

Secure Share - Admin Guide

Last Modified on 01/14/2026 4:01 pm IST

 This article is designated for administrators.

About

The Secureshare module allows embedding content inline that requires authentication. The sections herein will guide you through logging into the Video Portal's Configuration Management section and enabling and configuring the Secureshare module.

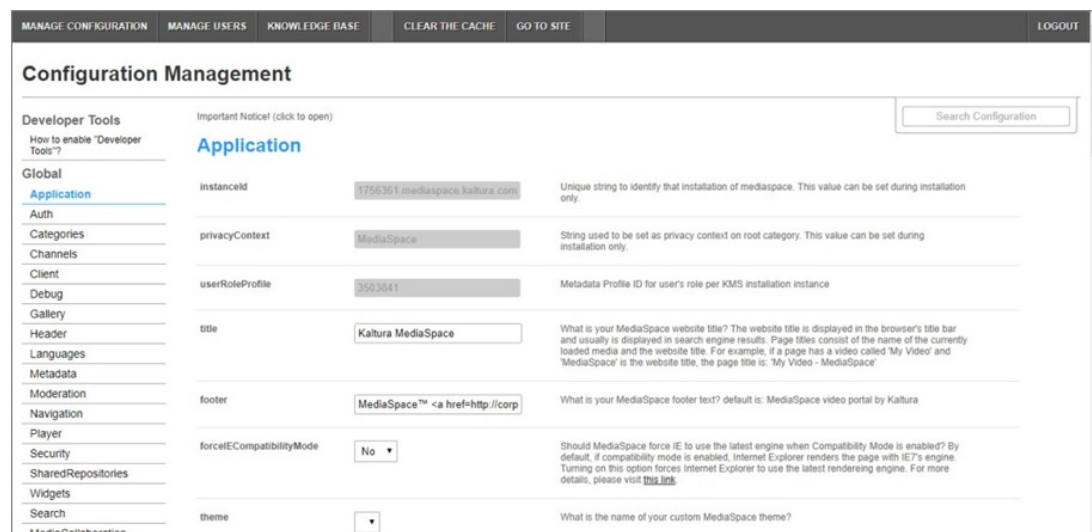

This module is for both Theming and non-Theming users.

For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

Configure

1. Log into the Configuration Management console by going to your video portal URL and adding `/admin` at the end.
2. Enter your Kaltura user ID and password.
3. Click **Sign In**. The Configuration Management console displays.

The screenshot shows the Kaltura Configuration Management console. At the top, there is a navigation bar with links: MANAGE CONFIGURATION, MANAGE USERS, KNOWLEDGE BASE, CLEAR THE CACHE, GO TO SITE, and LOGOUT. Below the navigation bar, the main content area is titled "Configuration Management". On the left, there is a sidebar with "Developer Tools" and a list of categories: Global, Application (selected), Auth, Categories, Channels, Client, Debug, Gallery, Header, Languages, Metadata, Moderation, Navigation, Player, Security, SharedRepositories, Widgets, Search, and MediaCollaboration. The main content area displays a table of configuration settings under the "Application" tab. The table has columns for the setting name, its current value, and a description. The settings include: instanceId (1755351 mediaspace.kaltura.com), privacyContext (MediaSpace), userRoleProfile (3503841), title (Kaltura MediaSpace), footer (MediaSpace™ <a href=http://corp), forceIECompatibilityMode (No), and theme (dropdown menu). A "Search Configuration" button is located in the top right corner of the configuration table.

