This article is designated for all users.

About

A **live master session** lets you use a single source stream across multiple scheduled live sessions. Instead of configuring the source stream separately for each session, send the stream to the master session and connect the live sessions that should receive it.

The master session automatically sends the stream to each connected session according to its schedule.

Use the Restream sessions tab on the Edit Media page to connect, view, and manage the live sessions that receive the stream.

To send a live stream to external platforms using RTMP destinations, see Configure restream destinations in Content Hubs.

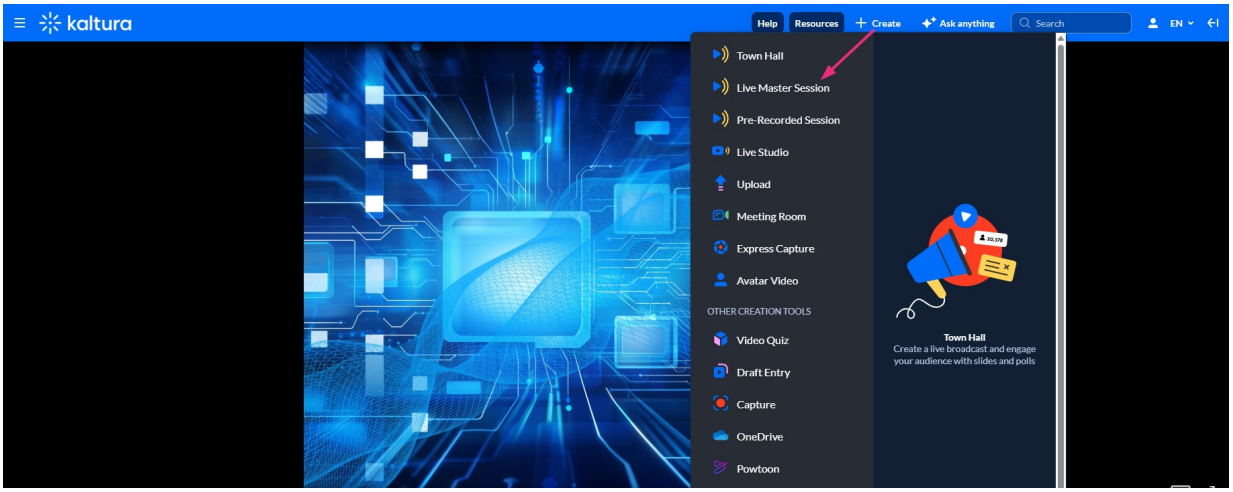

Who can use this

- Media owners
- Co-editors

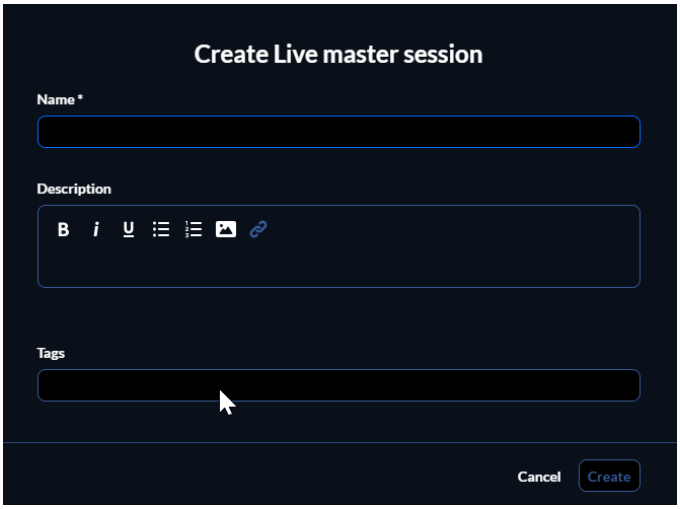

