About

A rule-based playlist is a dynamic collection that updates automatically based on defined criteria. Use this type to display content such as recently added videos, most played entries, or content from specific categories.

 Rule-based playlists can only be created and managed in the Rich Media CMS. They are not supported in Content Hubs, legacy Video Portal or LMS Extensions.

Create a rule-based playlist

1. Log into your Rich Media CMS.
2. Click the **Playlists** tab at the top of the page.

The Playlists page displays.

3. Click **Add Playlist**.

Add Playlist	Name	ID	Playlist Type	Created On
