

Upload and manage extended audio description (EAD) in Content Hubs

Last Modified on 08/11/2026 4:25 pm IDT

 This article is designated for all users.

About

You can upload and manage extended audio description (EAD) files for media that you own or have permission to edit.

Extended audio descriptions are time-coded text descriptions of visual content. The player converts the text into spoken narration using browser speech synthesis, making visual information in videos accessible to viewers with visual impairments.

EAD files use VTT format and are managed in the **Accessibility** tab of the edit page.

This feature requires the following to be enabled:

- [Captions module](#)
- [Theming module](#) with the 'mediaedit' feature set to 'Yes'

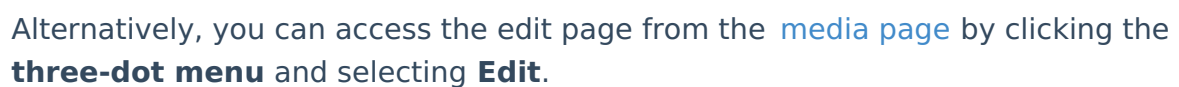

Who can use this

- Media owners
- Co-editors (depending on permissions)

Access the Accessibility tab

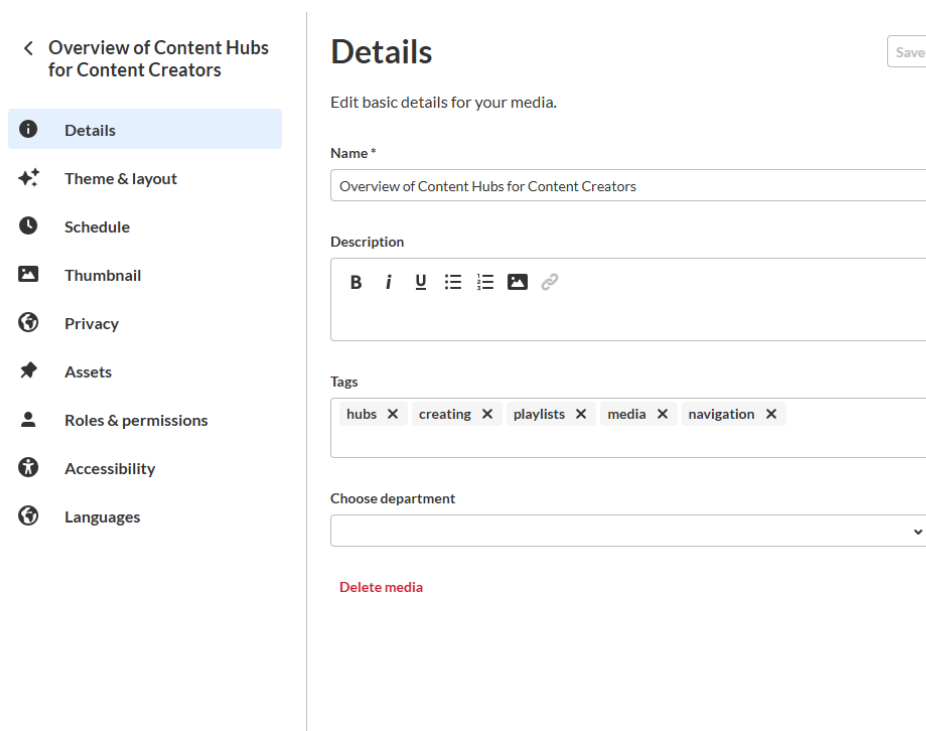

1. Select [My Media](#) from the user menu.

2. Click the **three dots** to the right of the desired media and select **Edit**.

The edit page opens on the **Details** tab by default, with a left-hand navigation.

3. In the left navigation, click the **Accessibility** tab to display the Accessibility page.
