Avatar Videos release notes - July 2026

Date released: July 2026

What's new

Narrate your presentation

Turn your presentation into an avatar-led video with AI-generated narration.

Upload a presentation, and Avatar Studio creates a draft project with a narration script based on your slide content and speaker notes. Each selected slide becomes a scene in presentation order, with the corresponding slide used as the B-roll.

For more information, see Create an avatar video from a presentation.

Use presentation slides as B-roll

You can now use presentation slides as B-roll in any scene.

Upload a presentation or select one from your media library, then choose the slide you want to display. You can also replace an existing video clip with a slide or change the selected slide at any time.

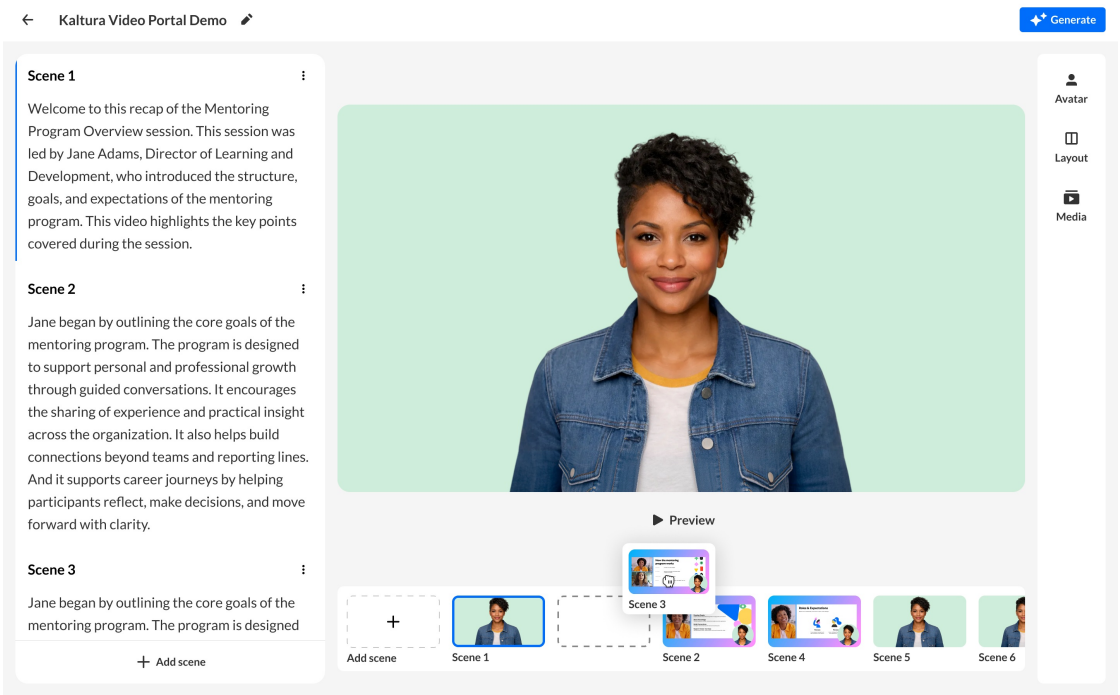
For more information, see Edit source media (B-roll) in avatar videos.

Reorder scenes

Drag and drop scenes in the timeline to rearrange your video. Scene numbers update automatically after you move a scene, making it easier to organize your video without recreating scenes.



For more information, see Edit avatar video projects.

