

Brand your channel in Content Hubs

Last Modified on 05/02/2026 4:19 pm IDT

 This article is designated for all users.

About

Use the **Branding** tab to customize the top area of your channel page with a banner image, logo, and featured header media.

This feature requires the following to be enabled:

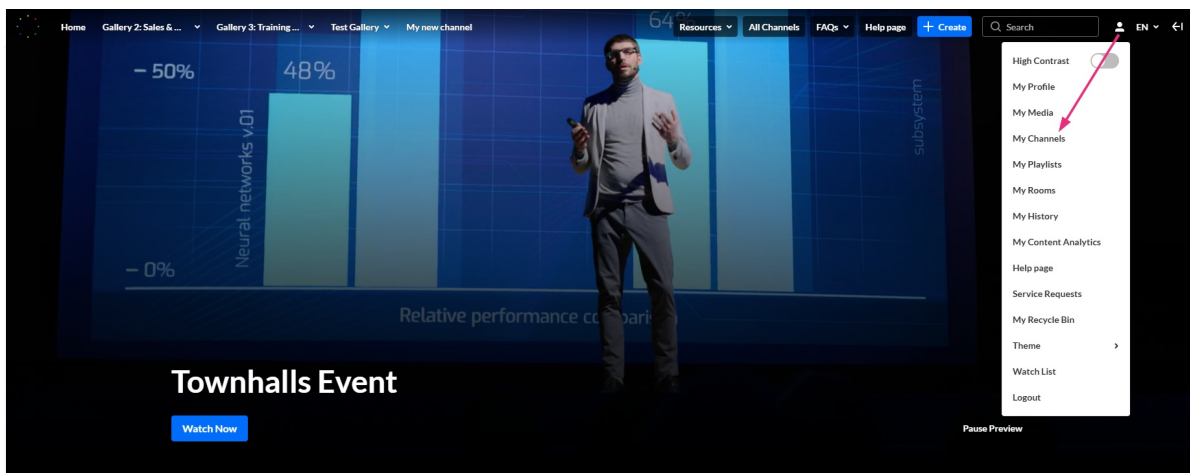

- [Channelthemingui module](#)
- [Theming module](#) with the 'channeledit' feature set to 'Yes'.

