About

Single-video Genie adds an AI-powered chat panel to the player. Viewers can ask questions about the video and get contextual answers tied to the content they're watching.

`VOD`

Access the player settings
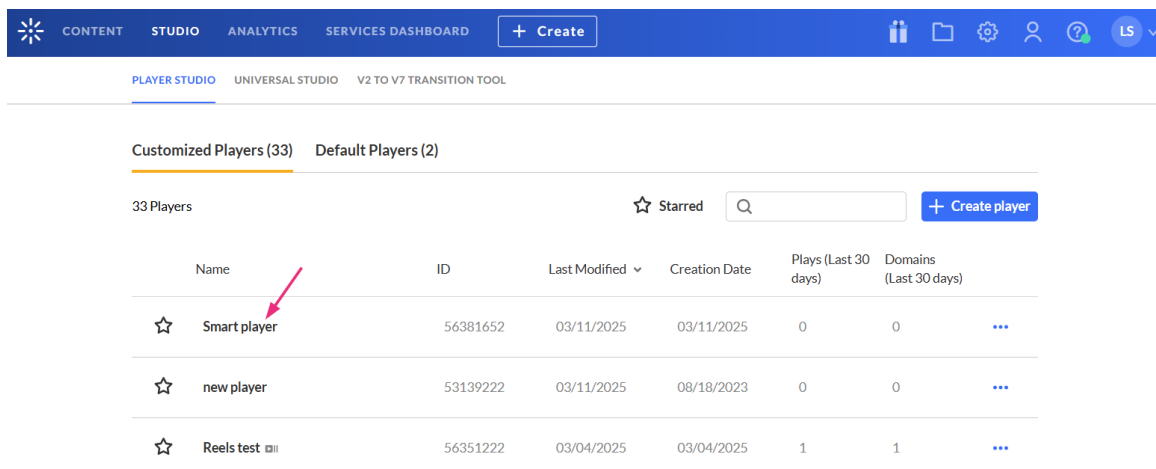

1. Log in to your KMC and click the **Studio** tab.

The Player Studio page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

![Kaltura logo]

The player settings display.

Enable Genie

1. Scroll down to **Navigation & Discovery**, locate **Genie** and turn on the toggle**.**

> ℹ️
>
> If Genie isn't enabled for your account, this toggle won't take effect. Contact your Kaltura representative to activate it.
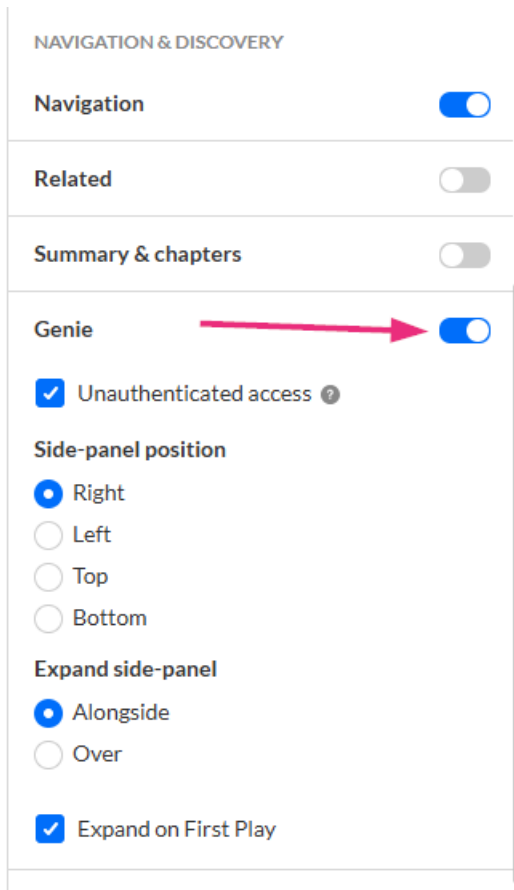

2. (Optional) Configure additional settings:

- **Unauthenticated access** (default = on) - Lets unauthenticated users access Genie for the video they're watching.
- **Side-panel position** - Choose where the Genie panel appears on the player: **right**, **left**, **top**, **bottom**
- **Expand side-panel** - Choose how the panel opens when Genie is triggered - **alongside** or **over**
- **Expand on first play** - If enabled, the Genie panel automatically opens the first time the video is played. Viewers can close it at any time.

3. Click **Save** at the top right of the page.

> ℹ️
> Genie also appears in secure embedded players as long as the embedded player has the Genie plugin enabled.

For the user guide, see Genie player plugin.
