This article is designated for moderators

About

The **Feed** tab (**pin icon**) displays pinned items and published interactions during a live session. Moderators can manage the items displayed in the **Feed**, including interaction results.

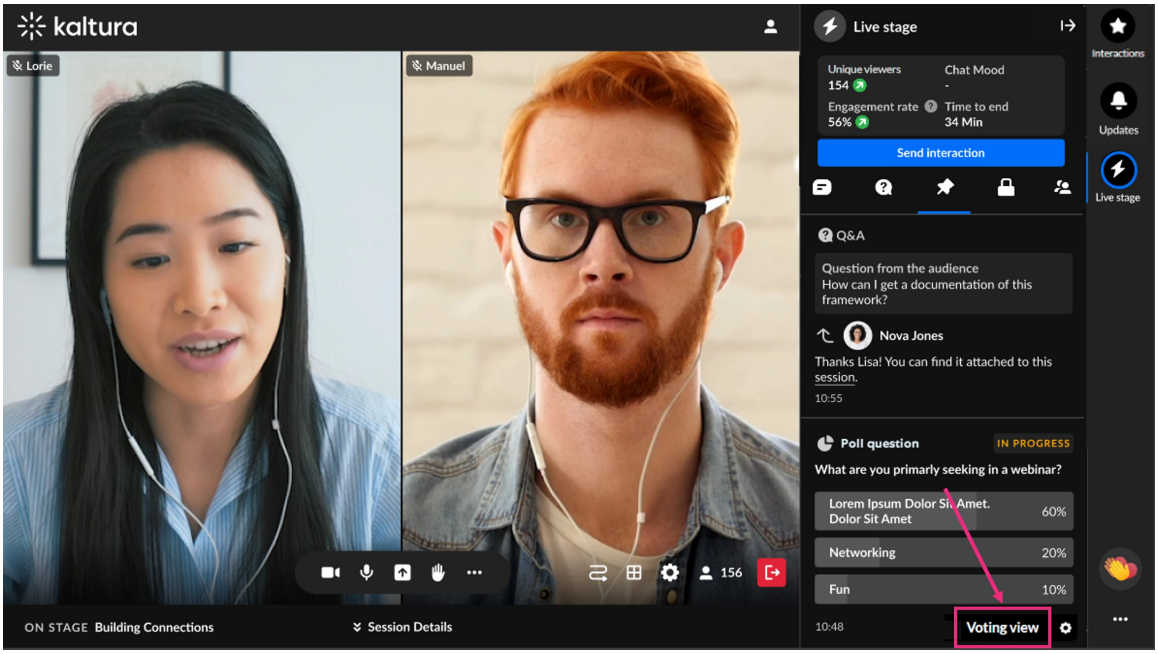

View and respond to interactions

Moderators can view the results of an interaction before submitting their own response.

To respond to a poll:

1. Click **Voting view**.
2. Select your answer.

Manage interactions

Click **Settings (gear icon)** for an interaction to access the available management options.

Depending on the interaction type, you can:

- Hide or share results
- End the interaction
- Unpublish the interaction

These options are available for polls, quizzes, rating scales, crowd votes, and open-ended questions. You can also end surveys and end or unpublish word clouds.

Manage pinned items

Items pinned from **Chat** or **Q&A** appear in the **Feed** tab. Moderators can pin and unpin these items.

In **Kaltura Events**, questions published with an answer from the Moderator app also appear in the **Feed** tab. Changes made to interactions in the Moderator app, such as hiding results, ending an interaction, or unpublishing it, are also reflected in the **Feed** tab.
