About

You can decide whether the audio controls are displayed inline in the player control bar or grouped under the settings menu. This flexibility helps you tailor the player interface to your design or accessibility needs.

Access the player settings

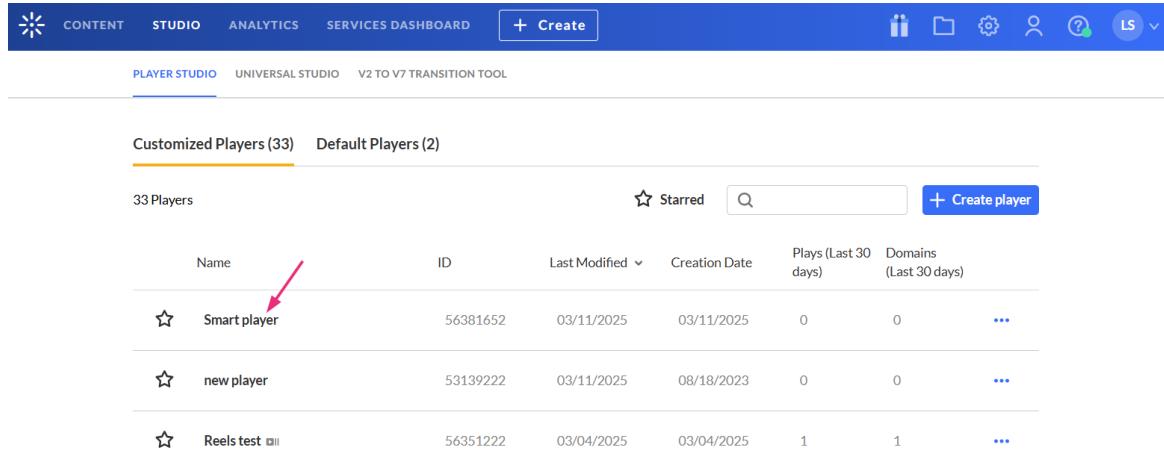

1. Log in to your KMC and click the **Studio** tab.

The [Player Studio](#) page displays.

2. Click the player you want to edit from the list (or use the search bar in the top right).

If you haven't created a player yet, check out our article [Create a player](#) for guidance.

The screenshot shows the Kaltura Player Studio interface. At the top, there are navigation tabs: CONTENT, STUDIO, ANALYTICS, and SERVICES DASHBOARD. Below them are buttons for '+ Create' and various user icons. The main area is titled 'PLAYER STUDIO' and shows two tabs: 'PLAYER STUDIO' (which is selected) and 'UNIVERSAL STUDIO'. Below these tabs, there are two sub-sections: 'Customized Players (33)' and 'Default Players (2)'. The 'Customized Players' section is currently active, displaying 33 entries. Each entry includes a star icon, the player name, ID, last modified date, creation date, plays (last 30 days), domains (last 30 days), and a 'More' (three dots) button. The 'Smart player' entry is highlighted with a pink arrow. At the bottom of the list, there is a search bar and a '+ Create player' button.

The [player settings](#) display.

The screenshot shows the Kaltura player settings interface for a video titled 'Test'. The video thumbnail shows a man in a lab coat standing behind a table with various glassware containing colored liquids. The left sidebar contains several sections with toggle switches: 'PLAYBACK OPTIONS' (Auto Play, Start Playback Muted, Auto Pause, Fallback to Muted Autoplay, Preload), 'ACCESSIBILITY & LANGUAGE' (Localization, Captions default display, Transcript, Extended audio description, Apply user preferences), and 'NAVIGATION & DISCOVERY' (Navigation, Related, Summary & chapters). A pink arrow points to the 'Audio' section in the sidebar. At the bottom of the sidebar, there are video controls and dimensions (1360 x 765). The top right corner has a 'Save' button.

Set audio control placement in the player

1. Scroll down to the **Accessibility & Language** section, find **Audio** and click the gear icon next to it to open the settings.

Audio

View options

Inline

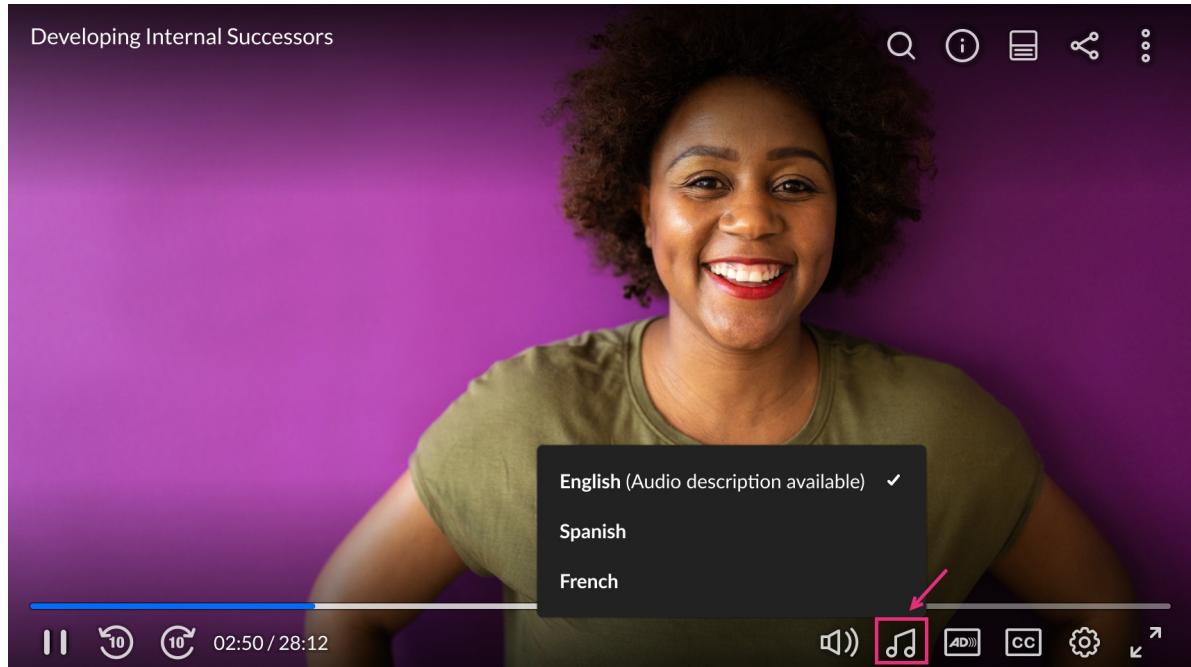

Settings based

2. Configure the following:

View options - Choose where the audio controls appear - either **inline** in the player control bar or grouped under the **settings** menu.

Inline in the player control bar (music icon):

Grouped under the settings menu:

3. Click **Save** at the top right of the settings page.
