About

Use **announcements** to share important messages, reminders, instructions, or updates with participants during a live session. A sent announcement first displays as a toast notification and remains available in the **Updates** tab.

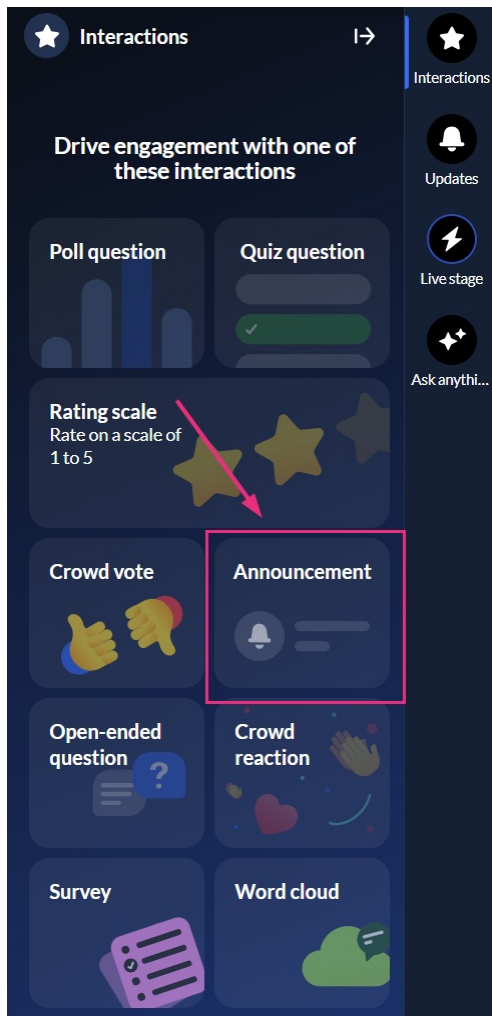

You can include an optional title and call-to-action button, then save the announcement as a draft or send it immediately.

Create and send an announcement

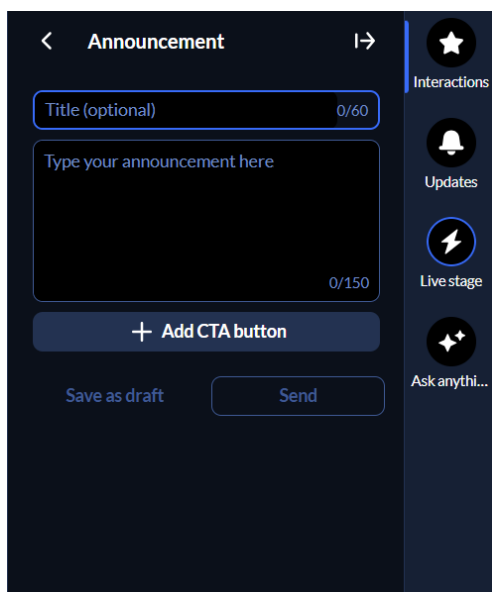

1. On the session page, click the **Interactions** tab in the upper-right corner to open the Interactions panel.

2. Select **Announcement**.

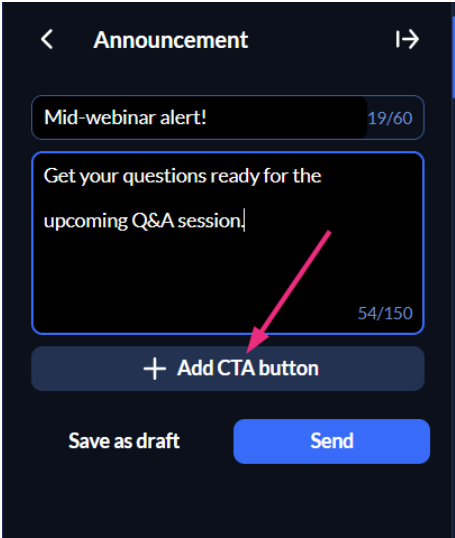

The Announcement window opens.

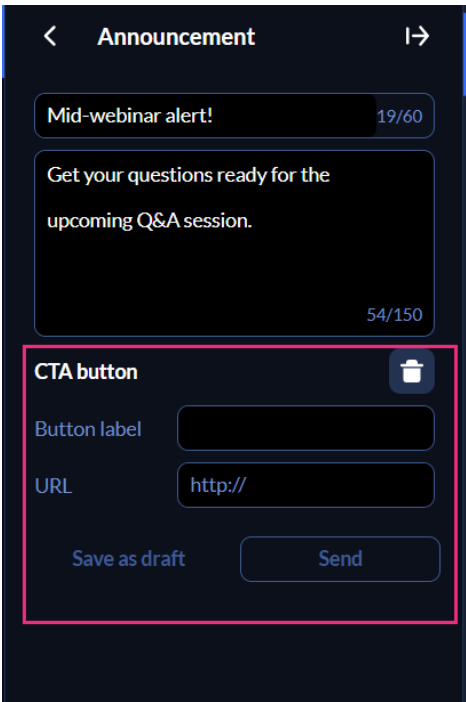

3. (Optional) Enter a title for your announcement (up to 60 characters), such as *Mid-webinar alert*.

