About

Translations convert the spoken language in a video into another language and appear as subtitles. Viewers can read the translated subtitles in their preferred language while the original audio remains unchanged.

You can also automate translation requests for new content by creating rules for categories. For more information, see [Create captioning & enrichment rules in Rich Media CMS](#).

Translation service types

You can choose from the following translation services:

Machine

Also known as ASR, machine translations are generated automatically and provide an average accuracy of approximately 85%.

Machine translations:

- Enable searchable video content
- Support editing
- Support resubmissions
- Can use [custom vocabularies and dictionaries](#) to improve accuracy

Professional

Professional translations are created and reviewed by human transcribers and provide approximately 99% accuracy.

Professional translations:

- Meet accessibility requirements
- Include human review and quality assurance

- Support special instructions for editors and reviewers
- Are recommended for public-facing content such as marketing, learning, and training videos

Before you start

- Video must be in "Ready" status (transcoded)
- Your account must have Content Lab enabled
- Your account must have an active REACH profile enabled with relevant catalog item(s)

Video translations ordering via Content Lab is not currently available for legacy Video Portal or LMS Video.
