About

OCR (Optical Character Recognition) makes it easy to search for text within a video, like titles, slide content, labels on graphs, or other on-screen text.

This helps students and employees quickly find what they're looking for, improving productivity and saving time.

 For OCR functionality to work, [REACH](#) must be enabled on the account.

 Want OCR to be ordered automatically? Check out our article [Create automated REACH rules for channels and galleries](#).

These instructions apply to the **Legacy Video Portal**. If you're using the Theming-based Video Portal, please refer to the [Content Hubs category](#).

Order OCR

1. Complete the following fields:

- **Service** - Select 'Machine'
- **Source Media Language** - Leave as-is (it does not affect the OCR request)

OCR is optimized for Latin-based characters, numbers, and common symbols (e.g., @, #, \$, %).

Non-Latin scripts may be partially supported: - Chinese, Japanese, Korean: Works best with printed text in standard fonts. - Arabic, Hindi, and others: Accuracy may vary and is not explicitly supported.

- **Feature** - Select 'OCR'