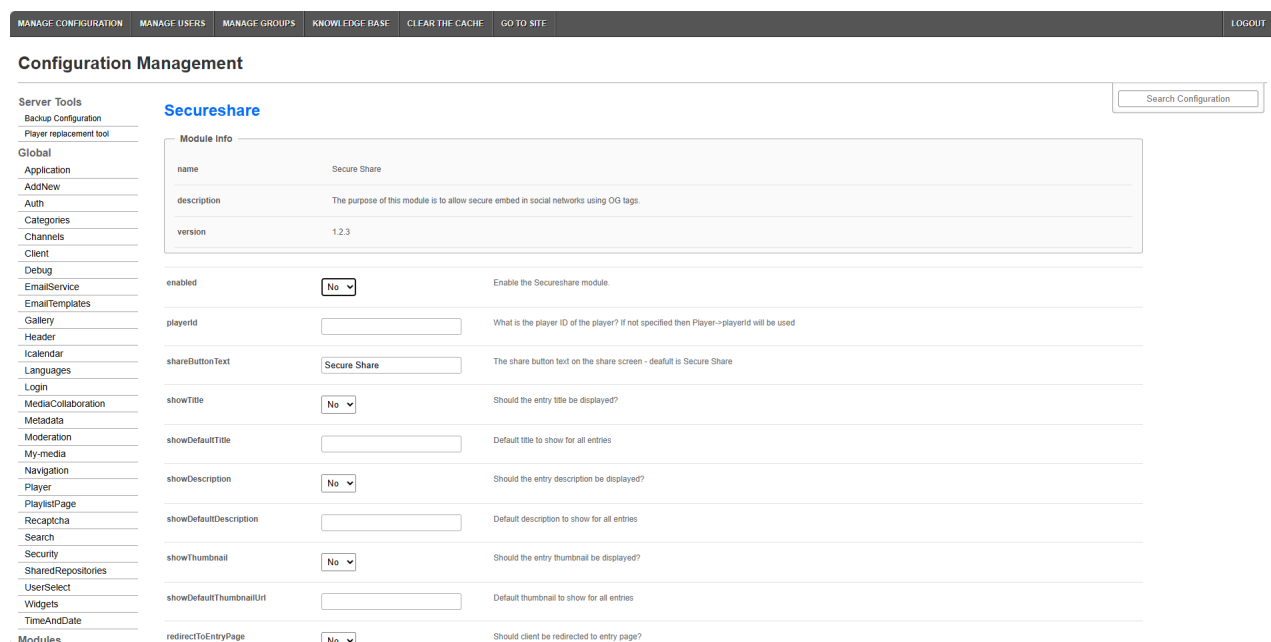

Setting	Value	Description
instanceId	1755351 mediaspace.kaltura.com	Unique string to identify that installation of mediaspace. This value can be set during installation only.
privacyContext	MediaSpace	String used to be set as privacy context on root category. This value can be set during installation only.
userRoleProfile	3503841	Metadata Profile ID for user's role per KMS installation instance
title	Kaltura MediaSpace	What is your MediaSpace website title? The website title is displayed in the browser's title bar and usually is displayed in search engine results. Page titles consist of the name of the currently loaded media and the website title. For example, if a page has a video called 'My Video' and 'MediaSpace' is the website title, the page title is: 'My Video - MediaSpace'
footer	MediaSpace™ <a href=http://corp	What is your MediaSpace footer text? default is: MediaSpace video portal by Kaltura
forceIECompatibilityMode	No	Should MediaSpace force IE to use the latest engine when Compatibility Mode is enabled? By default, if compatibility mode is enabled, Internet Explorer renders the page with IE7's engine. Turning on this option forces Internet Explorer to use the latest rendering engine. For more details, please visit this link .
theme	[dropdown menu]	What is the name of your custom MediaSpace theme?

4. In the list of configurable items on the left of your screen, locate and click on Secureshare.

The Secureshare item will be crossed out because it is disabled by default.

The Secureshare window displays.

The screenshot shows the 'Configuration Management' page for the 'Secureshare' module. On the left is a sidebar with a list of configuration categories, including 'Server Tools', 'Global', 'Application', 'Auth', 'Categories', 'Channels', 'Client', 'Debug', 'EmailService', 'EmailTemplates', 'Gallery', 'Header', 'Icalendar', 'Languages', 'Login', 'MediaCollaboration', 'Metadata', 'Moderation', 'My-media', 'Navigation', 'Player', 'PlaylistPage', 'Recaptcha', 'Search', 'Security', 'SharedRepositories', 'UserSelect', 'Widgets', 'TimeAndDate', and 'Modules'. The 'Secureshare' module is selected. The main content area displays the 'Module Info' box with the following details:

Module Info	
name	Secure Share
description	The purpose of this module is to allow secure embed in social networks using OG tags.
version	1.2.3

Below the 'Module Info' box are several configuration options, each with a pull-down menu and a description:

