

Share CDN URL - User Guide

Last Modified on 06/04/2026 9:18 am IDT

 This article is designated for all users.

About

Administrators can allow users to generate a CDN URL for entries in legacy Video Portal. Once embedded in an external page, allowed users can view the player in a full screen in an external browser and play the content. The following sections outline user capabilities.

This module is for both Theming and non-Theming users.

For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

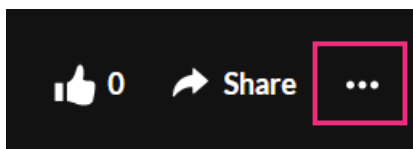

Share CDN URL

If your admin has enabled and configured the Sharecdnurl module, capability is displayed for Theming users as part of the Actions menu on the Entry page, and for non-Theming users as an additional tab - Share CDN URL - added to the Entry page.

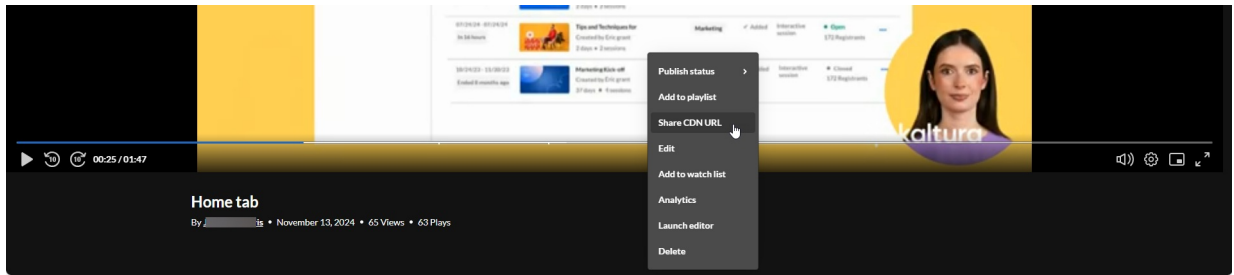

Log into your Video Portal and navigate to a media's Entry page. If you need help logging in and accessing media, please follow the instructions in [Log into your Video Portal](#) and [My Media](#).

Theming users:

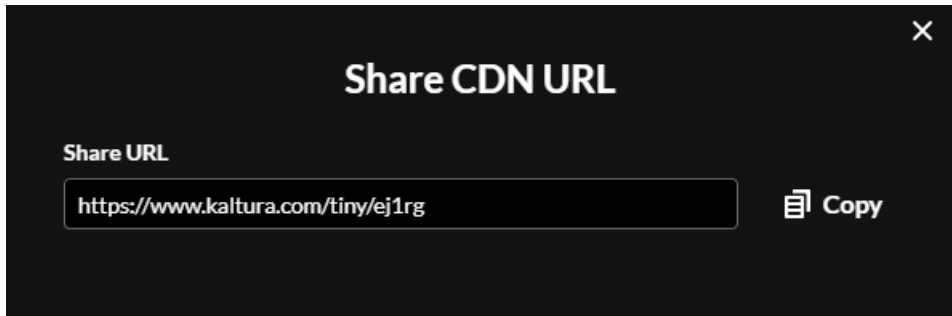

1. From the Actions menu -

choose ShareCDNURL .

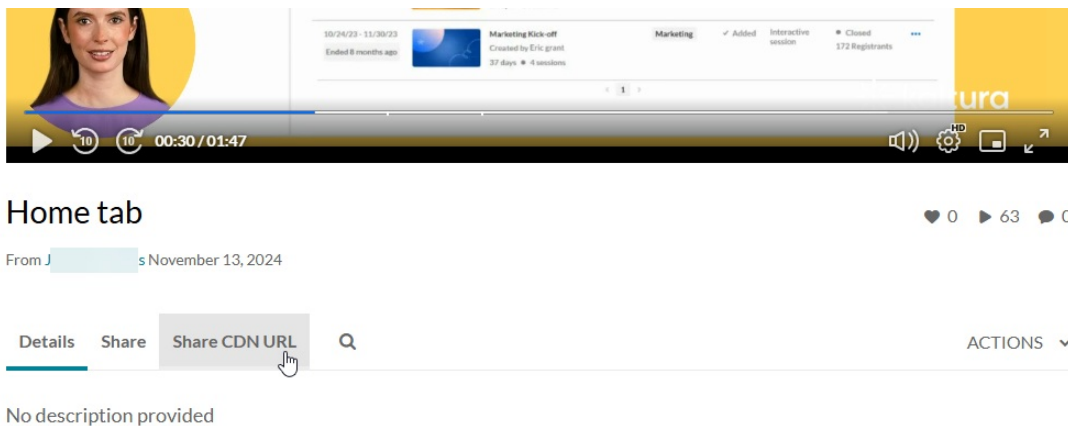

The Share CDN URL screen displays.

2. Click the Copy button to copy the Share URL.

Non-Theming users:

1. Click on the Share CDN URL tab.

2. Click the Copy button to copy Share URL.
