About

Open a stand-alone media page for your agent and see your agent as it will appear to users. Interact with your agent to test the experience.

 Please note - Usage in the agent site consumes interactions.

Open agent site

On the Overview page, click **Open agent site**.

The screenshot shows the 'Kaltura sales agent' overview page. At the top, there is a navigation bar with 'Back', '3/20 Interactions', and 'Agent studio'. Below the navigation bar are tabs for 'Overview', 'Knowledge', 'Playbook', 'Experience', 'Analytics', and 'Advanced'. The 'Overview' tab is active. On the left side, there are two buttons: 'Share agent' and 'Open agent site' (highlighted with a red box). Below these buttons, the 'Role' is listed as 'Help users understand how our solutions fit their needs by identifying goals, answering questions, and guiding them toward the right next step.' The 'Targeting' is listed as 'Procurement managers'. A section titled 'Your agent's activity in the last week' shows '0 Conversations made' and a 'See more insights' button. On the right side, there is a preview of the agent's interface. The preview shows a video of a smiling woman with the text 'Ask me anything' and a 'Start conversation' button. Below the video, there is a text input field with the placeholder 'Ask me anything' and a 'Send' button. Below the input field, there are two example questions: 'How does Genie personalize learning for different users?' and 'How many countries does Nomura currently operate in?'. At the bottom of the preview, there is a disclaimer: 'AI-generated content may contain errors or omissions.'

The stand-alone media page for your agent opens.

Ask me anything

OR

AI-generated content may contain errors or omissions.

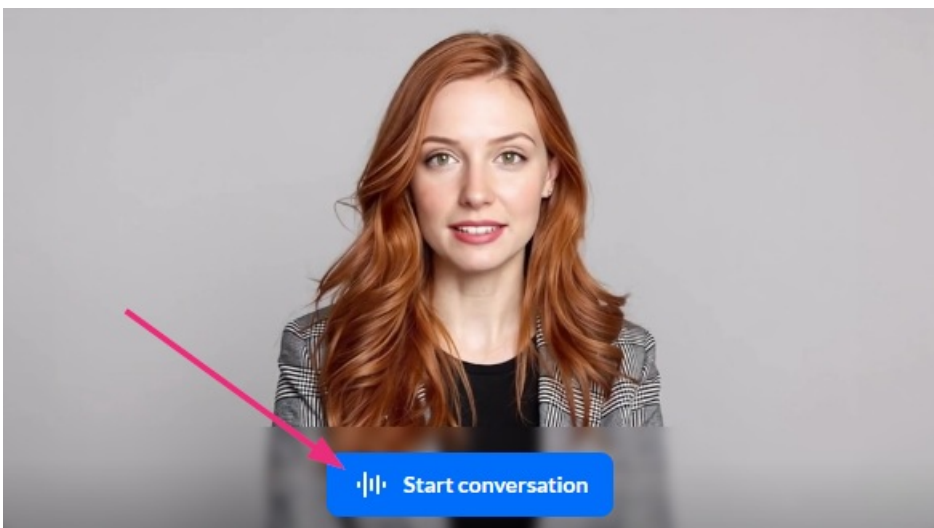

Interact with your agent

The 'Ask me anything' experience shows the following:

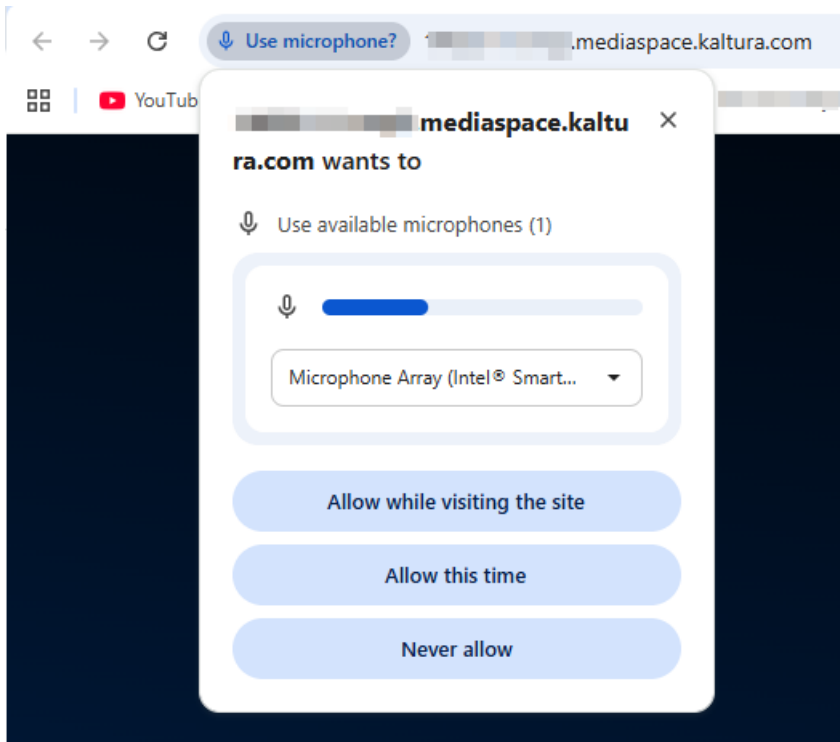

- An Agentic Avatar
- A **Start conversation** button
- The **Ask me anything** input field below

Start a conversation with the Agentic Avatar

To start a live conversation, click **Start conversation**.

The first time you start a conversation, you're prompted to allow microphone access.

After allowing access, you can select your preferred microphone and speaker from the device selector on the microphone control.

The experience switches to a full-screen avatar view.

During the conversation

When the avatar loads, it greets you and introduces itself as an agent. If available, it can use basic profile information (e.g. your name) to personalize the conversation.

Speak naturally to the avatar and ask your question.

You can:

- Interrupt the avatar while it's speaking
- End the conversation at any time

Microphone indicators

When your microphone is active and you're speaking, a **blue** glow appears on the microphone button.

When your microphone is **muted**, a **red indicator** appears with a message prompting you to enable your mic.

When interruptions are enabled, a *Talk to interrupt* message appears while the avatar is speaking.

After you end the conversation

When you end a conversation, click **End** in the lower right corner to return to the main screen.

When you exit to the conversation, your conversation appears as a text transcript in the conversation panel.
