About

Use the External CSS setting to apply custom CSS styling to a player.

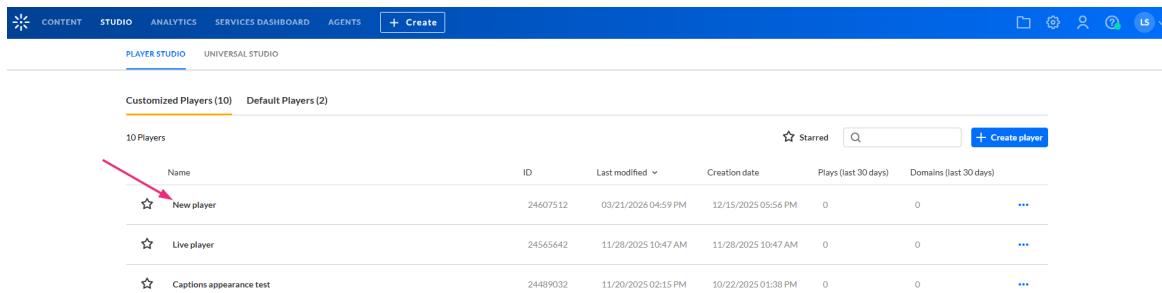

This setting is available for video, audio, and reels players.

Access the Visual settings

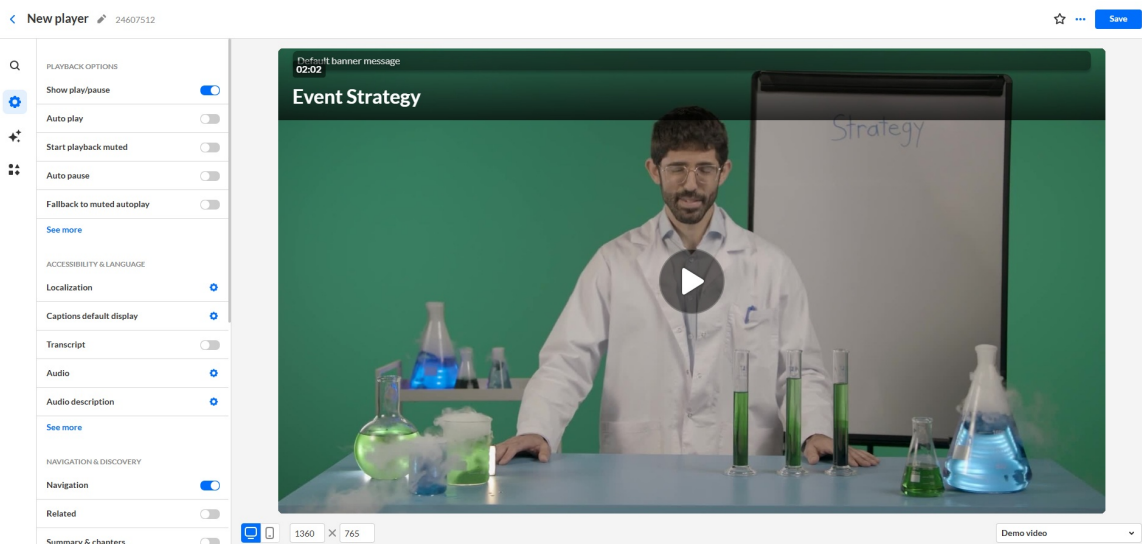

1. Log into your Rich Media CMS and click the **Studio** tab.

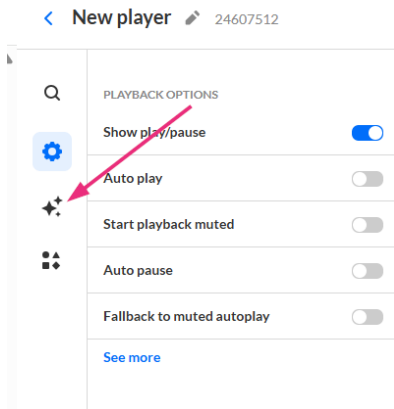

2. From the list, select the player you want to configure.

The settings tab opens.

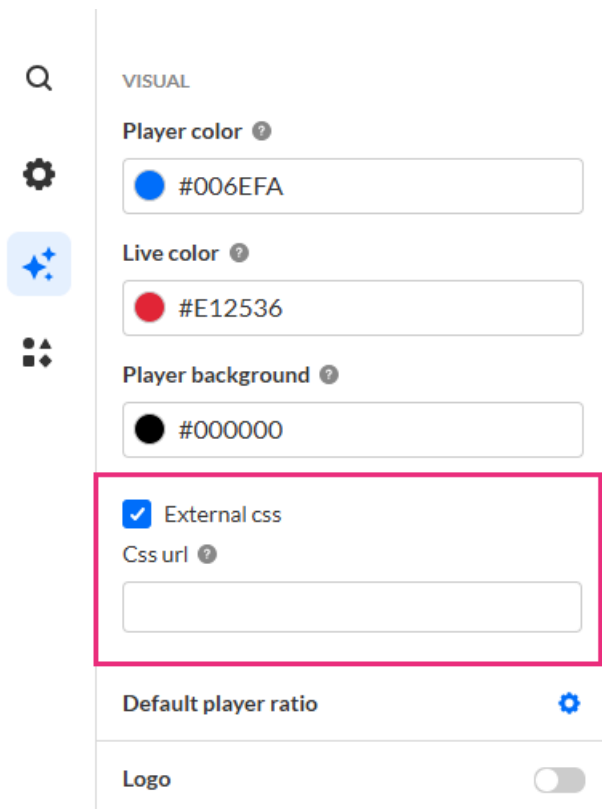

3. Click the **stars icon**.

The visual settings display.

Apply custom CSS

1. Select the **External CSS** checkbox.
2. In the **CSS url** field, enter the URL of the CSS file.

3. Click **Save** at the top right of the settings page.

The player loads and applies the styles from the specified location.

Example

The following CSS code hides the **Advance captions settings** from the player.

```
a.playkit-advanced-captions-menu-link {  
display: none;}
```
