

Configure channel settings & layout - Theming

Last Modified on 02/06/2026 11:24 pm IST

 This article is designated for all users.

About

Use the **Settings & layout** tab to choose a channel layout and control which sections are visible to viewers.

The Settings & layout tab appears only if it's enabled by your admin.

The instructions below are for [Theming](#) users. If you don't have Theming enabled, please refer to our article [Edit a channel](#).

Who can use this

- Channel owners
- Channel managers

Access the Settings & layout tab

1. From the user menu, select **My Channels**.

The **Channels** page displays.

Channels

2. Find the channel you want to edit and click **Go to channel** or the thumbnail.

Channels

The channel page opens.

3. At the far right, click the **Actions** menu and select **Configure**.

You must enable the Channel Theming UI module for 'Configure' to appear in the Actions menu.

The configure page opens on the **Details** tab by default with a left-hand navigation.

The screenshot below shows an example of the configure page. If 'channeledit' is set to 'Yes' in the Theming module, the page will appear as shown. If it is set to 'No', the page will look different.

4. In the left navigation panel, click **Settings & layout**.

- < Training channel
-  Manage content
-  Content moderation
-  Roles & permissions
-  Meeting Room
-  Details
-  Branding
-  Settings & layout

Details

Edit basic details for your channel.

The 'Settings & layout' page displays.

- < Training channel
-  Manage content
-  Content moderation
-  Roles & permissions
-  Meeting Room
-  Details
-  Branding
-  Settings & layout

Settings & layout

Customize your page layout, sections, and media display style.

Channel layout
Choose the layout of your channel.

Tabs view
 Vertical view

Header links
Add links to display on the channel header.

Add custom link

 Add custom link

Visible sections
Select which sections to show on the page. Note that empty sections will automatically be hidden.

Sessions

 Playlist

 Media

 About

Configure your channel using the steps below. Be sure to click **Save** at the top right when you finish.

Available options depend on your role and admin configuration.

Configure settings & layout

Channel layout

Use the **Channel layout** section to choose how content is organized on the channel page.

Available layouts include:

- **Tabs view** – Content is organized into tabs across the page
- **Vertical view** – Content is displayed in a single, scrollable layout

The layout currently in use is marked as **Active**.

In the image below, the channel is set to vertical view:

Good to know

- If the channel layout is fixed by your admin, layout options won't appear.

- Layout changes apply to the entire channel and affect how all sections are displayed to viewers.

Header links

Header links are custom links that give viewers quick access to related resources, such as external websites, documentation, or internal pages.

1. Click **Add custom link**.

Header links
Add links to display on the channel header.

Add custom link

Link label

Link url

Add custom link

Additional fields appear.

2. Enter the link label (the text users see).
3. Enter the link URL.

Header links
Add links to display on the channel header.

Add custom link

Link label

Link url

Add custom link

4. Repeat to add a second link if needed. You can add up to two custom links.

Viewers see the link in the channel header, as shown in the image below:

Visible sections

Use **Visible sections** to control which sections appear on the channel page. Select or clear the checkbox next to each section to show or hide it.

Visible sections

Select which sections to show on the page. Note that empty sections will automatically be hidden.

- Sessions
- Playlist
- Media
- About

Available sections include:

- **Sessions**
- **Genie** (if enabled on your site)
- **Playlist**
- **Media**
- **About** (displayed as **Learn more** on the channel page)

The image below shows the channel page with only the **Media** section visible, based on the selected section settings.

Media

+ Add to channel ⚙ Actions

Search in Media

Filters

new webinar

Good to know

- Sections with no content are automatically hidden.
- Hidden sections can be re-enabled at any time.

Note for Genie users: If Genie is enabled for your site, select 'Genie' in the **Visible sections** settings to display the 'Ask anything' experience. The way it displays on the channel page depends on the channel layout you choose (**Tabs view** or **Vertical view**).

For more information, see [Add Genie to specific channels](#).

Default section

Use **Default section** to choose which section loads first when users open the channel.

Default section

Select which section will load first on the page. Note that empty sections will automatically be replaced with the next available one.

Media

The available options are:

- **Media**
- **Sessions**

- **Playlist**
- **About** (displayed as **Learn more** on the channel page)
- **Genie** (if enabled on your site)

Good to know

- The default section must be a visible section (a section may not be visible if it's turned off, has no content, or isn't enabled on your site).
- If the selected section has no content, the channel opens to the next available section automatically.

Media view mode

Use **Media view mode** to choose how media items are displayed in the channel.

Media view mode

Select the channel view mode.

Available options include:

- **Grid** – Media items are shown in a tiled grid
- **Detailed** – Media items are shown with additional details

The active view mode is marked as **Active**.

The image below shows media items displayed in grid view:

learning and onboarding.

Search in Media

Media displayed in grid view

Playback in context

Use **Playback in context** to control where media plays when users select a video.

When enabled:

- Media that is published only to this channel always plays within the channel context
- Viewers stay on the channel page while watching the video

This setting applies only to media published exclusively to this channel. For more information about publishing, visit our article [Publish media in Video Portal](#).

Channel TV

Use **Channel TV** to enable a continuous playback experience for sessions in the channel. When enabled, sessions play sequentially in a Channel TV-style experience.

This applies only to sessions in the channel (availability depends on your site configuration). For more information, see our article [Channel TV agenda](#).
