

Edit channel settings & layout in Content Hubs

Last Modified on 05/02/2026 4:19 pm IDT

 This article is designated for all users.

About

Use the **Settings & layout** tab to choose a channel layout and control which sections are visible to viewers.

This feature requires the following to be enabled:

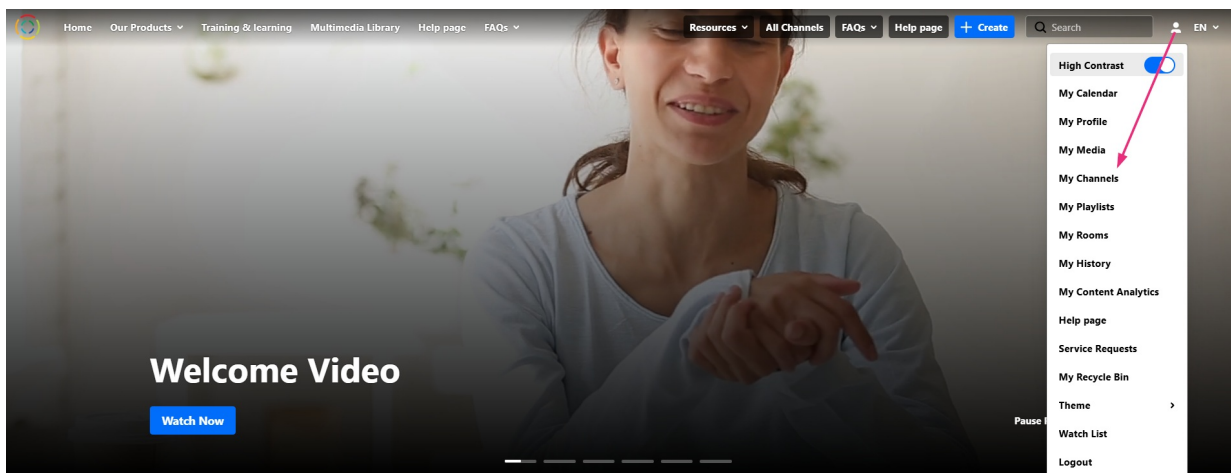

- [Channelthemingui module](#)
- [Theming module](#) with the 'channeledit' feature set to 'Yes'.

Who can use this

- Channel owners
- Channel managers

Access the Settings & layout tab

1. From the user menu, select **My Channels**.

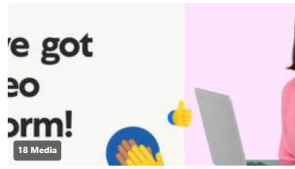

The **Channels** page displays.

