About

This article explains how to remove or hide channels from the top navigation bar in Legacy Video Portal. Removing a channel deletes its menu item without deleting the channel itself. Hiding a channel keeps the menu item but shows it only to specific groups.

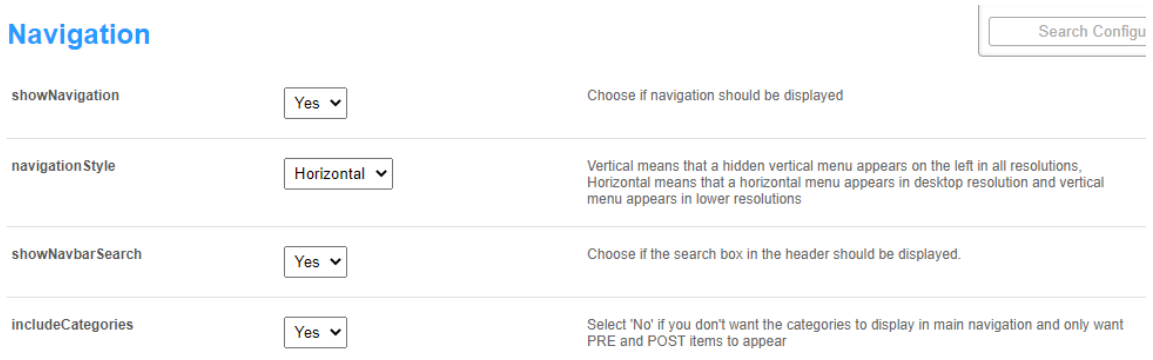

You manage all navigation settings from the Configuration Management console, inside the [Navigation module](#).

Remove a channel

1. Go to your Configuration Management console, and click the **Navigation** module. You can also navigate directly using a link: `https://{your_video_portal_URL}/admin/config/tab/navigation`.

The module page displays.

Navigation		Search Configu
showNavigation	Yes ▾	Choose if navigation should be displayed
navigationStyle	Horizontal ▾	Vertical means that a hidden vertical menu appears on the left in all resolutions, Horizontal means that a horizontal menu appears in desktop resolution and vertical menu appears in lower resolutions
showNavbarSearch	Yes ▾	Choose if the search box in the header should be displayed.
includeCategories	Yes ▾	Select 'No' if you don't want the categories to display in main navigation and only want PRE and POST items to appear

2. Scroll down and find the channel you want to remove.

3. Click **Delete** to the right of that item.

post

Add items to the end of the main menu, after the categories. MediaSpace displays the items in the order you define here.

1

name Enter the label for the menu item. The label is displayed in the main navigation bar.

type Select a menu item type to use in the navigation bar. Setting will change according to your selection.

channel

items

Add items that would be displayed in a drop-down menu

allowedGroups

Select groups to show this item to. Users who are not members of any of these groups will not see this link. Leave empty to show the item to all users.

4. Scroll to the bottom of the module page and click **Save**.

Removing the menu item doesn't delete the channel or its content - it only removes the navigation link.

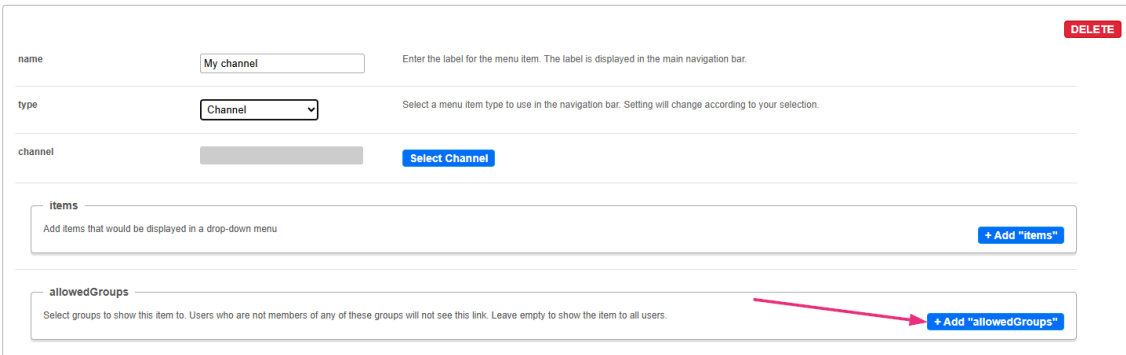

Limit visibility using 'allowed groups'

Use the 'allowed groups' setting when you want a channel to stay in the navigation bar but only be visible to specific users.

For information on groups, check out our article [What are user groups in Kaltura?](#)

1. Find the channel and click **+Add "allowedGroups"**.

name Enter the label for the menu item. The label is displayed in the main navigation bar.

type Select a menu item type to use in the navigation bar. Setting will change according to your selection.

channel

items

Add items that would be displayed in a drop-down menu

allowedGroups

Select groups to show this item to. Users who are not members of any of these groups will not see this link. Leave empty to show the item to all users.

An additional field opens.

2. Click **Select groups**.

allowedGroups
Select groups to show this item to. Users who are not members of any of these groups will not see this link. Leave empty to show the item to all users.

Group

3. Type in the groups that should see it, then click **Submit**.

allowedGroups
Select groups to show this item to. Users who are not members of any of these groups will

Group

Select Groups

Enter group name

Enter Group id or name

The group displays in the **Group** field.

Group

4. Scroll to the bottom of the module page and click **Save**.

Users who are not members of any of the selected groups won't see the channel in their navigation bar.
