

Custom Embed Code - User Guide

Last Modified on 06/23/2026 6:53 pm IDT

 This article is designated for all users.

About

The Custom Embed Code module enables Content Hubs/legacy Video Portal users to generate custom embed codes containing dynamic entry metadata such as title and description.

This module is available for both Content Hubs and legacy Video Portal.

For technical support, contact Kaltura Customer Care. For all other inquiries, reach out to your Customer Success Manager.

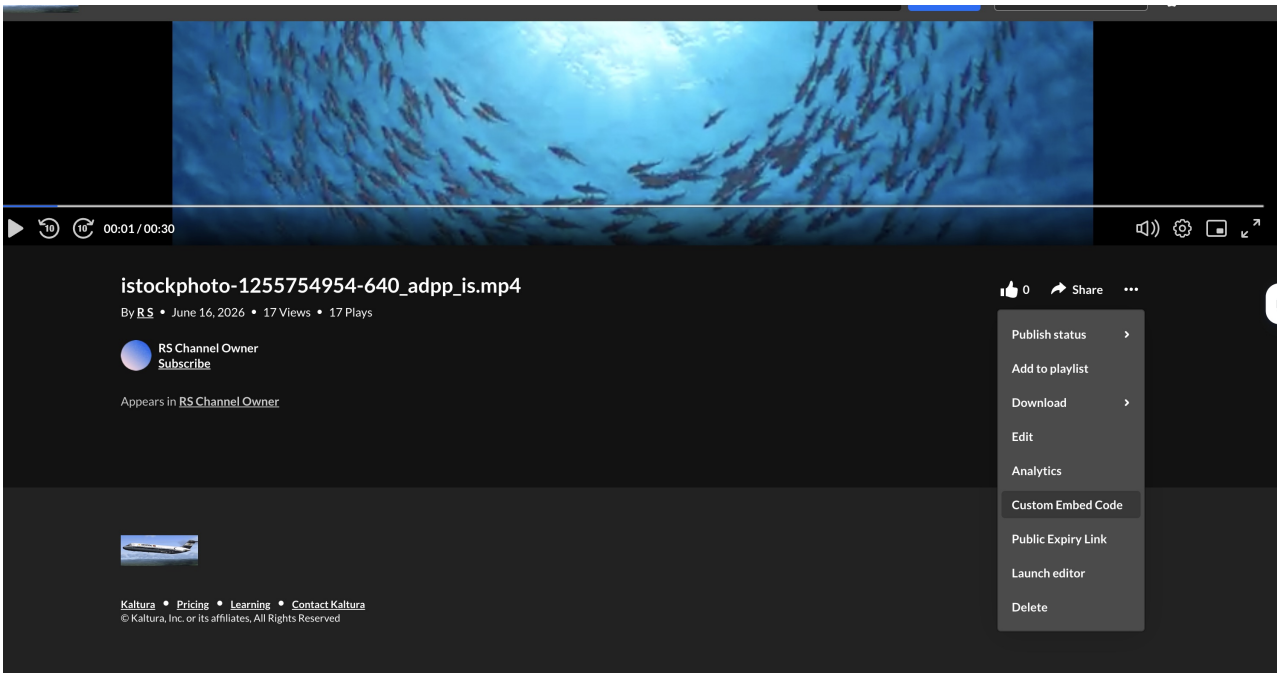

Custom Embed Code

If your admin has enabled and configured the Custom Embed Code module, a new tab will be available on the Entry page. Here users can configure the embed's access level and easily copy and share the embed link as needed.

