About

Open a stand-alone media page for your agent and see your agent as it will appear to users. Interact with your agent to test the experience.

Please note - Usage in the agent site consumes interactions.

Open agent site

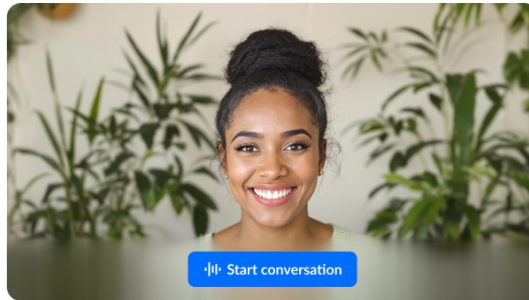

On the Overview page, click **Open agent site**.

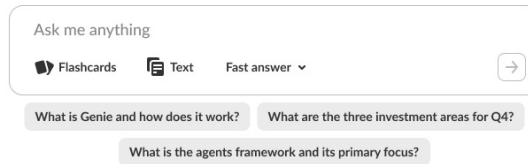

The screenshot shows the Kaltura agent studio interface. At the top, there is a navigation bar with a 'Back' button, a progress indicator for '3/20 Interactions', and a dropdown for 'Agent studio'. Below the navigation bar are tabs for 'Overview', 'Knowledge', 'Playbook', 'Experience', and 'Analytics'. The 'Overview' tab is active. On the left side, the 'Kaltura sales agent' card is displayed. It has a 'Share agent' button and an 'Open agent site' button, which is highlighted with a pink border. Below this, the agent's role is described as 'Help users understand how our solutions fit their needs by identifying goals, answering questions, and guiding them toward the right next step.' The targeting is 'Procurement managers'. A section titled 'Your agent's activity in the last week' shows '0 Conversations made' and a 'See more insights' button. On the right side, a preview of the agent's chat interface is shown. It features a header 'Ask me anything' with a star icon, a video thumbnail of a smiling woman, and a 'Start conversation' button. Below the video, there is a text input field with the placeholder 'Ask me anything' and a 'Send' button. Two example questions are shown: 'How does Genie personalize learning for different users?' and 'How many countries does Nomura currently operate in?'. At the bottom of the chat preview, a disclaimer reads 'AI-generated content may contain errors or omissions.'

The stand-alone media page for your agent opens.

Ask me anything

OR

AI-generated content may contain errors or omissions.

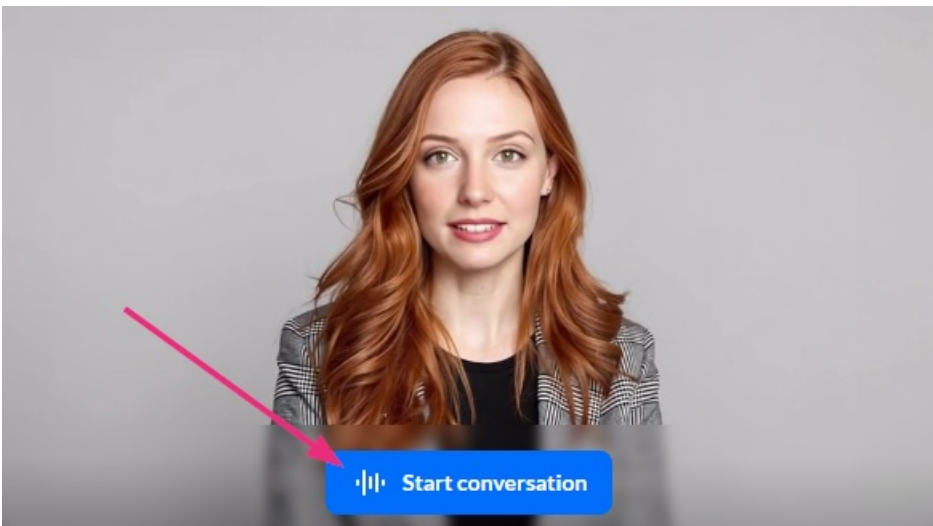

Interact with your agent

The 'Ask me anything' experience shows the following:

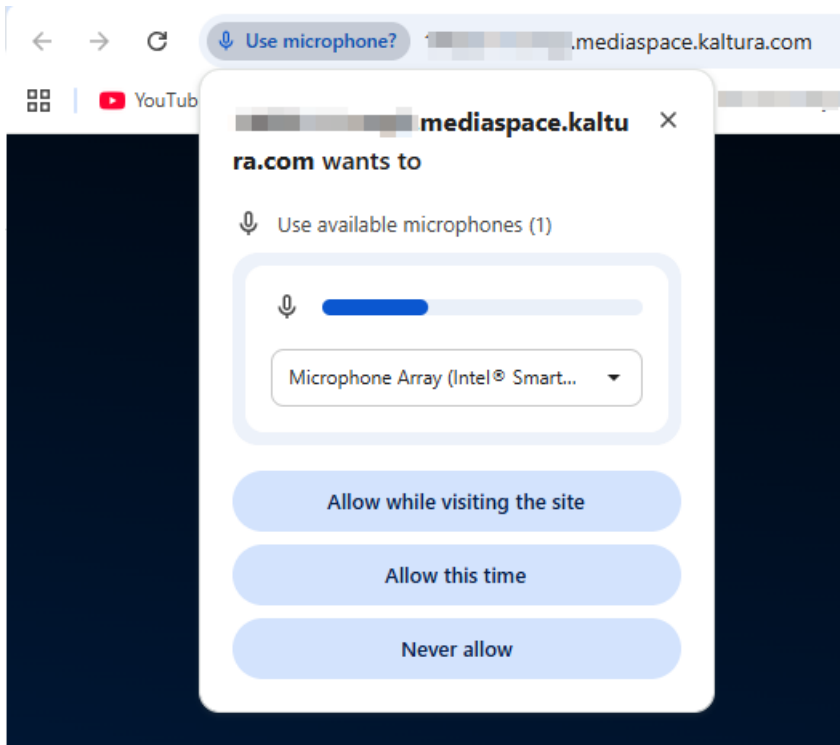

- An Agentic Avatar
- A **Start conversation** button
- The **Ask me anything** input field below

Start a conversation with the Agentic Avatar

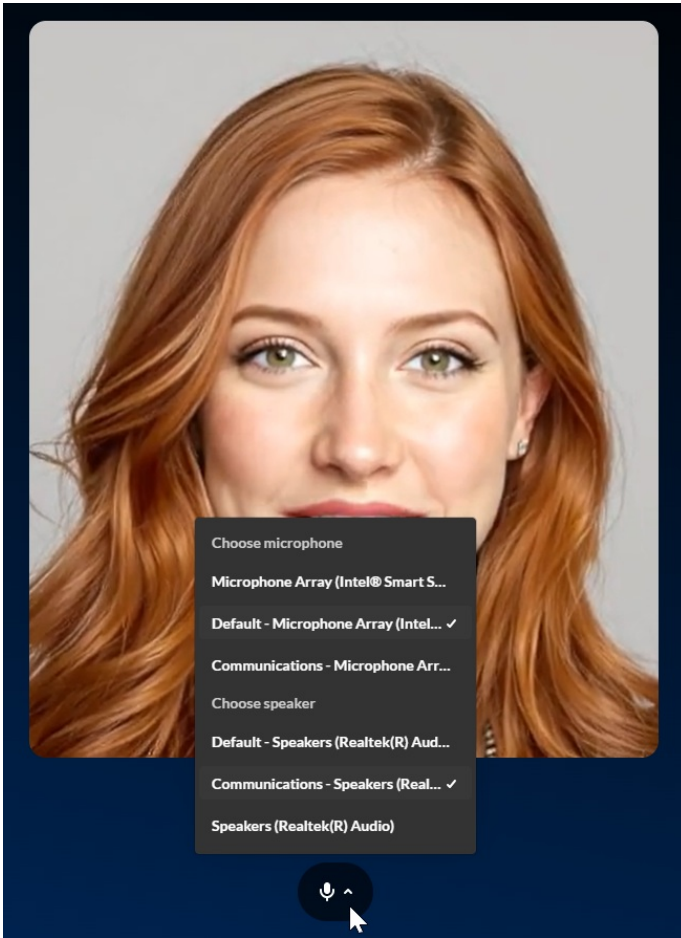

To start a live conversation, click **Start conversation**.

The first time you start a conversation, you're prompted to allow microphone access.

After allowing access, you can select your preferred microphone and speaker from the device selector on the microphone control.

The experience switches to a full-screen avatar view.

During the conversation

When the avatar loads, it greets you and introduces itself as an agent. If available, it can use basic profile information (e.g. your name) to personalize the conversation.

Speak naturally to the avatar and ask your question.

You can:

- Interrupt the avatar while it's speaking
- End the conversation at any time

Microphone indicators

When your microphone is active and you're speaking, a **blue** glow appears on the microphone button.

When your microphone is **muted**, a **red indicator** appears with a message prompting you to enable your mic.

When interruptions are enabled, a *Talk to interrupt* message appears while the avatar is speaking.

After you end the conversation

When you end a conversation, click **End** in the lower right corner to return to the main screen.

When you exit to the conversation, your conversation appears as a text transcript in the conversation panel.
