

## Ask Genie questions about your video

Last Modified on 12/24/2025 10:43 am IST

### About

**Single-video Genie** lets you ask questions about the video you're watching and get answers based only on that video. Genie highlights key moments, provides short explanations, and may reference supported attachments when available.

Single-video Genie is available for videos with captions, including:

- VOD
- Audio
- Playlist videos
- Recordings of live sessions

If Genie doesn't appear, the video may not have captions, the feature may be turned off for your account, or you may not have the required permissions to access Genie.

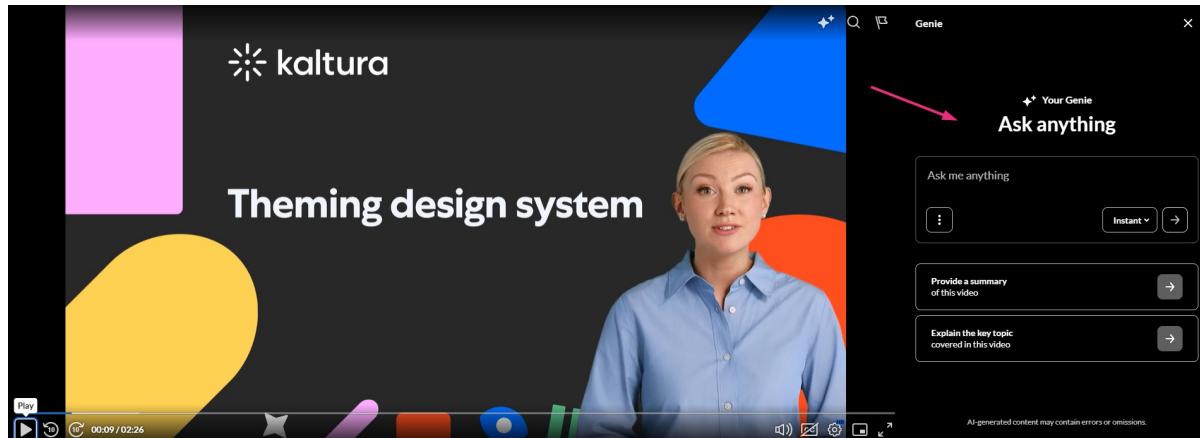

### Ask a question

1. Open a video.

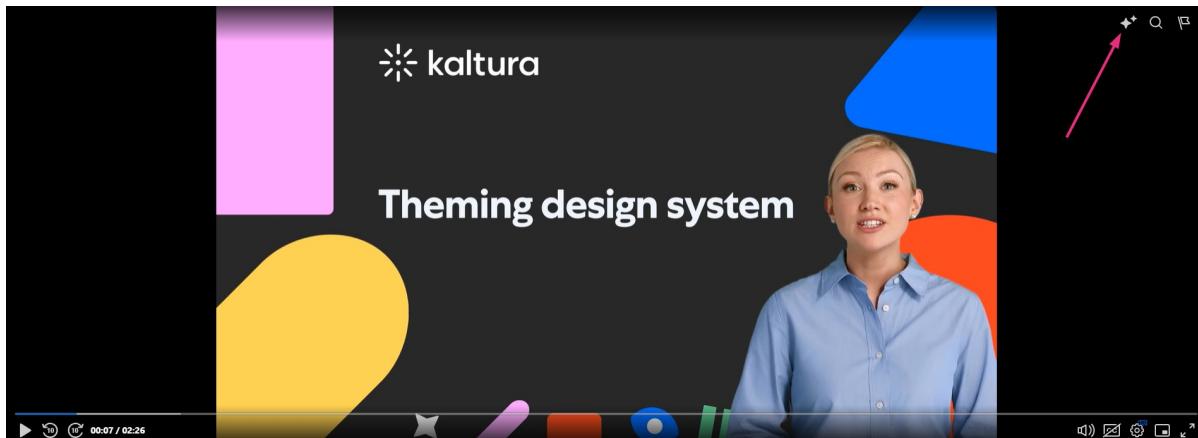

The video page loads with the Genie panel open.

