

Q&A activity report for events - Public Q&A enabled

Last Modified on 06/29/2026 11:16 am IDT

 This article is designated for all users.

About

The Q&A activity report provides information on moderator actions and Q&A message activity during the event.

See [Analytic reports for events](#) for instructions on generating and downloading this report.

This report is available only when a **public** Q&A experience has been enabled for Chat and Collaboration.

Report contents

Data in the Q&A activity report includes the following:

- **contextId** - A unique ID of the context.
- **contextName** - The name of the context.
- **commentId** - A unique ID assigned to each question, answer, or comment.
- **authorId** - A unique ID for the user who created the Q&A entry.
- **authorEmail** - The email address associated with the Author ID.
- **isAuthorStaff** - A true or false (boolean) value indicated whether the author is an official event team member, such as moderator, speaker, or organizer.
- **createdAt** - The timestamp indicating when the Q&A entry was submitted.
- **message** - The full text content of the question, answer, or comment submitted by the user.
- **upVoteCount** - The total number of positive votes or likes received from participants.
- **isDeleted** - A true or false (boolean) value indicating whether the entry has been removed.
- **repliedToCommentID** - The unique ID of the question, answer, or comment that this entry is responding to. For top-level questions, this field is typically null.

- **isMarkedAsCorrect** - A true or false (boolean) value indicating whether this specific entry has been marked as the correct or accepted answer.
 - **replyCount** - The total number of direct responses submitted to a specific question or comment.
 - **hasMarkedAsCorrectReply** - A true or false (boolean) value indicating whether the question has at least one reply marked as correct or accepted.
 - **firstModeratorThatReplied** - The name, ID, or email of the first event team member or moderator who posted a reply to the question.
 - **IsClosed** - A true or false (boolean) value indicating whether the Q&A entry is locked from further interaction.
 - **isPinned** - A true or false (boolean) value indicating whether the Q&A entry has been pinned by event staff so it remains highlighted or fixed at the top of the Q&A list.
-