Create a live master session

1. Select **Live Master Session** from the **+Create** menu.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

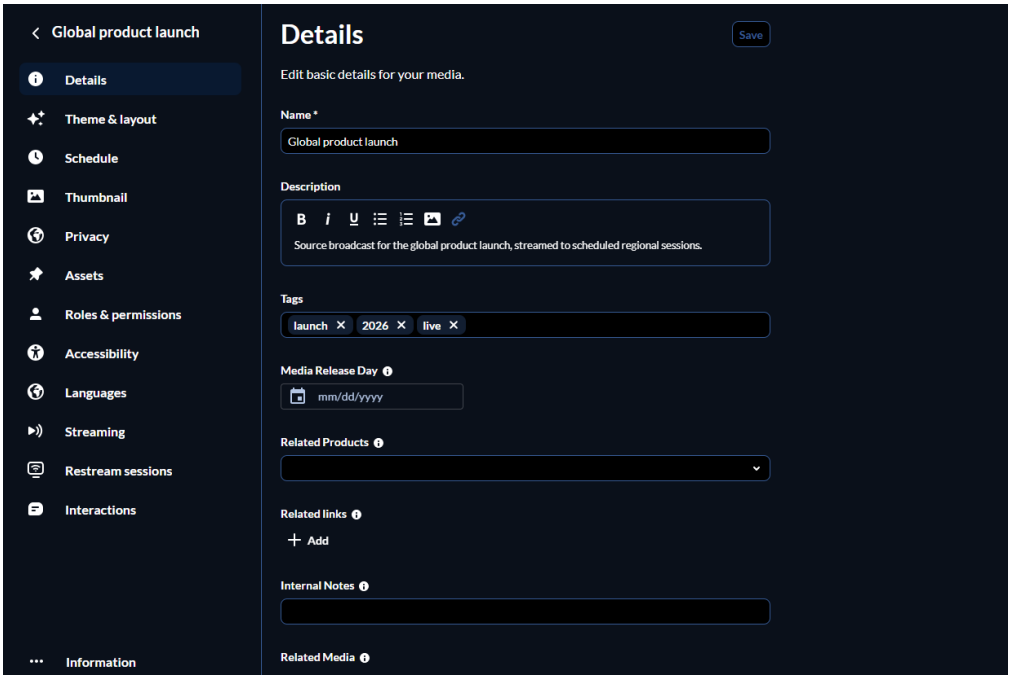

The **Create Live master session** window opens.

2. Enter a name. You can also add a description and tags.
3. Click **Create**.

   The Edit Media page opens for the new master session.

The master session receives the source stream that is sent to the connected sessions. Use the **Streaming** tab to access the connection details for your encoder. For more information, see Edit media streaming settings in Content Hubs.

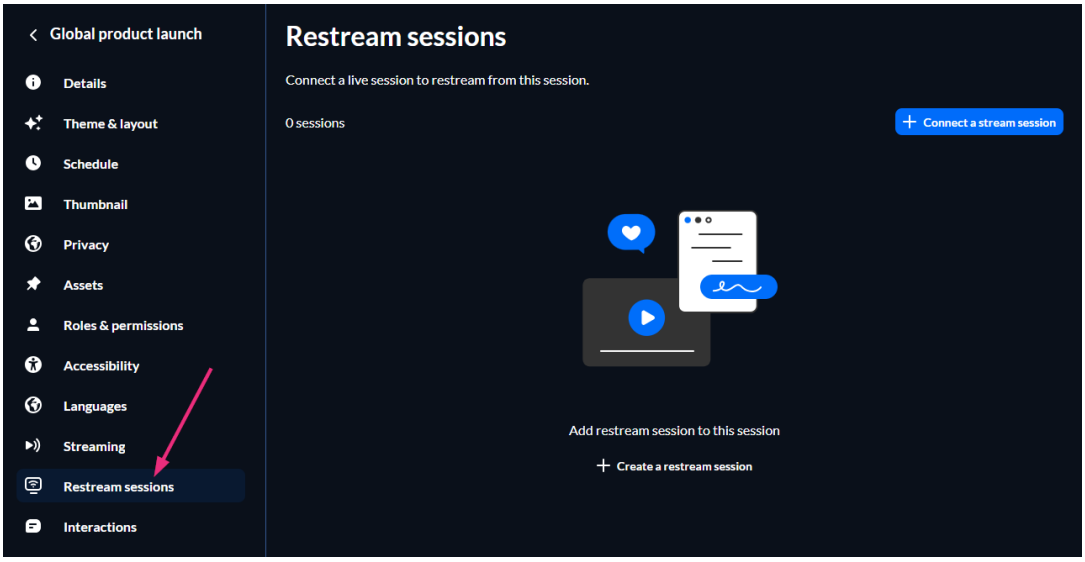

Connect sessions to the master

Connect one or more existing live sessions to receive the stream from the master session.

