Introduction to Avatar Videos

Content updated: 08/25/2026

This article is designated for all users.

About

Avatar Video Studio creates AI-generated, avatar-led videos from scripts, recordings, presentations, documents, webpages, and other media.

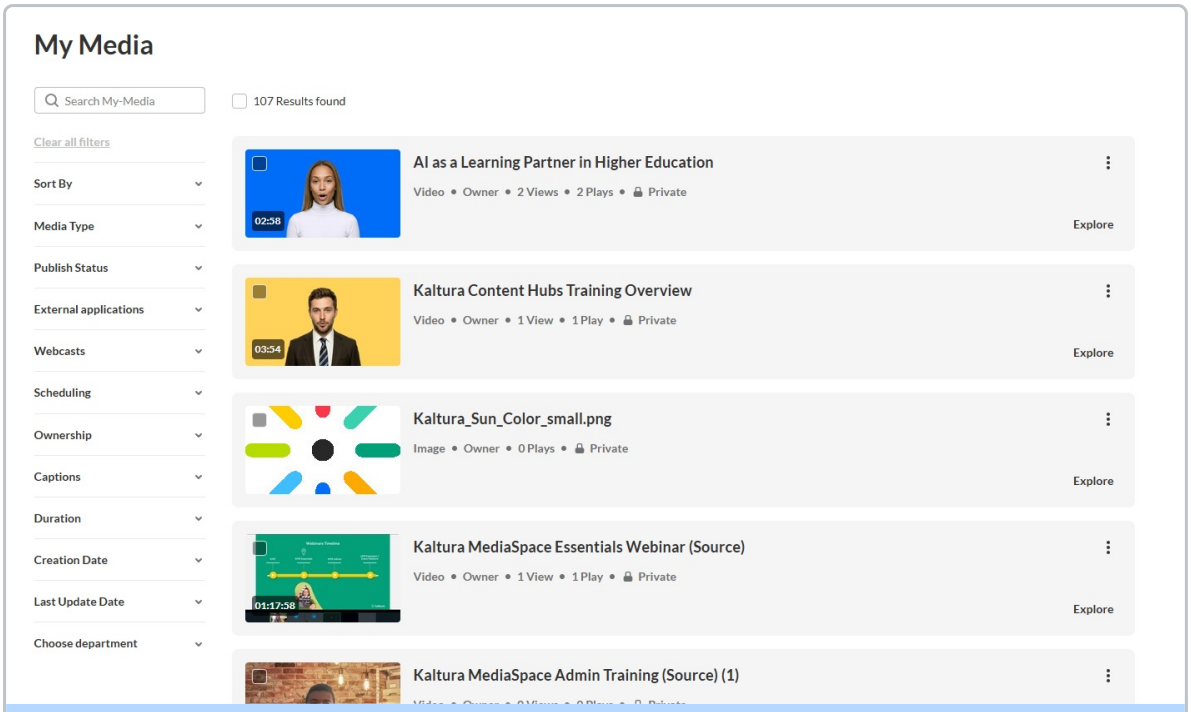

With Avatar Video Studio, you can:

- create videos from scratch
- generate videos from presentations
- generate recap videos from existing recordings
- create an explainer video from videos, documents, or webpage URLs
- create videos in different languages (the avatar speaks the language of the script)
- select avatars from the library or create a custom avatar using your own image and voice
- customize backgrounds
- preview scenes and edit scripts before generating the final video

This feature requires the Avatarvodstudio module to be enabled.