4. Enter the announcement message (up to 150 characters), such as *Get your questions ready for the upcoming Q&A session.*
5. To include a call-to-action button, click **+ Add CTA button**.

Additional fields display.

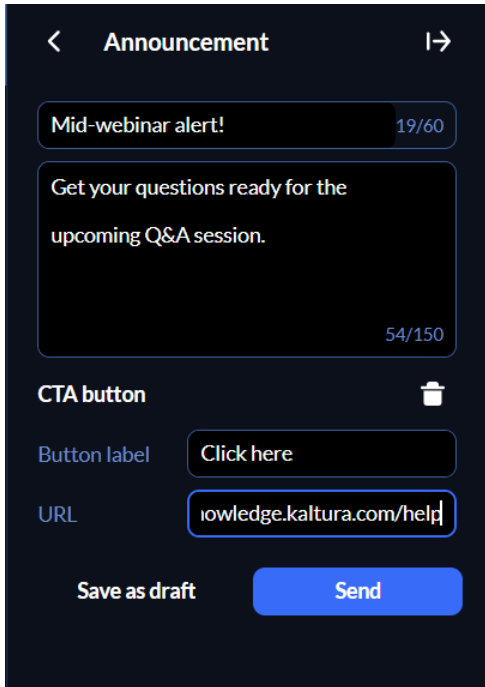

6. Complete both fields:
 - **Button label** - Enter the text to display on the button.
 - **URL** - Enter the page URL that opens when participants click the button.

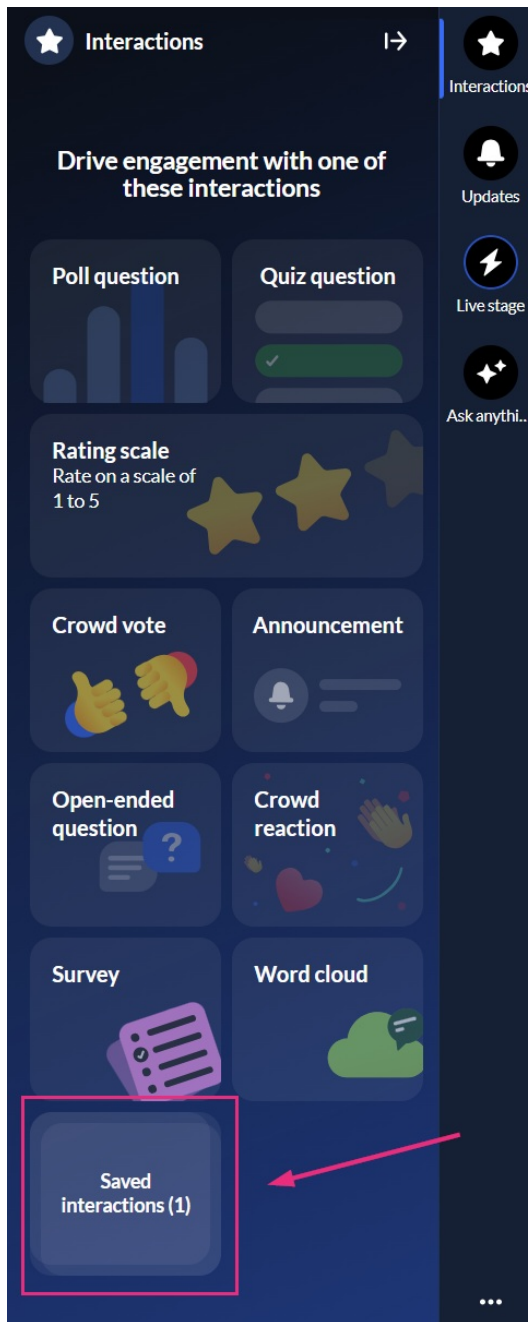

To remove the CTA button, click the **trash can icon**.

7. Click **Save as draft** or **Send**.

If you click **Send**, the announcement is published immediately and participants receive a notification.

A screenshot of the Kaltura 'Announcement' creation interface. At the top, there's a title bar with a back arrow, the word 'Announcement', and a forward arrow. Below this is a text input field containing 'Mid-webinar alert!' with a character count of '19/60'. Underneath is a larger text area with the text 'Get your questions ready for the upcoming Q&A session.' and a character count of '54/150'. Below the text area is a section labeled 'CTA button' with a trash icon. It contains two input fields: 'Button label' with the text 'Click here' and 'URL' with the text 'knowledge.kaltura.com/help'. At the bottom, there are two buttons: 'Save as draft' and 'Send'.

If you click **Save as draft**, you can access the announcement from the drafts list under **Saved interactions**. Hover over the announcement to edit or send it.

Remove announcements

Moderators can remove announcements from the **Updates** tab during the session. See [Remove announcements](#).