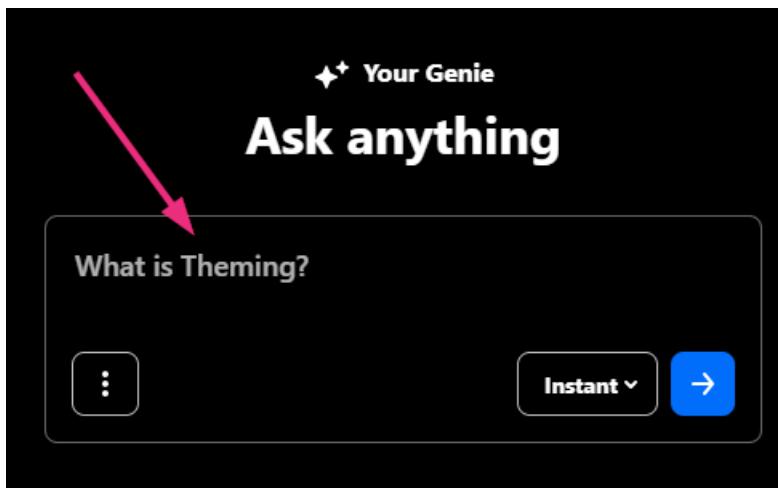

The panel may appear on the right, left, top, or bottom of the video, depending on how your admin set it up. In the example shown here, it appears on the right.

If the panel is closed, click the **Genie icon** (stars) in the top-right corner of the player to open it.

2. You can either type your own question into the **Ask anything** search field or choose one of the preset questions (see [below](#) for details).

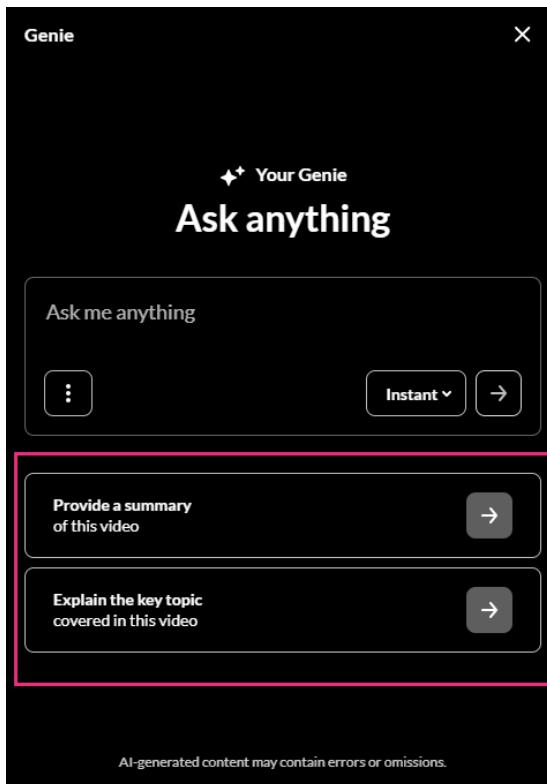

Use preset questions

Single-video Genie includes preset questions to help you get started quickly. You can use these to ask Genie to:

- Summarize the video
- Explain the main topic covered in the video

Selecting a preset question automatically runs the request.

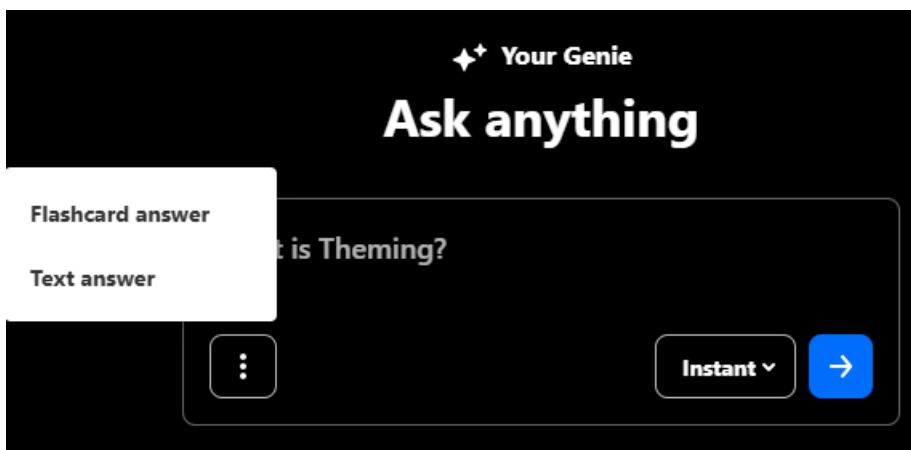

## Choose an answer format

To the left of the input field, you can select **Flashcard** or **Text**.