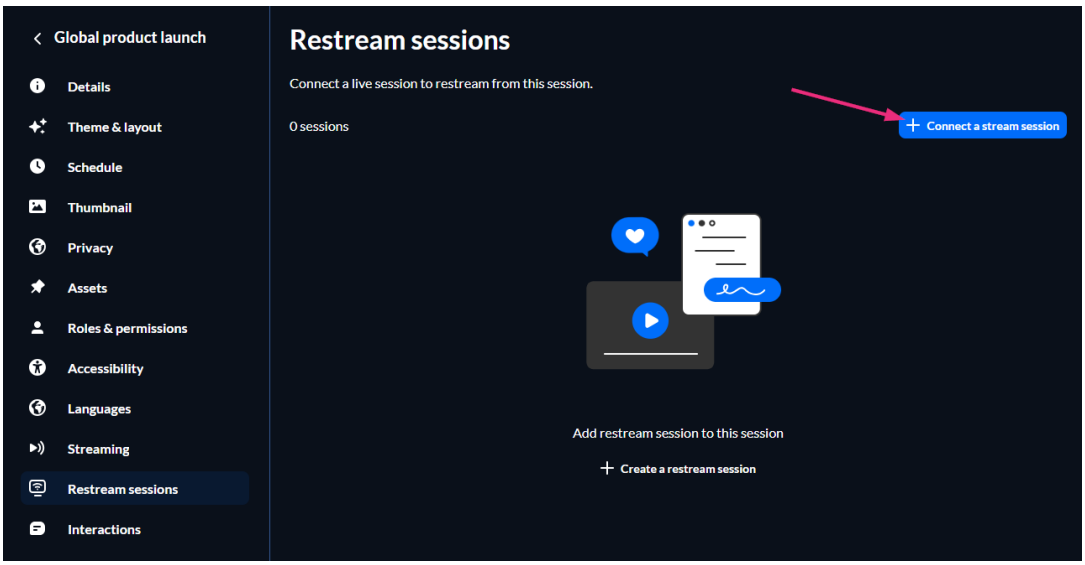

1. On the master session you just created, click the **Restream sessions** tab.

   The **Restream sessions** page opens.

2. Click **+ Connect a restream session** at the upper right.

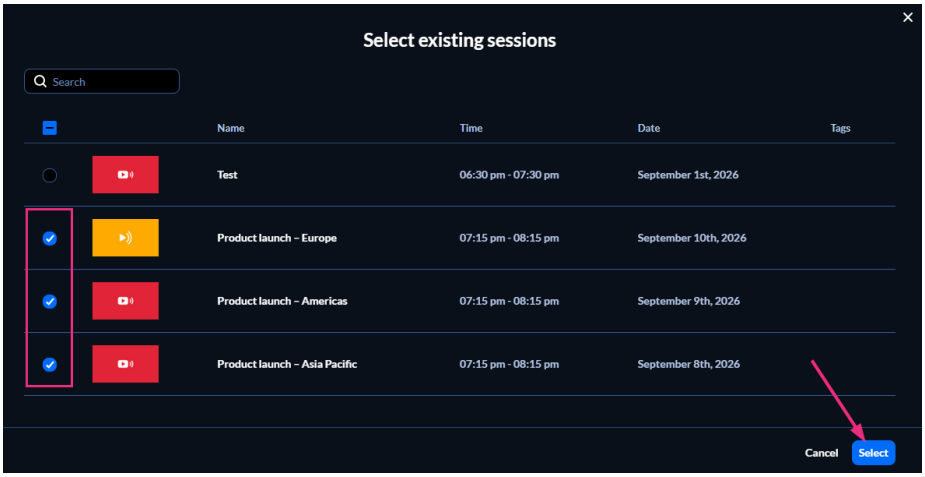

The **Select existing sessions** window opens.

Copyright © 2025 Kaltura Inc. All Rights Reserved. Designated trademarks and brands are the property of their respective owners. Use of this document constitutes acceptance of the Kaltura Terms of Use and Privacy Policy.

- The list only includes live sessions that you own or co-edit. The session you're currently editing and sessions already connected to it aren't included.
- If a session is already connected to another master session, it can't be selected.

3. Select one or more sessions. You can use the checkbox at the top of the list to select all available sessions.
4. Click **Select**.

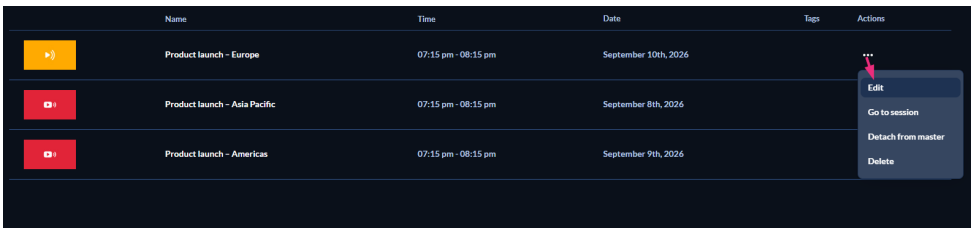

The selected sessions are added to the **Restream sessions** list.

The master session sends its live stream to each connected session according to that session's schedule.

Manage a connected session

To manage a connected session, click the **three dots** next to the session and select an action.

Available actions are:

- **Edit** - Opens the edit media page for the connected session.
- **Go to session** - Opens the connected session's page.
- **Detach from master** - Disconnects the session from the master. The session is removed from the Restream sessions list. The live session itself isn't deleted or

changed and can continue to be used independently.

- **Delete** - Opens a confirmation window. When confirmed, the live session is permanently deleted and removed from the Restream sessions list.