Test room

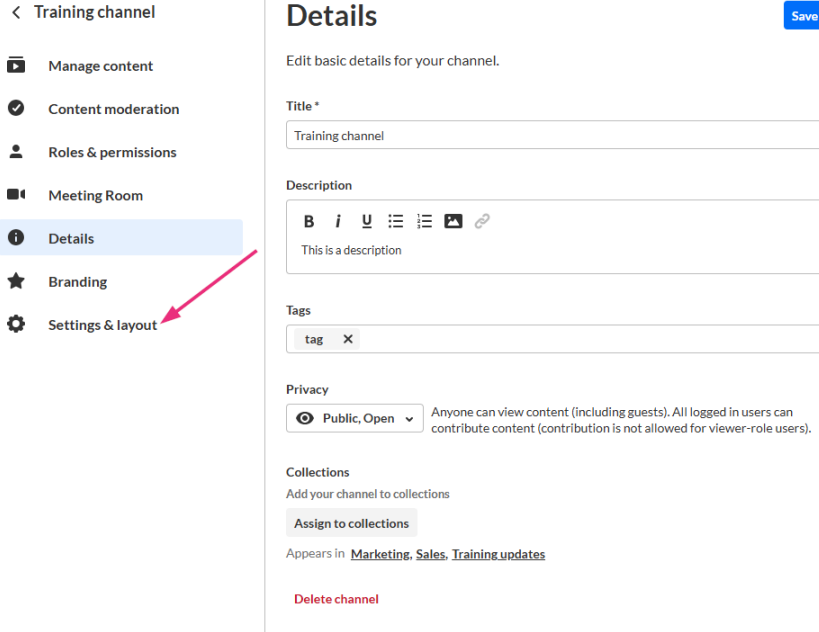

3. At the far right, click the **Actions** menu and select **Configure**.

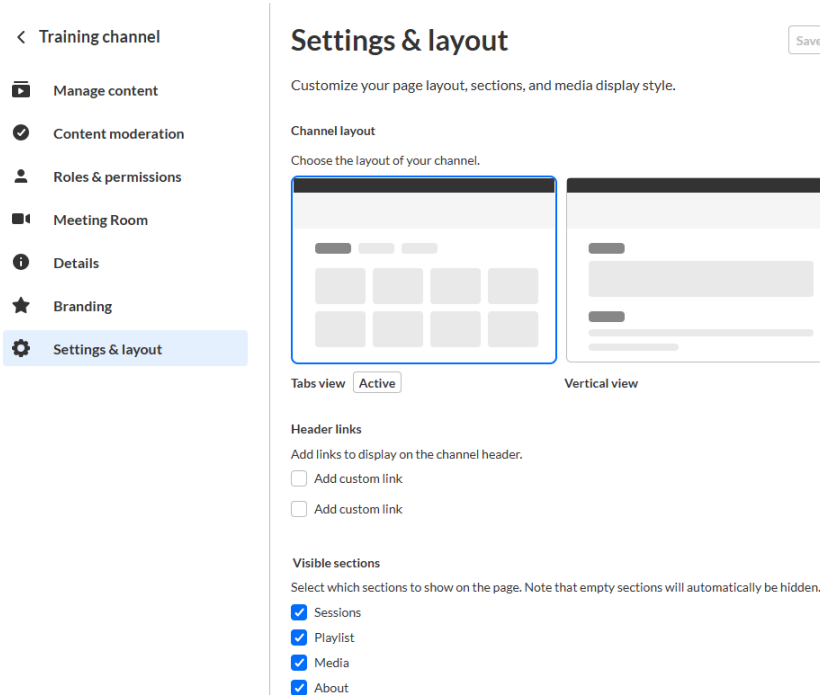

The configure page opens on the **Details** tab by default with a left-hand navigation.

4. In the left navigation panel, click **Settings & layout**.

The 'Settings & layout' page displays.

Configure your channel using the steps below. Click **Save** at the top right when you are finished.

Available options depend on your role and admin configuration.

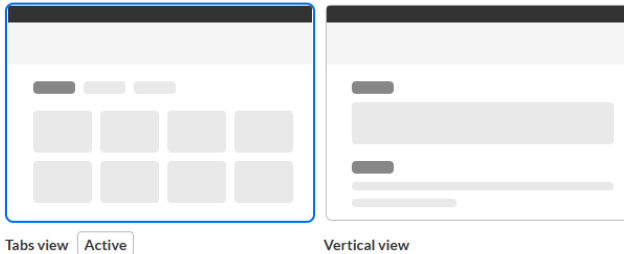

Configure settings & layout

Channel layout

Use the **Channel layout** section to choose how content is organized on the channel page.

Channel layout

Choose the layout of your channel.