Who can use this

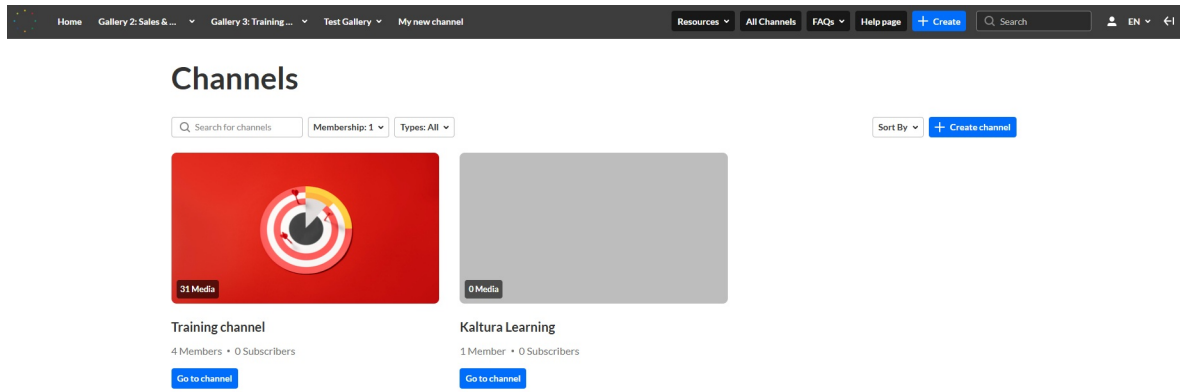

- Channel owners
- Channel managers

Access the Branding tab

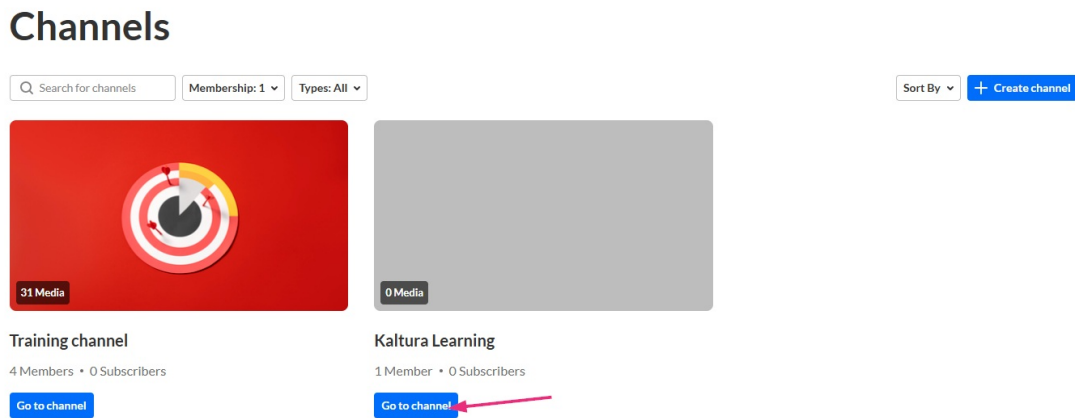

1. From the user menu, select **My Channels**.

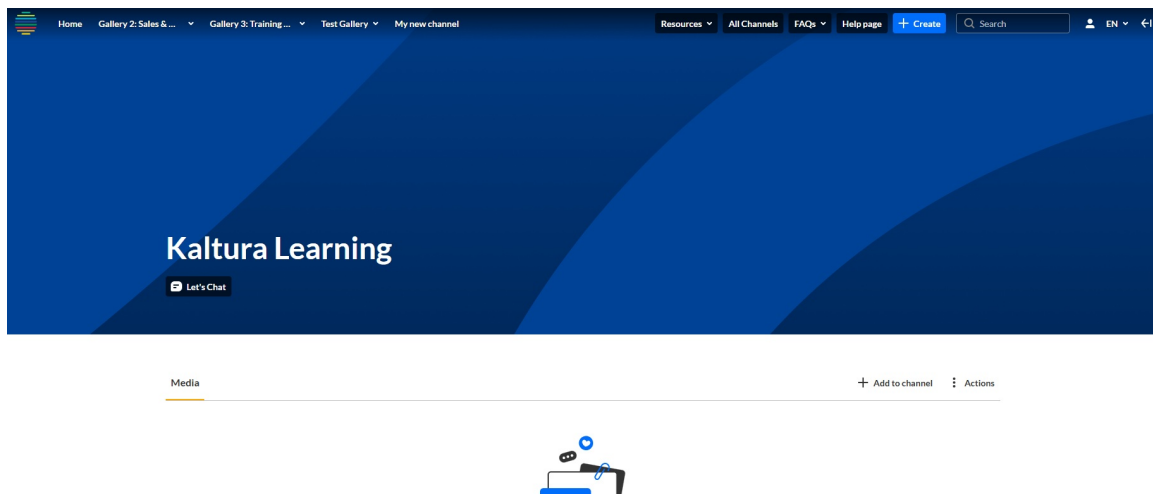

The **Channels** page displays.