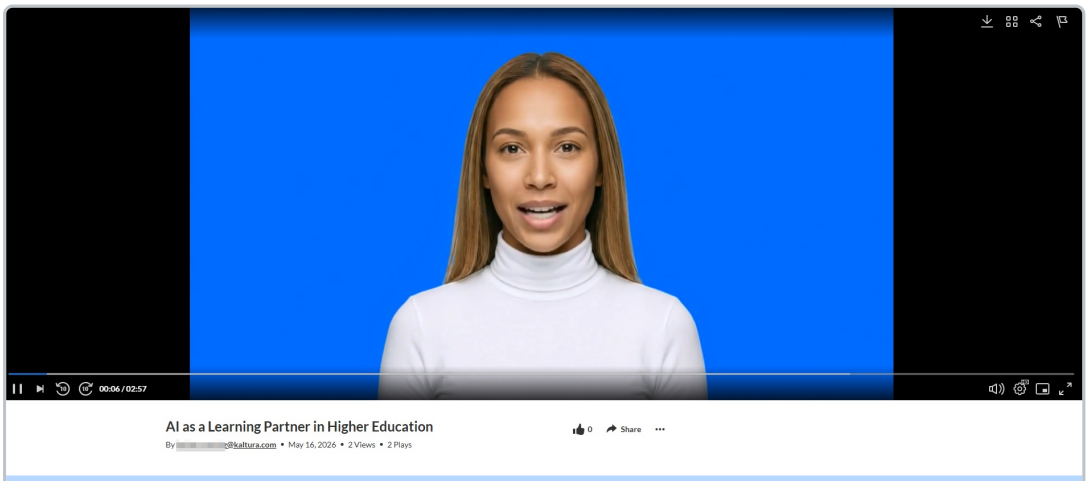

Generated videos are saved in My Media in your Content Hub, and can be managed like other media in the platform.

My Media page

Generated avatar videos can be viewed from the media page in your Content Hub.

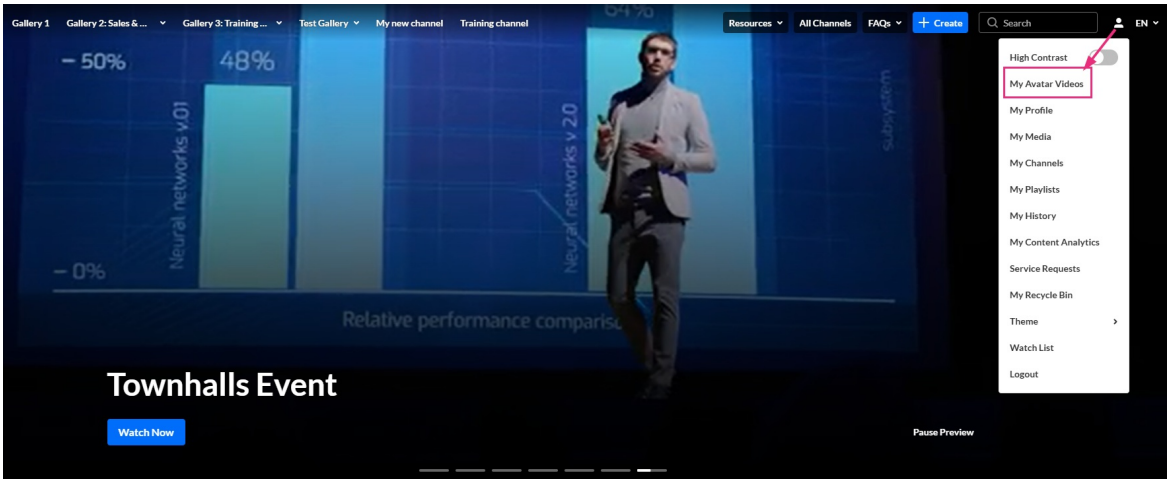

Generated video playing from media page

Access Avatar Video Studio

You can access Avatar Video Studio in one of the following ways:

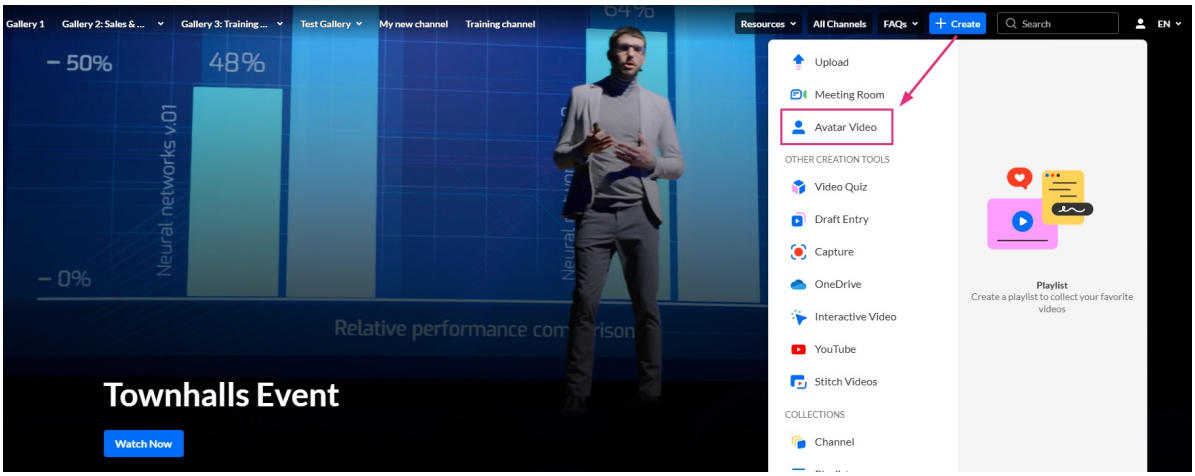

- Select **My Avatar Videos** from the user menu.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

- Select **Avatar Video** from the **+Create** menu.

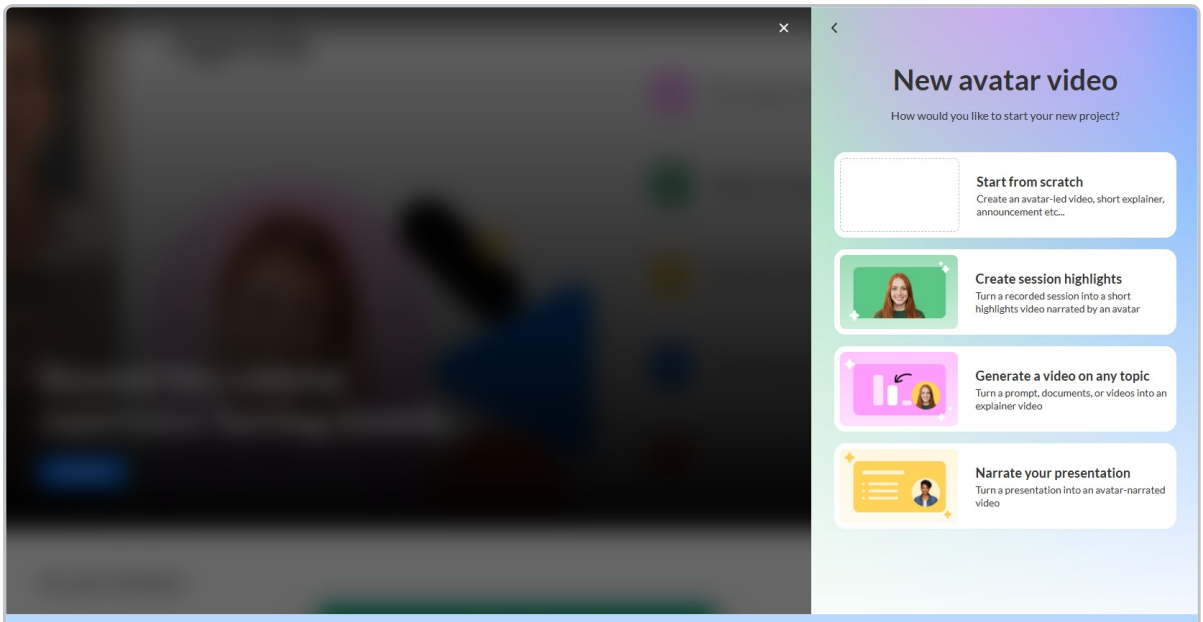

> This option only appears if the site uses the Theming header.

Avatar video workflows

Avatar Video Studio supports four workflows.

Create a new project

Start from scratch

Create an avatar video using your own script and media.

For more information, see Create an avatar video from scratch.

Create session highlights

Generate a recap video from an existing recording. This workflow uses captions and source media to generate narration, scenes, and highlighted clips.

For more information, see Create an avatar video from an existing recording.

Generate a video on any topic

Generate an explainer video from videos, documents, webpages, or written instructions. Avatar Video Studio analyzes the selected sources and generates a draft video project automatically.

For more information, see Generate an avatar video on any topic.

