# Addrromurl module

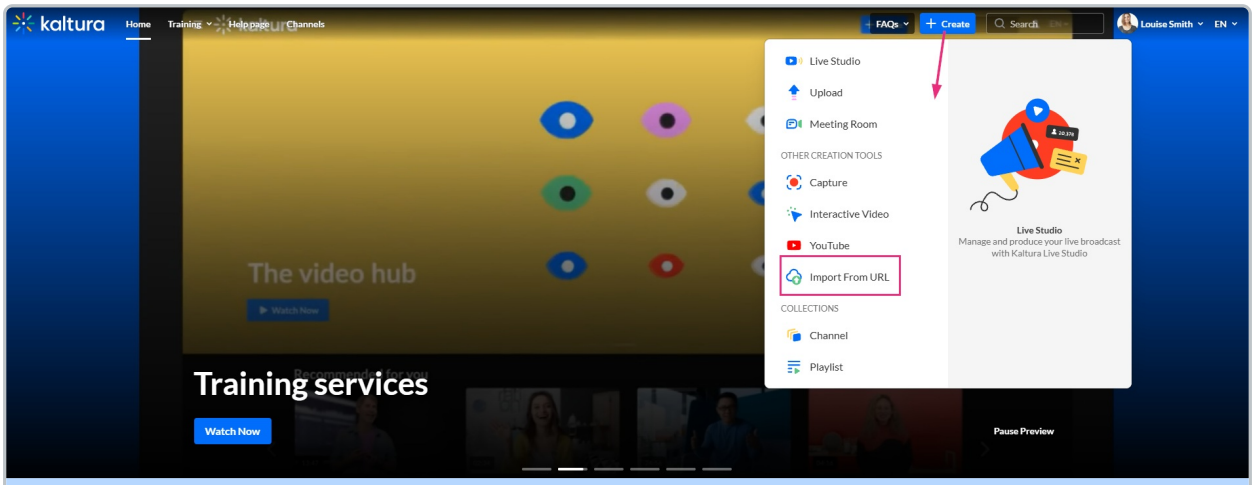

Content updated: 01/14/2026

**This article is designated for administrators.**

## About

The **Addfromurl module** lets users import media into My Media using a direct URL instead of uploading a file from their computer.

After the module is enabled, users can import video, audio, and image files from publicly accessible URLs, using the **Import from URL** option in the +Create menu. Kaltura automatically detects the file type and creates the appropriate media entry.

+Create menu in Content Hubs

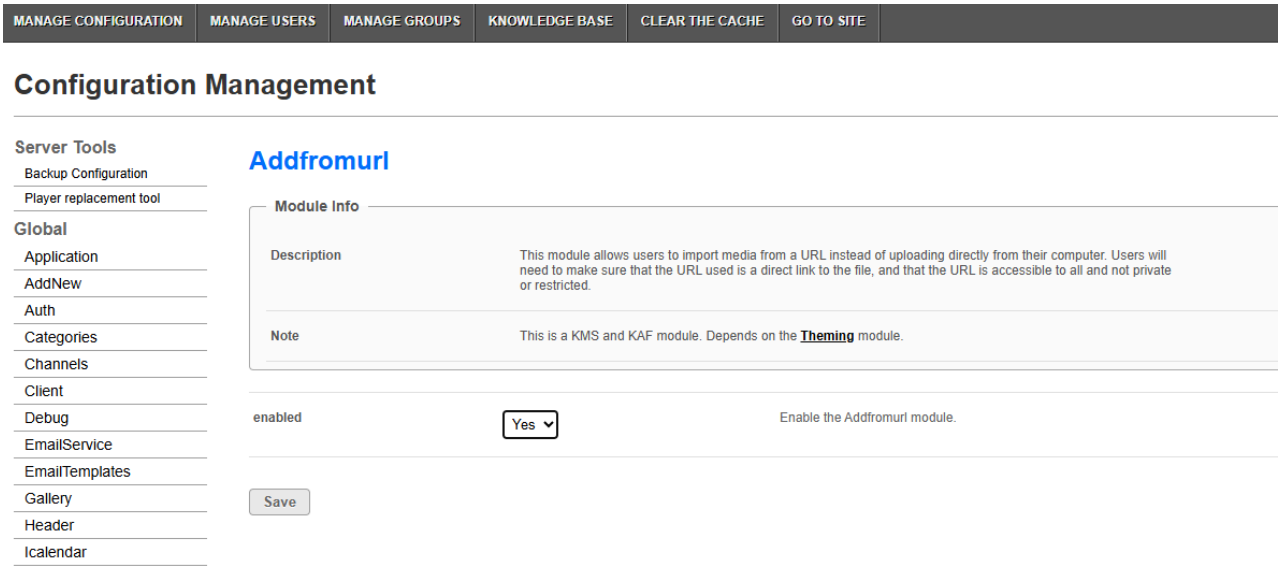

- This feature requires the Theming module to be enabled, with the `addfromurl` feature set to **Yes**.
- This module is available in Content Hubs and LMS Extensions.

## Configure

1. Go to your Configuration Management console, locate the **Addfromurl** module in the left panel, then select it. You can also navigate directly using a link: `https://{your_site_url}/admin/config/tab/addfromurl`

The **Addfromurl** page displays.