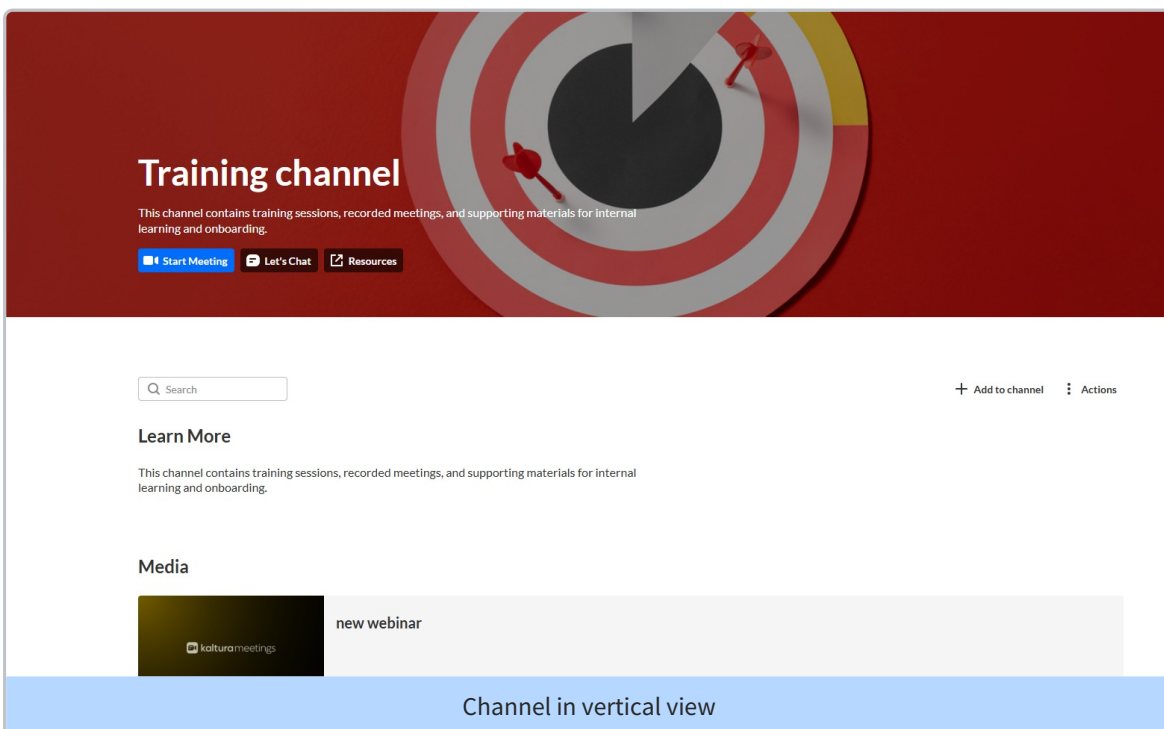

Available layouts include:

- **Tabs view** - Content is organized into tabs across the page
- **Vertical view** - Content is displayed in a single, scrollable layout

The layout currently in use is marked as **Active**.

In the image below, the channel is set to vertical view:

Good to know

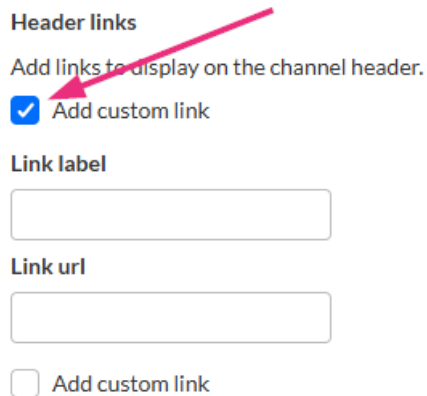

- If the channel layout is fixed by your admin, layout options won't appear.

- Layout changes apply to the entire channel and affect how all sections are displayed to viewers.

Header links

Header links are custom links that give viewers quick access to related resources, such as external websites, documentation, or internal pages.

1. Click **Add custom link**.

Header links
Add links to display on the channel header.

Add custom link

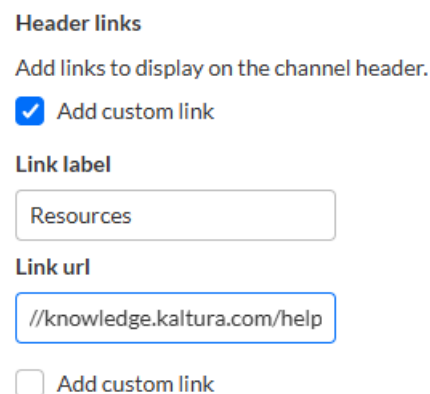

Link label

Link url

Add custom link

Additional fields appear.

2. Enter the link label (the text users see).
3. Enter the link URL.

Header links
Add links to display on the channel header.