- enabled**: Set to 'No'. Description: 'Enable the Secureshare module.'
- playerid**: Empty text field. Description: 'What is the player ID of the player? If not specified then Player~playerid will be used.'
- shareButtonText**: Set to 'Secure Share'. Description: 'The share button text on the share screen - default is Secure Share.'
- showTitle**: Set to 'No'. Description: 'Should the entry title be displayed?'
- showDefaultTitle**: Empty text field. Description: 'Default title to show for all entries.'
- showDescription**: Set to 'No'. Description: 'Should the entry description be displayed?'
- showDefaultDescription**: Empty text field. Description: 'Default description to show for all entries.'
- showThumbnail**: Set to 'No'. Description: 'Should the entry thumbnail be displayed?'
- showDefaultThumbnailUrl**: Empty text field. Description: 'Default thumbnail to show for all entries.'
- redirectToEntryPage**: Set to 'No'. Description: 'Should client be redirected to entry page?'

The **Module Info** box displays the module name, description (what enabling this module allows users to do), and version number.

5. In the enabled pull-down list, select **Yes** to enable the Secureshare module.

Other configurable items following the enabled pull-down list are as follows.

Configuration Name	Options	Description
playerId	Free text	What is the player ID of the player? If not specified, then Player->playerID will be used.
shareButtonText	Free text	The share button text on the share screen. Default is Secure Share.
showTitle	Yes or No	Whether or not the entry title is displayed.
showDefaultTitle	Free text	If showTitle set to No, type a default title to show for all entries.
showDescription	Yes or No	Whether or not the entry description is displayed.
showDefaultDescription	Free text	If showDescription is set to No, type a default description to show for all entries.
showThumbnail	Yes or No	Whether or not the entry thumbnail is displayed.
showDefaultThumbnailUrl	Free text	If showThumbnail set to No, type default thumbnail to show for all entries.
redirectToEntryPage	Yes or No	Whether or not the client should be redirected to the entry page.
useKalturaURL	Yes or No	Whether or not the secureShare link should be a Kaltura URL. This should be used when the application that links are shared to has .kaltura.com as a whitelisted URL.
allowedAddresses	Free text	Click +Add "allowedAddresses" and provide IPs or ranges to allow access to OG tags. If none are configured, access is allowed to all.
thumbnailWidth	Integer	The embed thumbnail width size (Integer). If not specified, the width of the player (playerId) will be used.
imageFileExtension	None, JPG, PNG, or BMP	The image file extension to use for the thumbnail. If not specified, the default is None.

