 This article is designated for administrators.

About

The **Audiotracks** module lets media owners upload and manage alternative audio tracks, such as dubbing and recorded audio descriptions (AD), so viewers can switch between audio tracks during playback.

When enabled, the **Audio tracks** section is available on the **Accessibility** tab of the [media edit page](#).

Configure

1. Go to your Configuration Management console and click on the **Audiotracks** module. You can also navigate to it directly using a link:

https://{your_site_URL}/admin/config/tab/audiotracks.