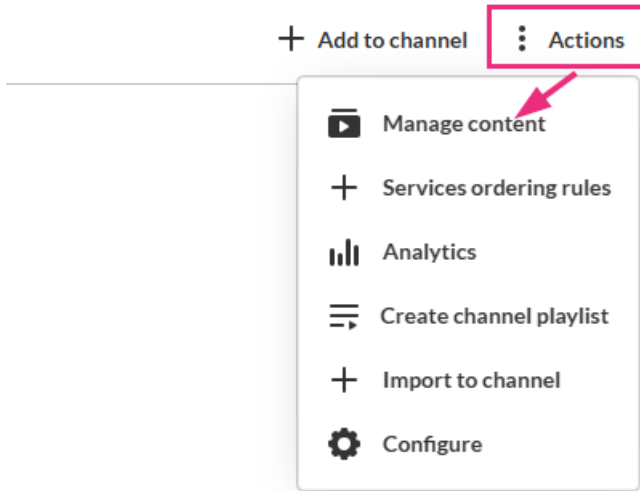

2. Find the channel you want to edit and click **Go to channel**.

The channel page opens.

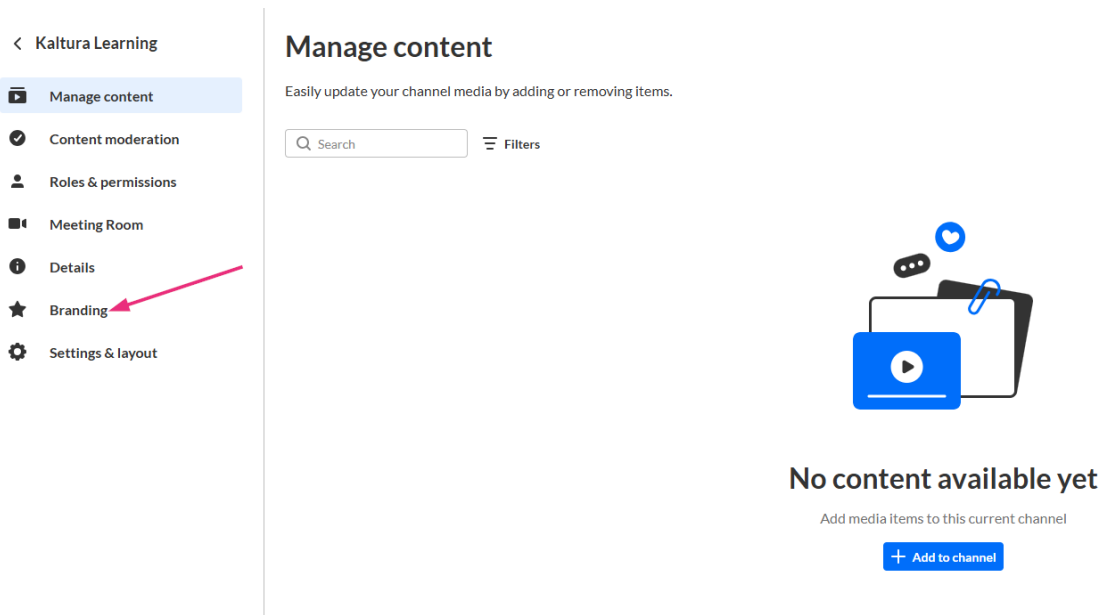

3. At the far right, click the **Actions** menu and select **Manage content**.

The 'Manage content' page opens.

4. In the left navigation panel, click **Branding**.

The branding settings display.

Settings & layout

Branding

Customize your channel appearance and branding.

Header banner

Set the channel's header background. Suggested image dimensions are 1920X1080px. Use images without text; text inside images may appear blurred on smaller screens.

Channel logo

Add a channel logo. Suggested image dimensions are 400x400px.

Header media

Select a video to display on the channel's header. You can also select an existing media from the "Manage content" tab.

Configure branding settings

Add or update the channel banner

1. In the **Header banner** section, click the image field.

Branding

Customize your channel appearance and branding.

Header banner

Set the channel's header background. Suggested image dimensions are 1920X1080px. Use images without text; text inside images may appear blurred on smaller screens.

2. Browse to and select the desired image from your device.
The image processes and displays when ready.

To remove the image or upload a new one, click **Edit thumbnail** and choose one of the actions.

Header banner

Set the channel's header background. Suggested image dimensions are 1920X1080px. Use images without text; text inside images may appear blurred on smaller screens.

