About

Site visibility determines controls who can see and access a session on the event site. This setting determines whether a session appears in the event agenda and whether attendees can access it directly. Organizers can choose between Published, Unlisted, or Private visibility levels to manage how widely a session is displayed and who can view it.

Make your selection

Choose one of the following options from the drop-down menu:

- **Private** – Visible to team members only
- **Unlisted** – Accessible via direct link only
- **Published** – Visible on the event agenda
