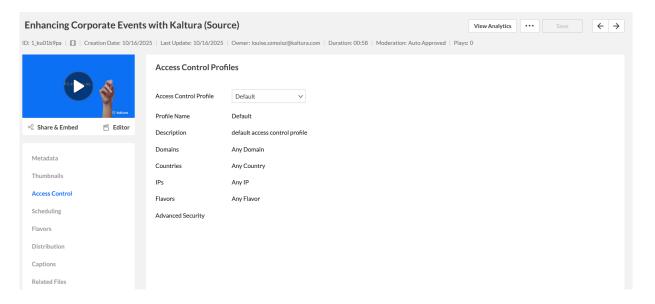

2. Click on the desired entry's title or thumbnail.

The **Metadata** page displays by default. In the left panel, select **Access Control**.

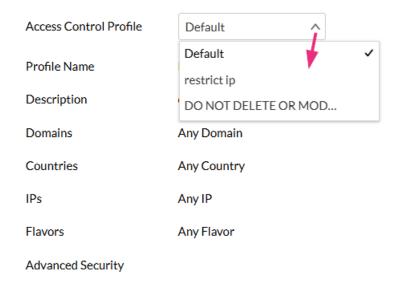

The Access Control tab displays.

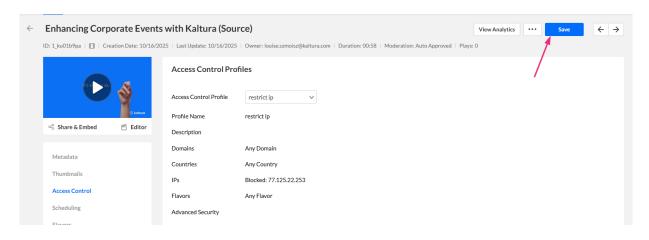

3. Select an existing profile from the drop-down menu.

Access Control Profiles

4. Click **Save** at the top right.

Assign a profile to multiple entries via bulk upload

Add the access control profile ID (as shown below) to the accessControlProfileId
in your CSV file or XML file.