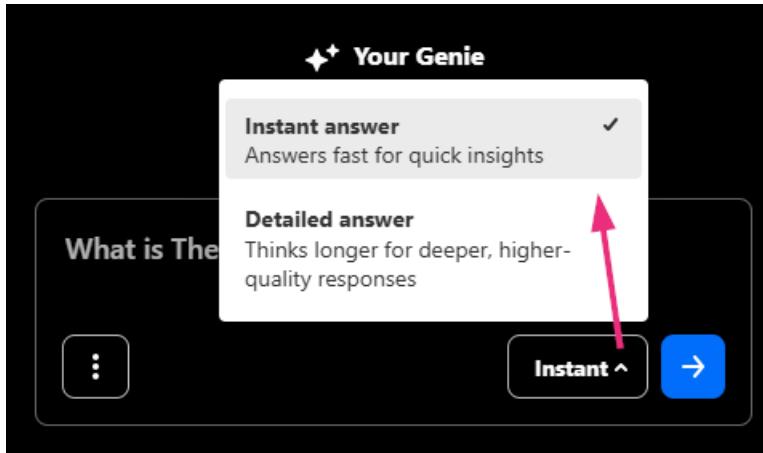

- **Flashcards** give you key takeaways, often with video clips
- **Text answers** give you full written explanation with summaries, steps, or lists

If you don't choose a format, Genie selects one based on your question.

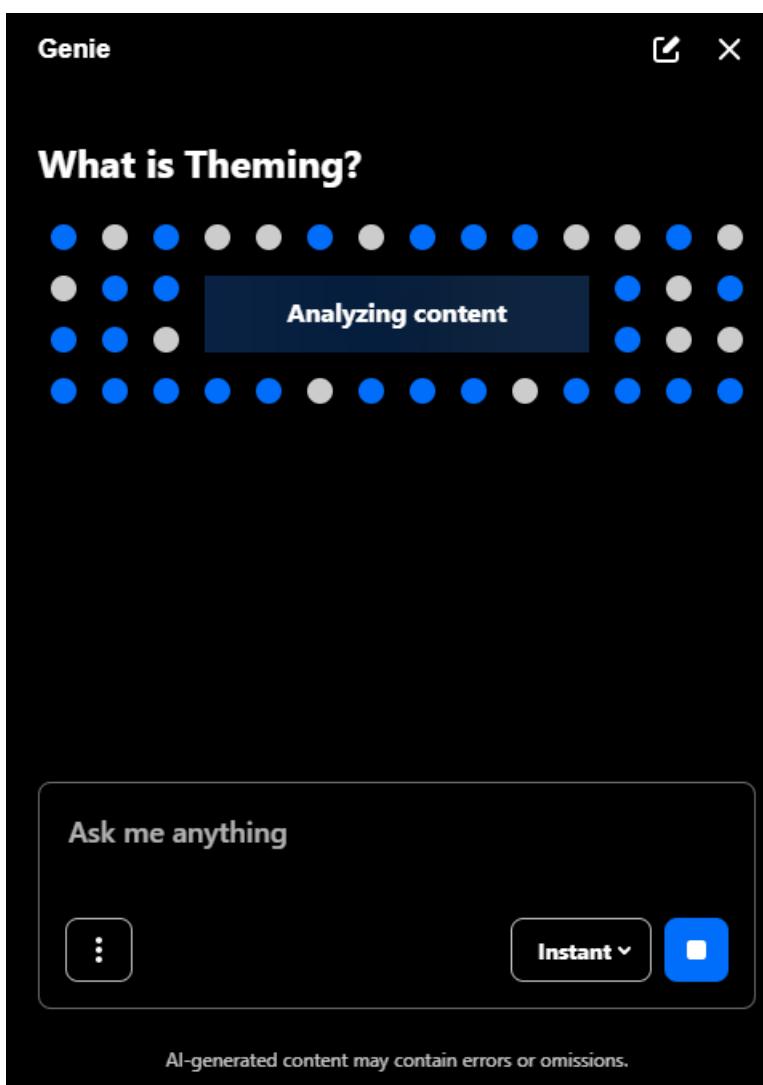

## Choose the answer mode

After typing in your question, you can choose the answer mode: **Instant answer** for a quick response, or **Detailed answer** for a deeper, higher-quality response.

- 3. When you're ready, click the **blue arrow button** or press **enter**.

Genie begins analyzing your question.