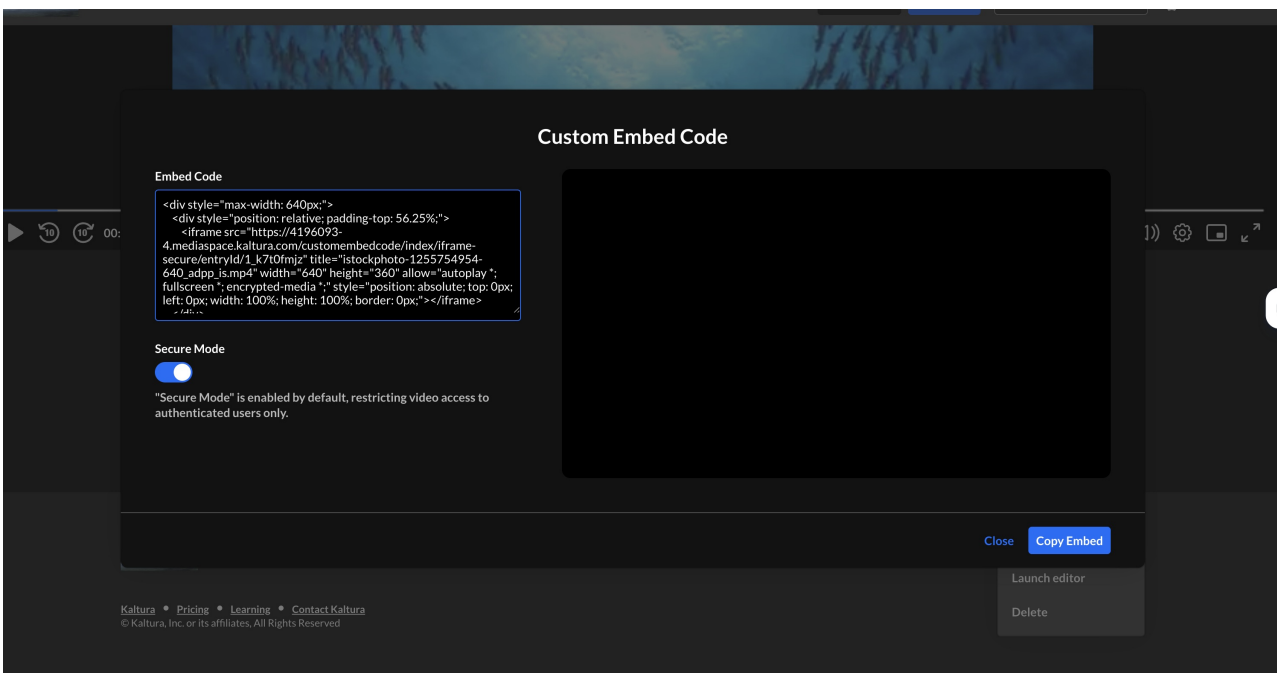

Content Hubs:

Log into your Content Hubs and navigate to a media's Entry page. If you need help logging in and accessing media, please follow the instructions in [Log into your Content Hubs](#) and [My Media](#).

From the Actions menu, choose the new tab (named 'Custom Embed Code' by the administrator in our example below).

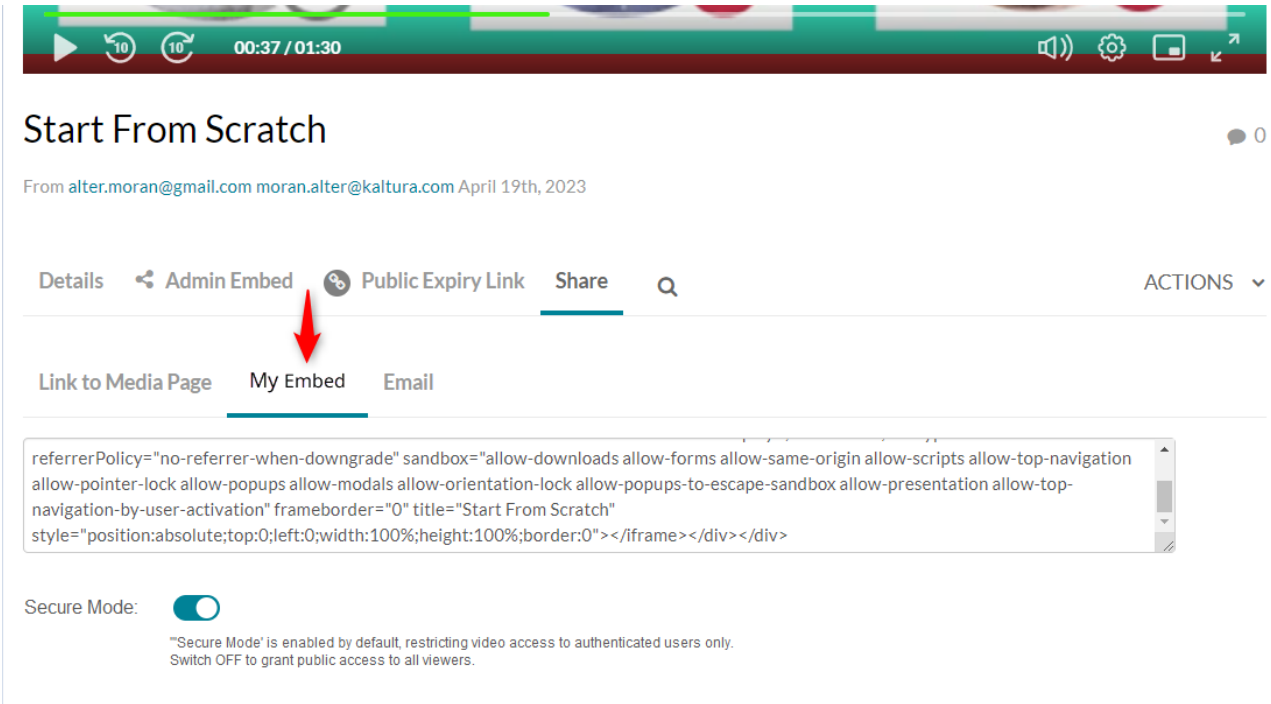

The Custom Embed Code window displays. Here users can configure the embed's access level and easily copy and share the embed link as needed.

Legacy Video Portal:

Log into your legacy Video Portal and navigate to a media's Entry page. If you need help logging in and accessing media, please follow the instructions in [Log into your legacy Video Portal](#) and [My Media](#).

Click on the Share tab, then choose the new tab (named 'Embed' by the administrator in our example below).

Start From Scratch

Details Admin Embed Public Expiry Link Share

Link to Media Page My Embed Email

```
referrerPolicy="no-referrer-when-downgrade" sandbox="allow-downloads allow-forms allow-same-origin allow-scripts allow-top-navigation allow-pointer-lock allow-popups allow-modals allow-orientation-lock allow-popups-to-escape-sandbox allow-presentation allow-top-navigation-by-user-activation" frameborder="0" title="Start From Scratch" style="position:absolute;top:0;left:0;width:100%;height:100%;border:0"></iframe></div></div>
```

Secure Mode:

"Secure Mode" is enabled by default, restricting video access to authenticated users only. Switch OFF to grant public access to all viewers.

Here users can configure the embed's access level and easily copy and share the embed link as needed.
