

Create and edit video clips in KMC

Last Modified on 11/15/2025 7:26 pm IST

 This article is designated for administrators.

About

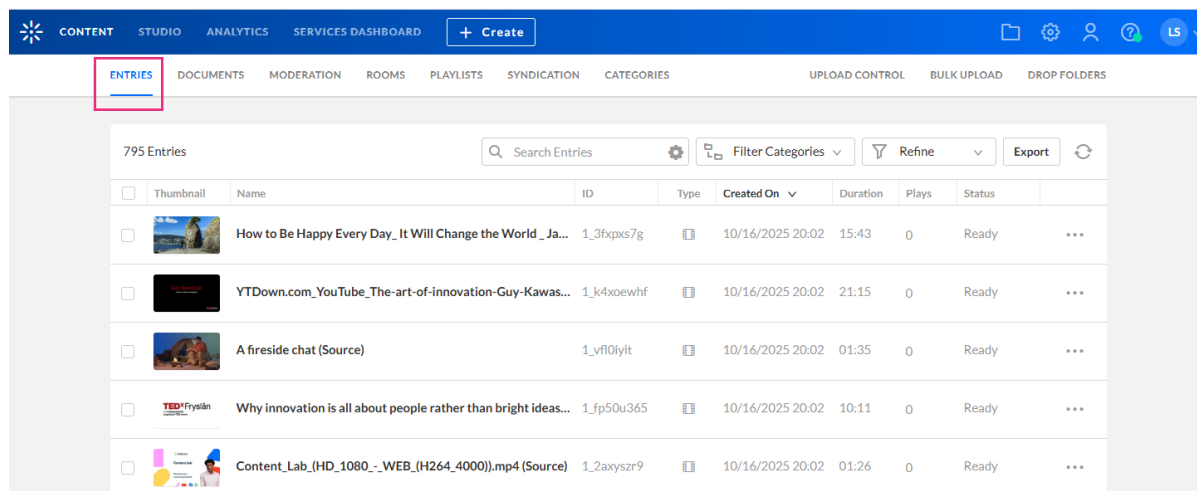

The **Clips** tab on the entry details page lets you create and manage clips from an existing media entry. A clip is a shorter segment of the original video or audio file. You can trim specific parts of your media to repurpose content without affecting the original entry.

Once you create a clip, it automatically appears as a new listed entry on the **Entries** page. All clips inherit the metadata and access control settings of the original entry. After creation, these settings can be edited independently.

Access the clips tab

1. Log into your Kaltura Management Console.

The **Entries** page displays by default.

2. Click on the desired entry's title or thumbnail.

The entry details page displays.

3. In the left panel, select **Clips**.

Create a clip

You can only trim and clip a live entry if it has a recorded entry.

1. Click **Click & Trim** to open the editing tools.

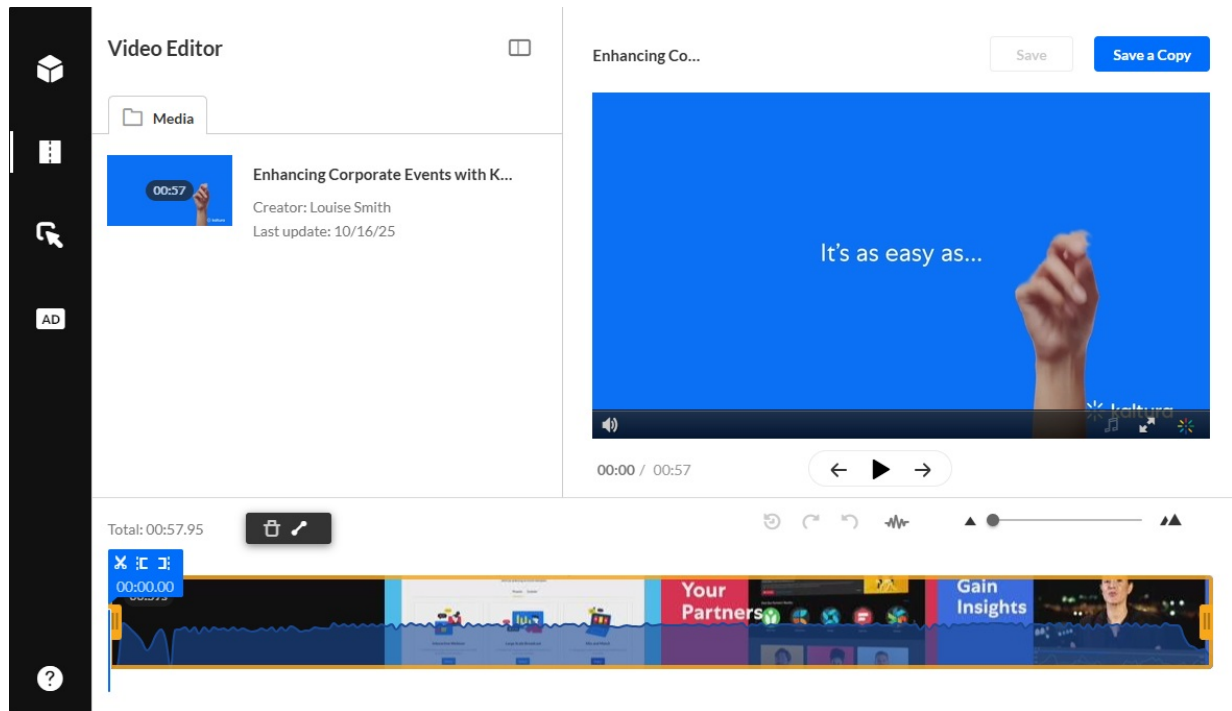

Clips

50 ▼

Clip & Trim

ID	Name	Plays	Created on	Offset	Duration	Status
1_6851z6we	Clip of AI and robotics	0	04/30/2024 18:07	00:07	00:08	Ready
1_r7e439cb	Clip 2 of AI and robotics	0	04/30/2024 18:08	00:15	00:14	Ready

The video editor opens.

2. Use the trimming tools to define the desired segment.
3. Click **Save**.

The new clip is created as a separate entry and listed both in the **Clips** tab and on the **Entries** page.

Visit our article [Kaltura Video Editing Tools - Editor Tab](#) to learn how to work with the video editor.

Manage existing clips

If clips were created from an original video or audio entry, they appear in two places:

- In the **Clips** tab of the original entry, where you can view all clips associated with it.
- As separate entries on the **Entries** page, where you can manage them just like any other entry.

From the clip's entry details page, you can also use the **three-dot menu** to perform actions such as Download, Share & Embed, Launch Editor, or Delete.

Additionally, you can manage clips from the Entries page using the same menu. For more details, see [View and manage entries](#).
