### Avatar Videos release notes - May 2026

**Date released: May 2026**

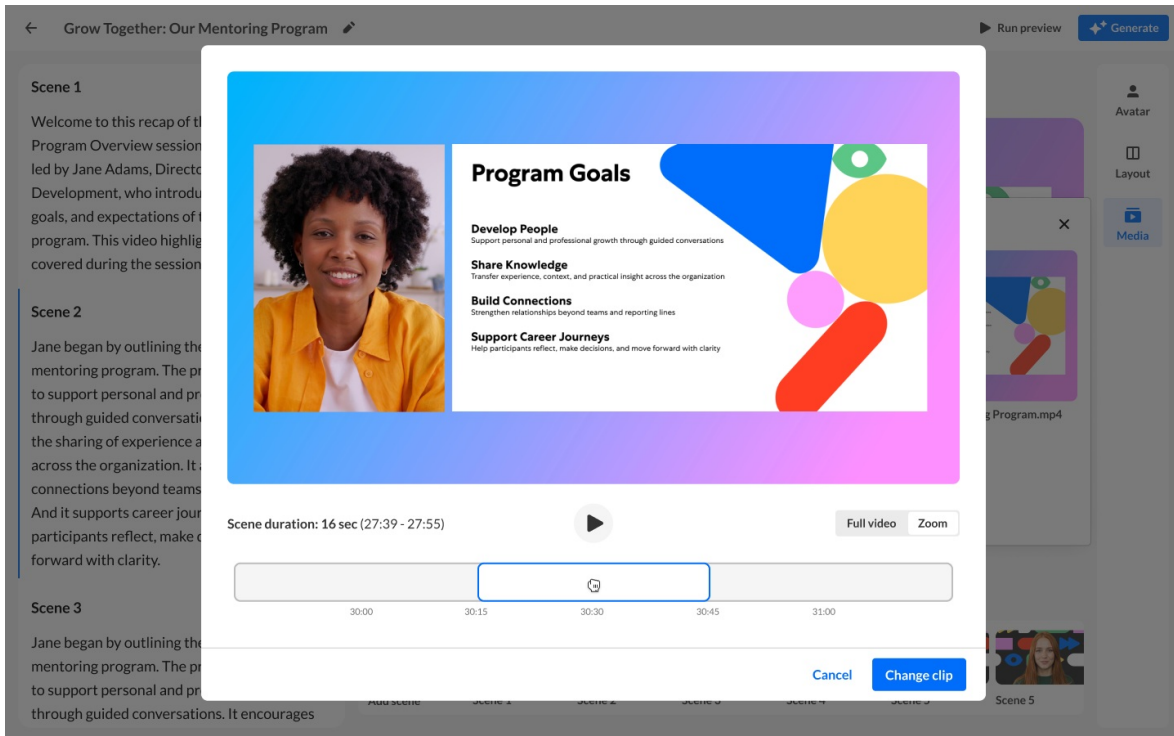

#### What's new

##### Avatar Videos

We're excited to introduce Avatar Videos!

Avatar Videos enables organizations to transform enterprise knowledge into scalable, avatar-led video experiences. Teams can turn recordings, presentations, documents, webpages, and scripts into structured videos without traditional production workflows or specialized editing skills.

Built as part of Kaltura's Rich Media Content Creation layer, Avatar Videos helps organizations create engaging video experiences faster, scale content production across teams, and make knowledge easier to consume, share, and act on.

This feature requires the [Avatarvodstudio module](#) to be enabled.

With Avatar Videos, you can:

- Create videos from scratch using scripts and media
- Generate recap and highlights videos from existing recordings
- Create explainer videos from videos, documents, and webpages
- Add and manage supporting background media within scenes
- Customize avatars and backgrounds
- Review and edit generated narration and scenes before generating the final video

Generated videos are saved in [My Media](#) and can be managed like other media in the platform.

**Scene 1**

Welcome to this recap of the Mentoring Program Overview session. This session was led by Jane Adams, Director of Learning and Development, who introduced the structure, goals, and expectations of the mentoring program. This video highlights the key points covered during the session.

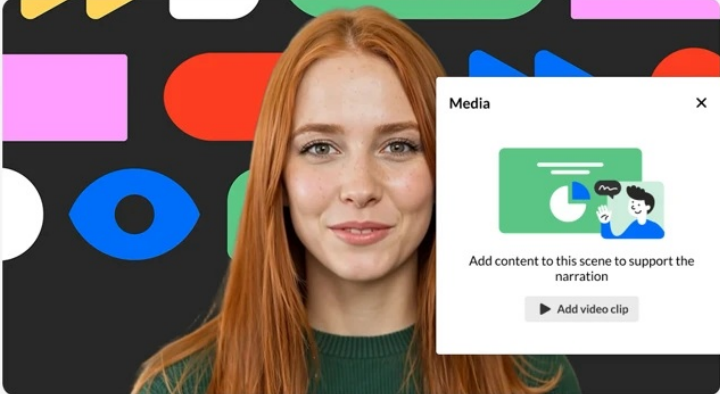

**Scene 2**

**Media**  
Info Session Recording - Mentoring...

Jane began by outlining the core goals of the mentoring program. The program is designed to support personal and professional growth through guided conversations. It encourages the sharing of experience and practical insight across the organization. It also helps build connections beyond teams and reporting lines. And it supports career journeys by helping participants reflect, make decisions, and move forward with clarity.