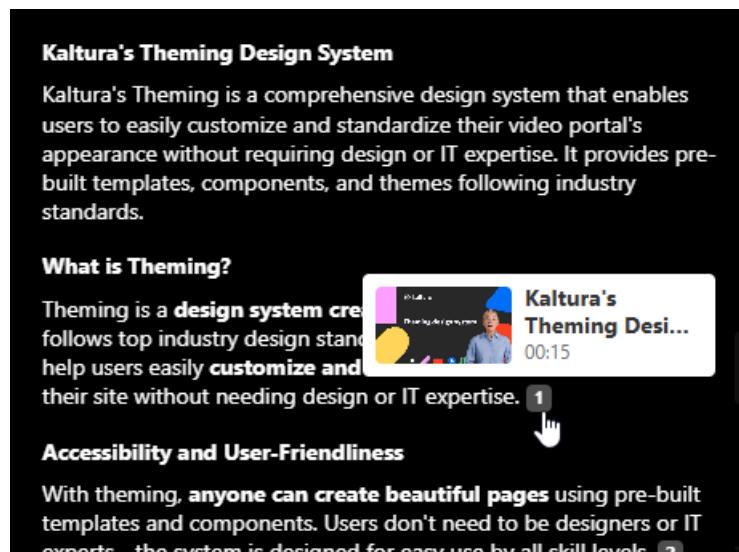

Cancel a request

To **cancel** while Genie is generating a response, click the **blue stop button** (square icon). You'll stay in the same thread and can immediately ask a new question.

## View your answer

After a few seconds, your answer appears as flashcards or text, depending on your question / selected format.

Timestamps appear as small numbered markers next to the text. Hovering over a marker shows a thumbnail preview of that moment in the video. Clicking it jumps directly to that point in the video.

**Kaltura's Theming Design System**  
Kaltura's Theming is a comprehensive design system that enables users to easily customize and standardize their video portal's appearance without requiring design or IT expertise. It provides pre-built templates, components, and themes following industry standards.

**What is Theming?**  
Theming is a **design system** created to help users easily **customize and** their site without needing design or IT expertise. 1

**Accessibility and User-Friendliness**  
With theming, **anyone can create beautiful pages** using pre-built templates and components. Users don't need to be designers or IT experts – the system is designed for easy use by all skill levels. 2

If Genie can't find an exact match, it will show: *I couldn't find an exact match for your request* and suggest related questions.

Want to learn more? See [Understand Genie's answers](#).

## Ask a follow-up question

Type your next question into the 'Ask me anything' field or select a suggested follow-up. Genie uses the previous response as context and adds the new answer below it.

## Start a new thread

In the top right corner of the Genie panel, the **new thread icon** (pencil in square) lets you start a fresh conversation. Click it to clear the current discussion and open a new 'Ask me anything' field.

## What is Theming?

**Kaltura's Theming Design System**

Kaltura's Theming is a comprehensive design system that enables users to easily customize and standardize their video portal's appearance without requiring design or IT expertise. It provides pre-built templates, components, and themes that follow industry standards while ensuring consistency, responsiveness, accessibility, and scalability.

**What is Theming?**

Theming is a **design system created by Kaltura's experts** that follows top industry design standards. It uses a set of themes to help users easily **customize and standardize the look and feel** of their site without needing design or IT expertise. 

**Ease of Use and Accessibility**

Theming allows **anyone to create beautiful pages** using pre-built templates and components. Users can **upgrade their video portal**

**Multilingual support** - Genie responds in the language you use to ask your question. If matching-language sources aren't available, Genie returns the most accurate results it can.

## Share an answer

You can share a specific Genie answer with others.

