 This article is designated for administrators.

About

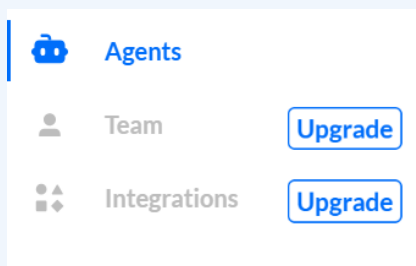

This article provides an overview of the Agentic Avatar Studio interface and helps you get oriented once you log in.

Agentic Avatar Studio home page

On the Agentic Avatar Studio home page, key avatar management features are organized into three main tabs - **Agents**, **Team**, and **Integrations** - each providing specific tools for managing your avatars.

 The Agentic Avatar Studio uses account-based access to control which features users can see and modify. Depending on your account, some tabs may not be visible or accessible.

You may click the **Upgrade** button to view available monthly and annual plans and easily upgrade your plan to best suit your needs. Plan upgrade takes effect

immediately upon successful payment. Please see your account owner/admin for further information.

Agents tab

The **Agents** tab is the main dashboard of the Agentic Avatar Studio. In the "Create a new agent" area, you can quickly create new agents based on preconfigured templates, then customize them for your specific needs. In the "My agents" area, you can review/edit existing agents in your account and delete agents. See [Agentic Avatar Studio Agents tab](#).

Team tab

Use the **Team** tab to add, edit, and delete team members and assign them roles and event responsibilities within the Agentic Avatar Studio. See [Agentic Avatar Studio Team tab](#).

Integrations tab

The **Integrations** tab allows admin to add, view, and manage third-party integrations (like CRM or marketing systems) that connect with the Agentic Avatar Studio. See [Agentic Avatar Studio Integrations tab](#).

Kaltura does not use customer data to train its AI models. To learn more, see [Kaltura's Artificial Intelligence Principles](#).