Avatar Videos release notes - May 2026

Date released: May 2026

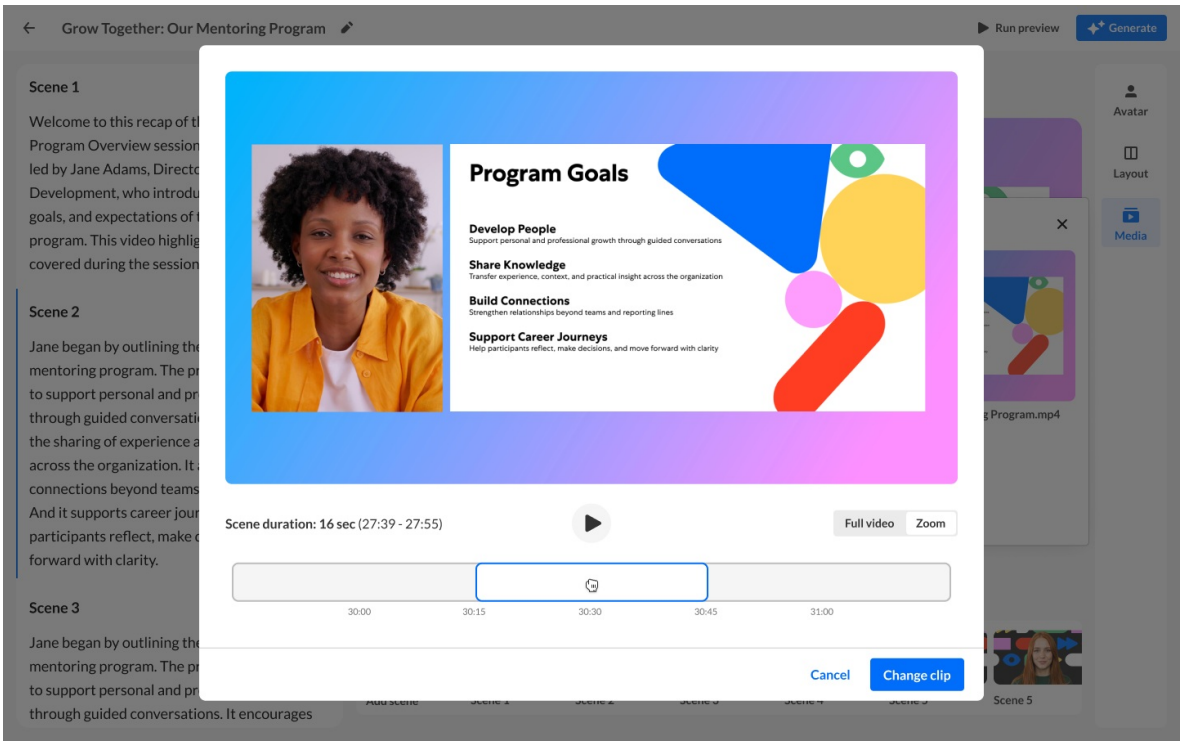
What's new

Avatar Videos

We’re excited to introduce Avatar Videos!

Avatar Videos enables organizations to transform enterprise knowledge into scalable, avatar-led video experiences. Teams can turn recordings, presentations, documents, webpages, and scripts into structured videos without traditional production workflows or specialized editing skills.

Built as part of Kaltura’s Rich Media Content Creation layer, Avatar Videos helps organizations create engaging video experiences faster, scale content production across teams, and make knowledge easier to consume, share, and act on.



This feature requires the Avatarvodstudio module to be enabled.

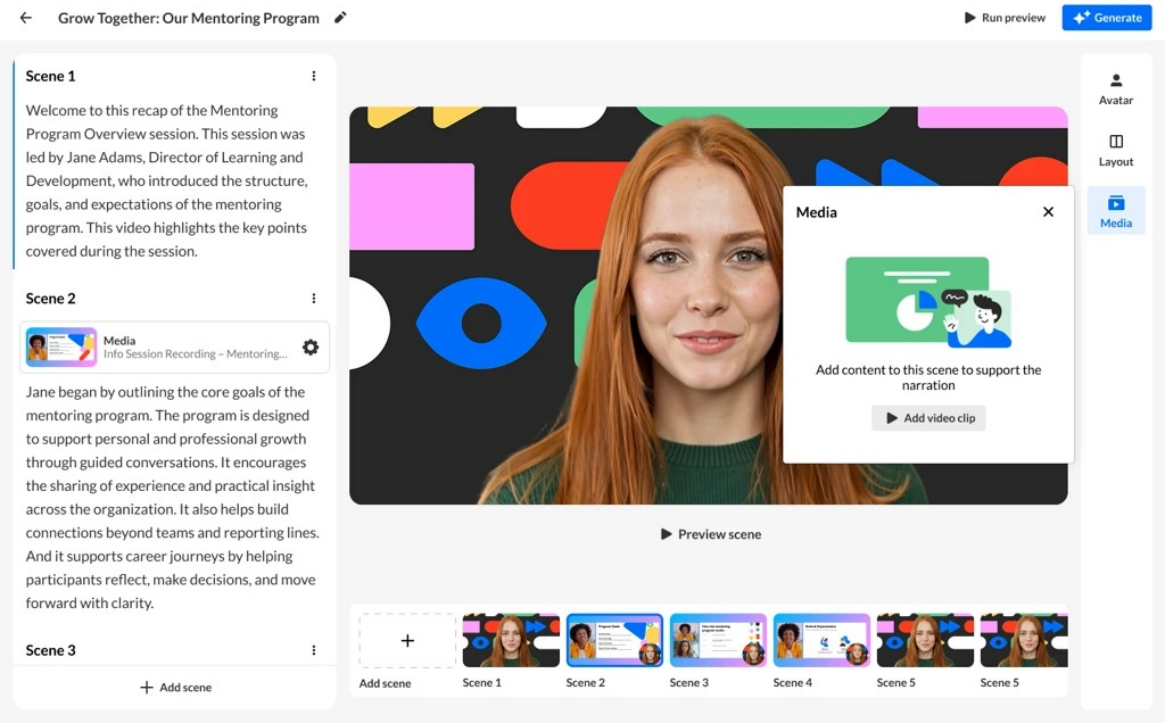
With Avatar Videos, you can:

- Create videos from scratch using scripts and media
- Generate recap and highlights videos from existing recordings
- Create explainer videos from videos, documents, and webpages

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

- Add and manage supporting background media within scenes
- Customize avatars and backgrounds
- Review and edit generated narration and scenes before generating the final video

Generated videos are saved in My Media and can be managed like other media in the platform.



For more information, see Introduction to Avatar Videos.
