Q&A transcripts report for events - Public Q&A enabled

Last Modified on 06/29/2026 11:17 am IDT

This article is designated for all users.

About

The Q&A transcripts report provides full transcripts of Q&A exchanges.

See Analytic reports for events for instructions on generating and downloading this report.

This report is available only when a **public** Q&A experience has been enabled for Chat and Collaboration.

Report contents

Data in the Q&A transcripts report includes the following:

- contextId - A unique ID of the context.
- contextName - The name of the context.
- commentId - A unique ID assigned to each question, answer, or comment.
- authorId - A unique ID for the user who created the Q&A entry.
- authorEmail - The email address associated with the Author ID.
- isAuthorStaff - A true or false (boolean) value indicated whether the author is an official event team member, such as moderator, speaker, or organizer.
- createdAt - The timestamp indicating when the Q&A entry was submitted.
- message - The full text content of the question, answer, or comment submitted by the user.
- upVoteCount - The total number of positive votes or likes received from participants.
- isDeleted - A true or false (boolean) value indicating whether the entry has been removed.
- repliedToCommentID -The unique ID of the question, answer, or comment that this entry is responding to. For top-level questions, this field is typically null.
