Where to find features from the legacy Video Portal in Content Hubs

Last Modified on 08/27/2026 12:04 pm IDT

This article is designated for all users.

About

This quick guide helps users find familiar features and actions when moving from the legacy Video Portal to Content Hubs, the upgraded Video Portal experience based on the Theming design system.

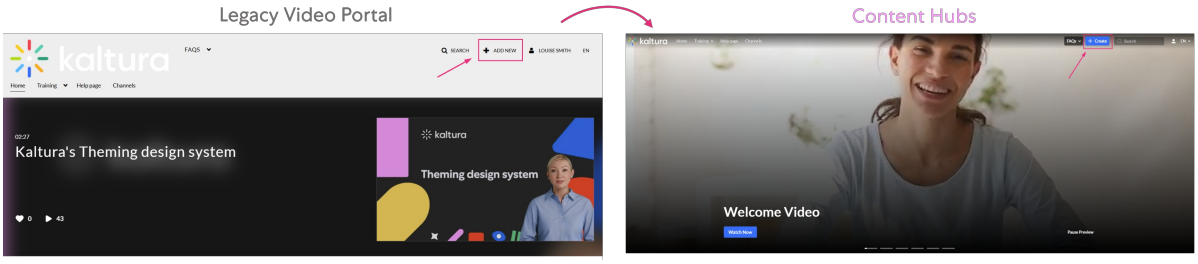

To explore the full capabilities, click any linked item in the **Content Hubs** column to open its documentation.

- This guide focuses on the user experience and shows where common features are located in the new interface. It does not provide comprehensive coverage of new Content Hubs capabilities or enhancements.
- For a complete list of functionality that has changed, been removed, or is not yet available in Content Hubs, see Gap analysis: Moving from legacy Video Portal to Content Hubs .

Key differences for end users

- **Edit media page** - The top navigation tabs from the legacy Video Portal edit media page have moved to a left-hand panel in Content Hubs.
- **Actions menu** - The Actions drop-down menu has been replaced by a three-dot (more actions) menu, and some bulk actions now appear only after selecting one or more items.
- **Sorting options** - You can now find **Sort by** settings tucked directly inside the **Filters** panel.