Add custom link

Link label

Link url

Add custom link

4. Repeat to add a second link if needed. You can add up to two custom links.

Viewers see the link in the channel header, as shown in the image below:

Visible sections

Use **Visible sections** to control which sections appear on the channel page. Select or clear the checkbox next to each section to show or hide it.

Visible sections

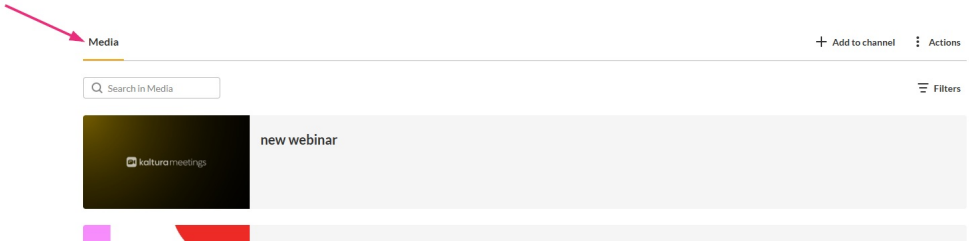

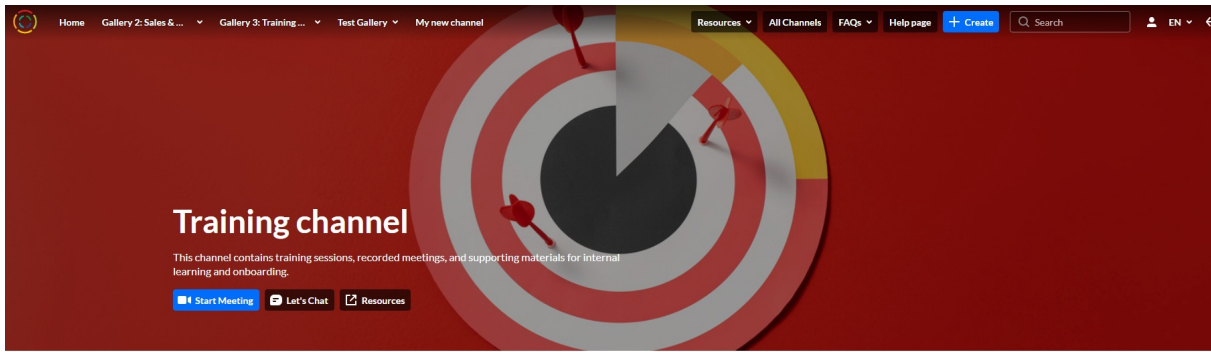

Select which sections to show on the page. Note that empty sections will automatically be hidden.

- Sessions
- Playlist
- Media
- About

Available sections include:

- **Sessions**
- **Genie** (if enabled on your site)
- **Playlist**
- **Media**
- **About** (displayed as **Learn more** on the channel page)

The image below shows the channel page with only the **Media** section visible, based on the selected section settings.

Good to know

- Sections with no content are automatically hidden.
- Hidden sections can be re-enabled at any time.

Note for Genie users: If Genie is enabled for your site, select 'Genie' in the **Visible sections** settings to display the 'Ask anything' experience. The way it displays on the channel page depends on the channel layout you choose (**Tabs view** or **Vertical view**).

For more information, see [Add Genie to specific channels](#).

Default section

Use **Default section** to choose which section loads first when users open the channel.

Default section

Select which section will load first on the page. Note that empty sections will automatically be replaced with the next available one.

The available options are:

- **Media**
- **Sessions**

- **Playlist**
- **About** (displayed as **Learn more** on the channel page)
- **Genie** (if enabled on your site)

Good to know

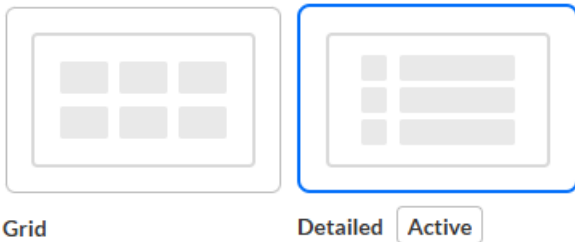

- The default section must be a visible section (a section may not be visible if it's turned off, has no content, or isn't enabled on your site).
- If the selected section has no content, the channel opens to the next available section automatically.

