

Configure a pre-recorded video source for a live stream in Content Hubs

Last Modified on 05/25/2026 10:44 am IDT

 This article is designated for all users.

About

A video source lets you use prerecorded content as the source for a live stream.

This feature is available for supported live stream types that use prerecorded video sources.

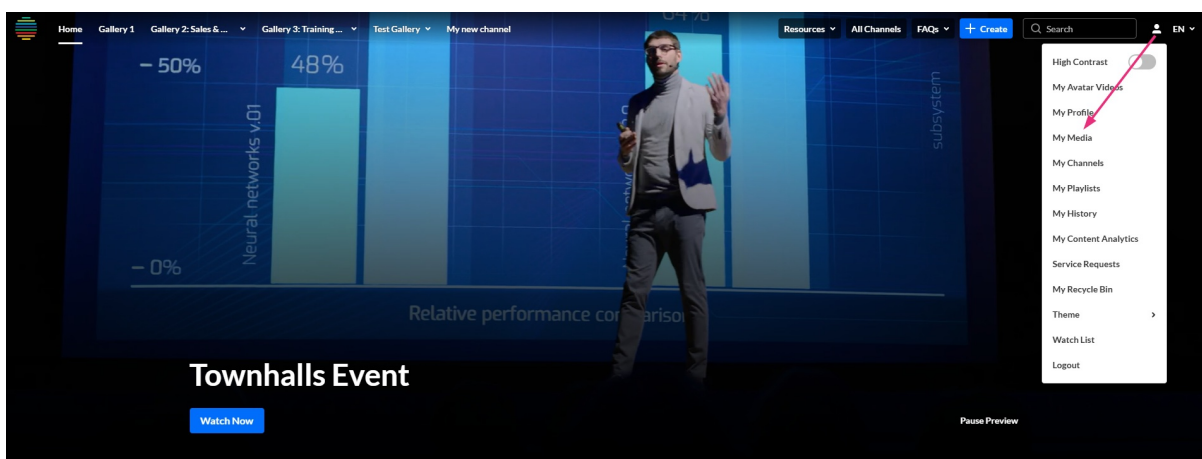

If you don't see the **Video source** section, contact your administrator for more information about enabling this feature.

Who can use this

- Media owners
- Co-editors

Access the Streaming tab

1. From the user menu, select [My Media](#).

The 'My Media' page displays.

2. Click the **three dots** to the right of the desired media and select **Edit**.

⋮ Information

Streaming Save

Manage preview, input connection, processing, recording, and distribution for this live stream.

Preview stream
Monitor the incoming live stream. If no stream is detected, the player will display an Offline message.

Not broadcasting yet

The video will start playing once the broadcast starts

Preview mode
Preview mode allows moderators only to validate the stream before going live. While in preview mode, the stream is not visible to viewers until "Go live" is clicked in the relevant broadcasting apps.

On

Stream details
Connect your encoder (OBS, Wirecast, vMix, etc.) to send video to this live stream.

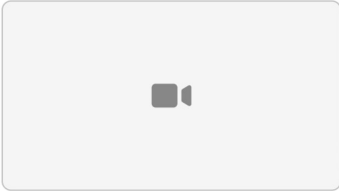

👁️ View Connection details
📄 Copy Connection details
⬇️ XML for FMLE

Stream configuration
Control how the stream is handled, recorded, and delivered during and after the session.

Upload a new video source

In the **Video source** section, click **Edit video** to open the menu.

Video source
To ensure a seamless broadcast, upload your pre-recorded video ahead of the event.

✎ Edit video

Upload new video

Select from My Media

Stream configuration
Control how the stream is handled, recorded, and delivered during and after the session.

DVR
Allow seeking to previous parts of the live stream. The DVR window is 24 hours by default.

Enable DVR

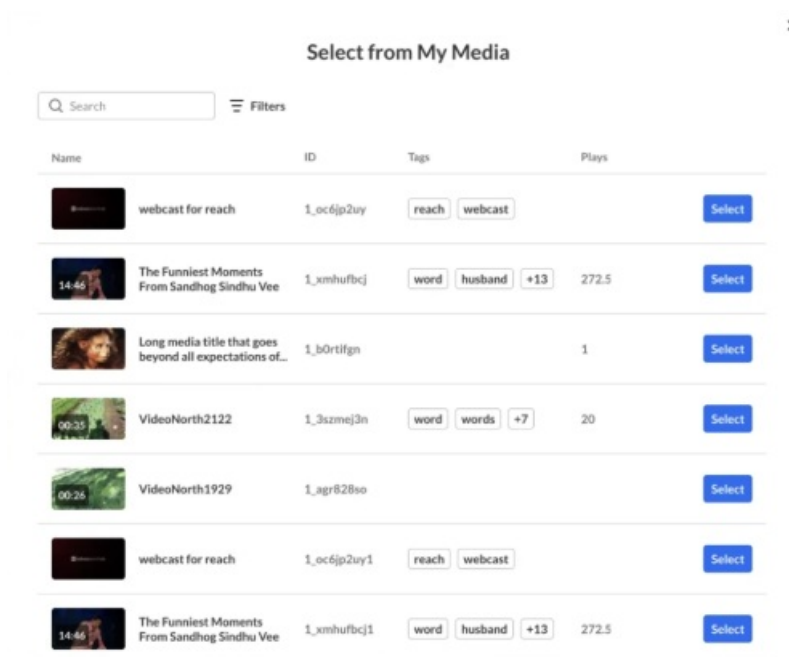

Upload from your computer

1. In the **Video source** section, select **Upload new video**.
2. Choose the file from your computer.
The upload begins immediately.

When the upload completes successfully, the video source is updated automatically.

Select from My Media

1. In the **Video source** section, click **Select from My Media**.
The media selection window opens.

The media selection window displays the following:

- video entries only
- media you own or that is group-owned
- columns for:
 - Name and thumbnail
 - ID
 - Tags
 - Creation date

2. Locate the desired video and click **Select**.

The selected media item is assigned as the video source.

Replace a video source

1. Click **Edit video**.
2. Select one of the following options:
 - **Upload new video**
 - **Select from My Media**

Video source

To ensure a seamless broadcast, upload your pre-recorded video ahead of the event.
