

Why do attachments appear after adding captions or translations to media?

Last Modified on 05/07/2026 1:50 pm IDT

When captions or translations are added to media, additional files may appear in the **Attachments** section of the media page.

The screenshot shows a video player for a video titled "Accessibility Agent Walkthrough" by Louise (@kaltura.com) from March 24, 2026. The video has 21 views and 20 plays. Below the video, there are 8 attachments listed in a grid. A red arrow points to the first attachment in the first row.

To prevent these files from appearing, enable the `showOnlyAttachmentType` setting in the **Attachments module** configuration.

Attachments

enabled	<input type="checkbox"/> Yes	Enable the Attachments module.
showOnlyAttachmentType	<input type="checkbox"/> Yes	Enabling this will cause transcript files (created by APIs for example) to not show in the attachments tab.
allowAnonymous	<input type="checkbox"/> Yes	Enabling this will allow anonymous users to view and download attachments.
