

# Manage media, attachments, and downloads - Theming

Last Modified on 04/04/2026 4:33 pm IDT

 This article is designated for all users.

## About

The **Assets** tab in the edit media page lets you manage the files associated with your media entry. From here, you can replace the main media file, add downloadable attachments, and control which files viewers can download.

This helps you keep your content up to date, provide supporting materials, and control access to downloadable versions.

## Who can use this

- Media owners
- Co-editors

## Access the Assets tab

1. From the user menu, select [My Media](#).

The 'My Media' page displays.

2. Click the **three dots** to the right of the desired media and select **Edit**.

Information

## Assets

Manage your media assets including alternative formats, attachments, and download options.

Replace media

Upload a new file to replace the current media

 Upload  Replace Media from URL

 All current flavors will be replaced upon replacement approval. Any time based metadata won't be synced with the new content.

Attachments

Attach downloadable content to the media.

 Upload

Video Asset Files

Download the available video files for this media.

Source  Download

Basic/Small - WEB/MBL (H264/400)  Download

Basic/Small - WEB/MBL (H264/600)  Download

SD/Small - WEB/MBL (H264/900)  Download

SD/Large - WEB/MBL (H264/1500)  Download

HD/1080 - WEB (H264/4000)  Download

End-User Download Permissions

Select which video versions viewers are allowed to download.

All edit actions apply immediately. There is no **Save** button on this page.

- The Assets tab is displayed only if relevant modules are enabled in your account.
- Each section (Replace media, Attachments, Downloads) appears only if its corresponding module is enabled.

## Replace the main media file

Use this section to upload a new version of your media while keeping the same entry, link, and analytics.

For detailed instructions, see [Replace media](#).

## Manage attachments

Use attachments to add downloadable files (for example, PDFs, slides, or additional media) to your entry.

For detailed instructions, see [Add attachments](#).

## View available media files

The **Video Asset Files** section lists all available versions of your media (for example, source, HD, or lower-resolution formats). The list reflects the versions generated during upload and processing.

Each file appears with a **Download** button, allowing media owners and co-editors to download files directly.

## Control download options

The **End-User Download Permissions** section lets you control which media files viewers can download.

Use the toggle switches next to each format to allow or prevent viewer downloads.

For detailed instructions, see [Enable media downloads](#).