Narrate your presentation

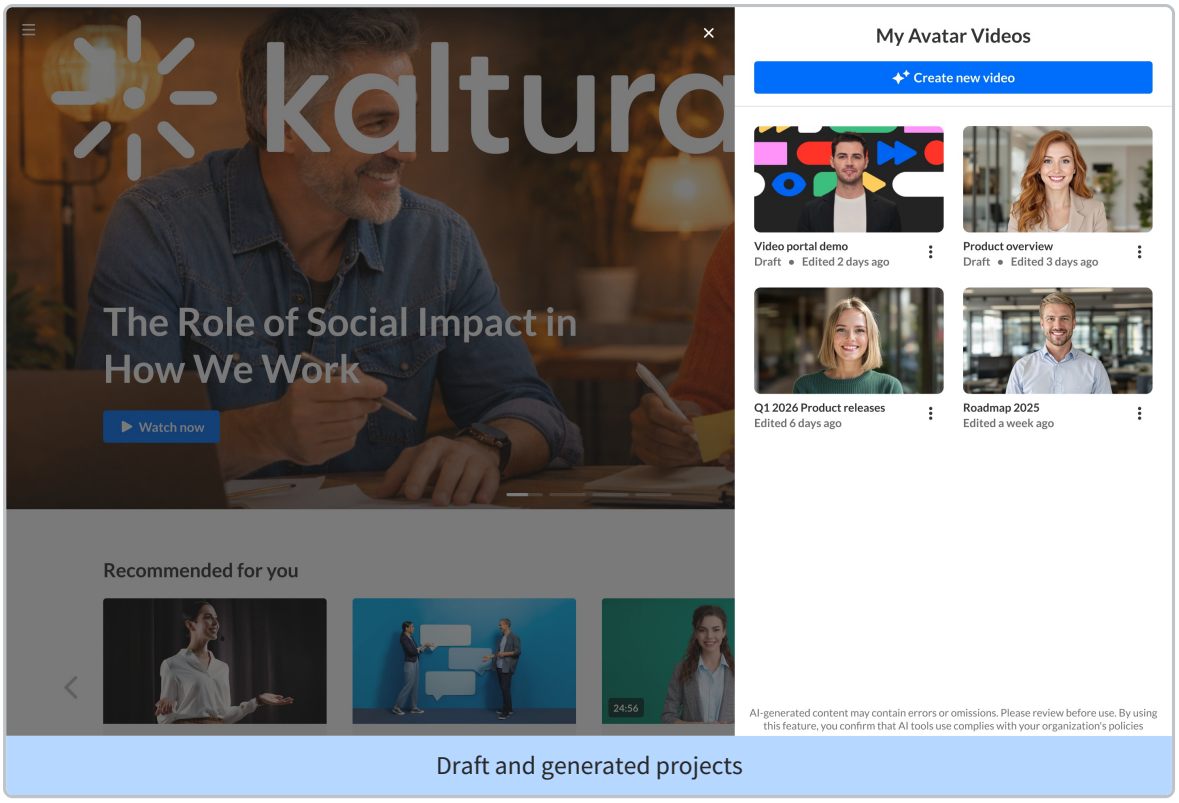

Generate an avatar video from a presentation. Avatar Video Studio analyzes the selected presentation and generates a draft project with narration based on the slide content and speaker notes.

For more information, see Create an avatar video from a presentation.

Edit and manage projects

Draft and generated avatar video projects are managed from the **My Avatar Videos** page.

Draft and generated projects

Generated avatar videos are also saved to My Media and can be accessed like other media entries in the platform.

Edit projects

Edit scripts, scenes, and source clips, and preview scenes before generating the final video.

For more information, see Edit avatar video projects.

Customize the avatar and background

Choose an avatar, and set a background color or image for all scenes.

For more information, see Customize the avatar and background.

Create a custom avatar

Create a custom avatar using your own image and voice. Custom avatars are saved to **My avatars** and can be used in your avatar video projects.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

For more information, see Create a custom avatar in Avatar Video Studio.

Manage source clips

Add and manage source clips within scenes, including video clips and presentation slides from source content or your media library.

For more information, see Edit source clips in avatar videos.

Manage avatar video projects

Open projects, preview generated videos, download videos, and monitor generation status.

For more information, see Manage avatar video projects.
