 This article is designated for all users.

About

The **alignment** service (ordering captions based on a transcript file) synchronizes a provided transcript (.txt) with the audio or video content. This is useful for scripted videos, such as training content, where the speaker reads from prepared text.

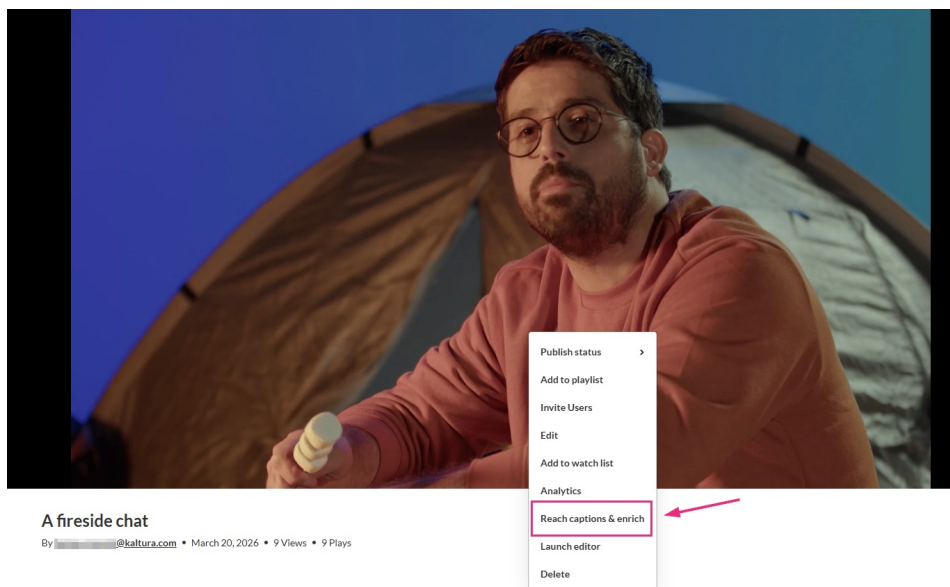

Upload a transcript as a .txt file, and the system matches the text to the timing of the spoken words in the video. When the speaker closely follows the script, the result is highly accurate captions.

Order alignment

1. Open the media page for the desired video, then click the **three dots** below the player.

2. From the menu options, select **Reach captions & enrich**.

The **Reach captions & enrich** window displays.

Reach captions & enrich

Order Captions

Feature	Service type
<input type="text" value="Captions"/>	<input type="text" value="Machine"/>
Source media language	Turnaround time
<input type="text" value="English"/>	<input type="text" value="30 minutes"/>

Close

3. In the 'Reach captions & enrich' page, complete the fields as follows:
 - o **Feature** - Select **Alignment**.

Reach captions & enrich

Cancel **Save**

5. Upload your file and complete the **Title** field.
6. Click **Save**.

Your request is generated, and a success message displays. The system aligns the transcript with the video and generates a caption file (SRT or DFXP).