Media view mode

Use **Media view mode** to choose how media items are displayed in the channel.

Media view mode

Select the channel view mode.

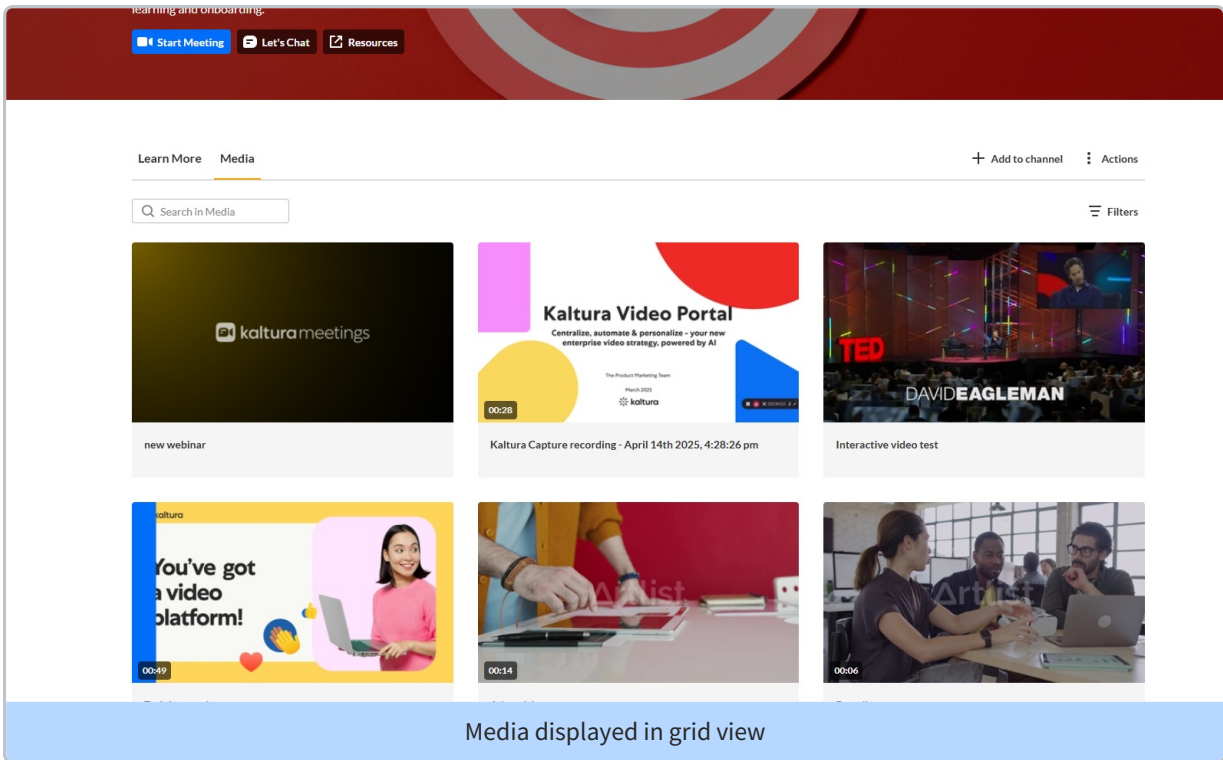

Available options include:

- **Grid** - Media items are shown in a tiled grid
- **Detailed** - Media items are shown with additional details

The active view mode is marked as **Active**.

The image below shows media items displayed in grid view:

Media displayed in grid view

Playback in context

Use **Playback in context** to control where media plays when users select a video.

When enabled:

- Media that is published only to this channel always plays within the channel context
- Viewers stay on the channel page while watching the video

This setting applies only to media published exclusively to this channel. For more information about publishing, visit our article [Publish media](#).

Channel TV

Use **Channel TV** to enable a continuous playback experience for sessions in the channel. When enabled, sessions play sequentially in a Channel TV-style experience.

This applies only to sessions in the channel (availability depends on your site configuration). For more information, see our article [Channel TV agenda](#).