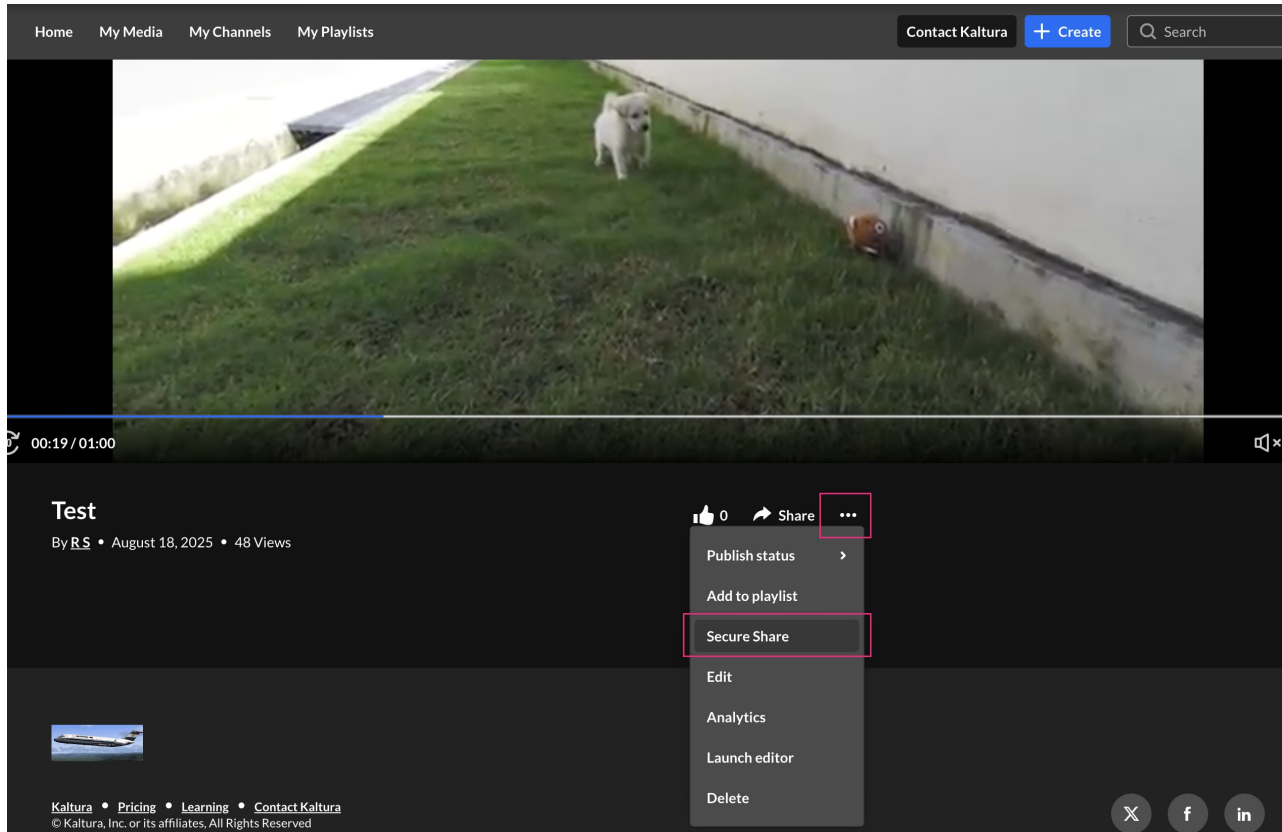

6. Click **Save**. You receive a notice that your configuration for SecureShare was saved and the cache was cleared.

End user experience

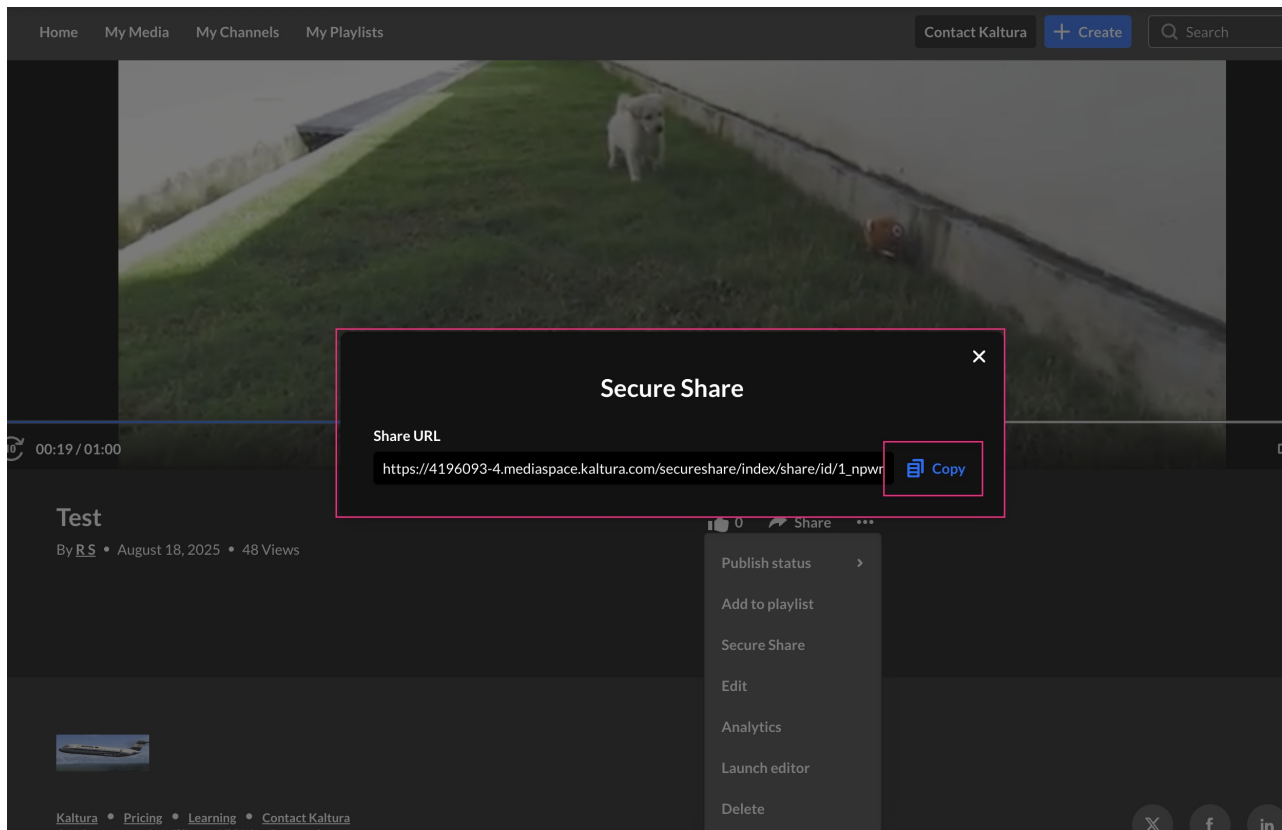

Once enabled and configured, a new embed capability is added to the entry page that allows users to secure embed in social networks using OG tags. This embed capability is displayed for Theming users as part of the Actions menu on the Entry page, and for non-Theming users as an additional tab - Secure Share - added to the Entry page.

Theming users:

Once enabled and configured, the Secure share option appears in the **three dots menu** on the media page for the end user.

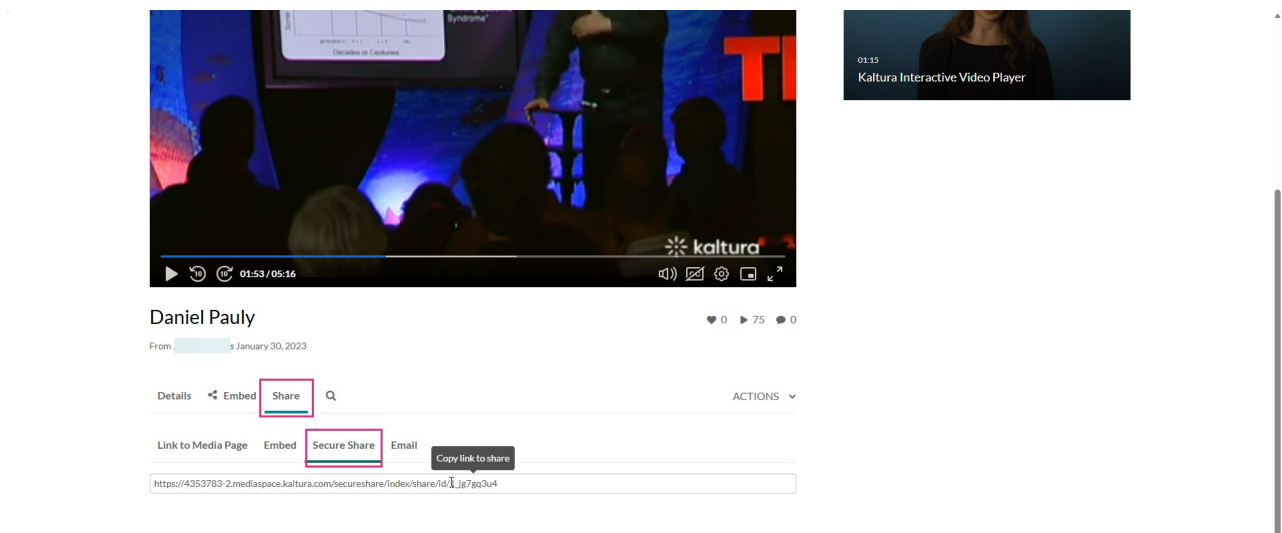

After selecting the Secure share option in the **three dots menu** on the media page, the Share URL is displayed for the user. The user may then click **Copy** to copy the URL.

Non-Theming users:

Once enabled and configured for non-Theming users, the Secure share option appears as an additional tab - Secure Share - added to the Entry page.

After navigating to the Secure share tab, the user may then hover over the URL and click **Copy link to share** to copy the URL.