1. Scroll to the bottom of the answer.
2. Click **Share**.

Genie  

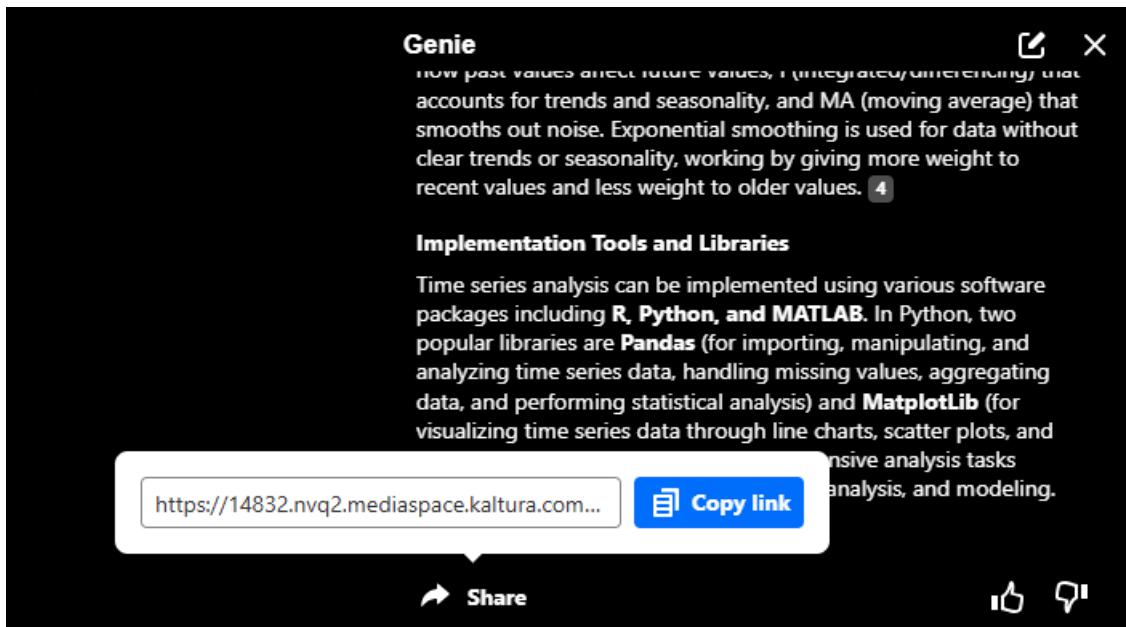

data, and performing statistical analysis) and **Matplotlib** (for visualizing time series data through line charts, scatter plots, and heat maps). These tools enable comprehensive analysis tasks including data cleaning, exploratory data analysis, and modeling. 

 **Share**  

### SOURCES

07:28 **What is Time Series Analysis**

3. Copy the link that appears and share it as needed.

The screenshot shows a Genie AI answer card. The title is "Genie". The content is: "How past values affect future values, including, but not limited to, accounts for trends and seasonality, and MA (moving average) that smooths out noise. Exponential smoothing is used for data without clear trends or seasonality, working by giving more weight to recent values and less weight to older values. 4". Below the content is a section titled "Implementation Tools and Libraries" with text about using R, Python, and MATLAB. A "Copy link" button is visible. At the bottom are "Share" and "Feedback" icons.

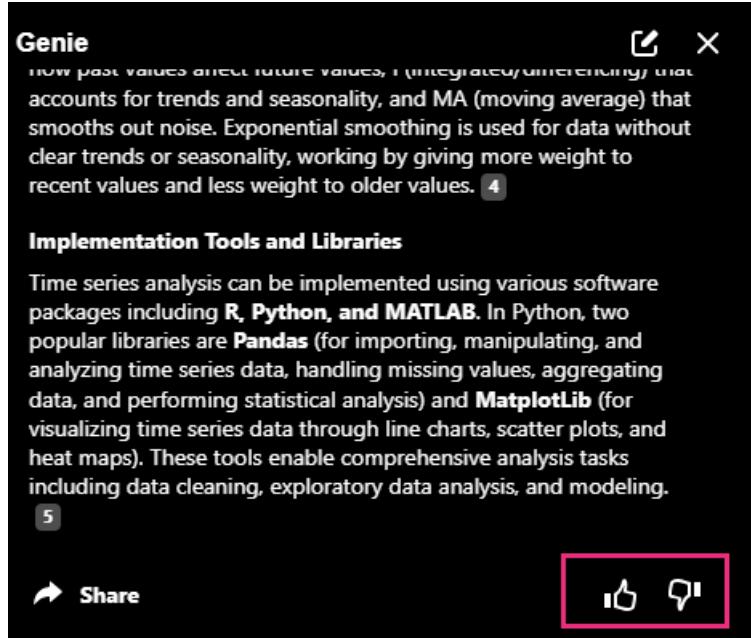

### Follow-up questions from a shared link

When someone asks a follow-up from a shared answer, the page updates automatically and the conversation continues seamlessly from that point.

### Provide feedback

Providing feedback on Genie's responses plays a crucial role in improving its accuracy and future recommendations. You can rate any answer using the **thumbs up** or **thumbs down** icons.

1. Click an icon.

The feedback window opens.