Channel logo

Add a channel logo. Suggested image dimensions are 400x400px.

Upload new image

Remove

Your changes are saved automatically.

Good to know

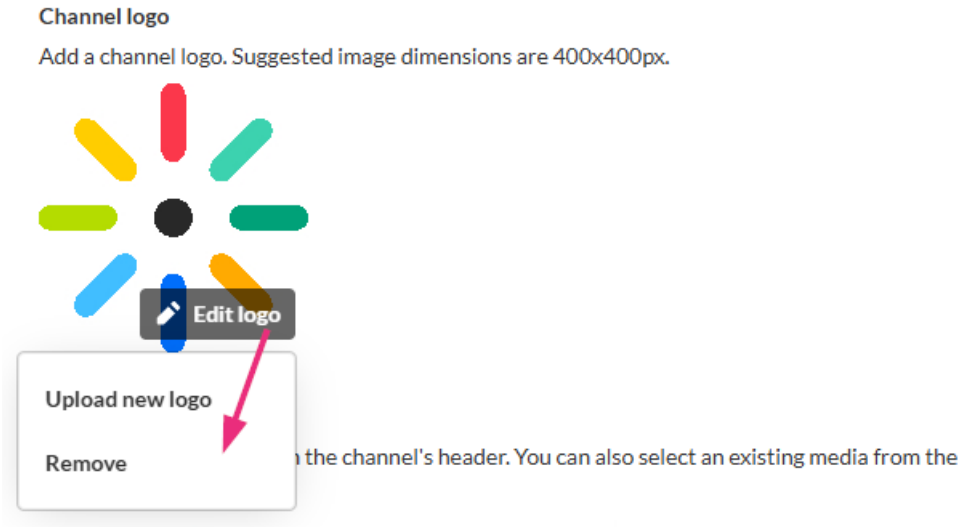

- The image is uploaded as-is, so choose a horizontal image that fits the banner space. If the image doesn't match the layout, parts of it may be cut off in the channel header.
- Banner images uploaded here aren't added to [My Media](#).
- Some channel types or configurations may not allow banner changes.

Add or update a channel logo

1. In the **Channel logo** section, click the logo image field.
2. Browse to and select the desired image from your device.

The image processes and displays when ready.

To remove the logo or upload a new one, click **Edit logo** and choose one of the actions.

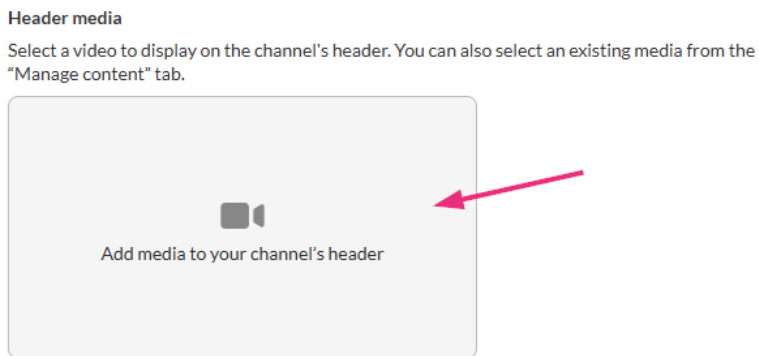

Your changes are saved automatically.

Set header media

Header media appears on the right side of the channel header and lets you feature a video. If a video is already set, you can remove or replace it here.

1. In the **Header media** section, click the media field.

2. Browse to a video file on your computer and upload it.

To remove the video or upload a new one, click **Edit video** and choose one of the actions.

Header media

Select a video to display on the channel's header. You can also select an existing media from the "Manage content" tab.

Your changes are saved automatically.

Things to know

- Only one media item can be used as header media at a time.
- To use existing media as header media, go to the **Manage content** tab.

What viewers see

After updating the branding settings, the channel displays a custom banner, logo, and featured header media at the top of the page.
